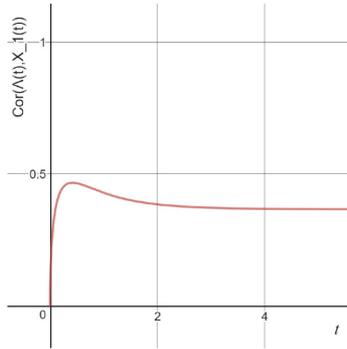

Figure 5.1. $\text{Cor}(\Lambda(t), X_{-1}(t))$ for $\mu_1 = 1$, $\gamma = 2$ and $D_\Lambda = 2$

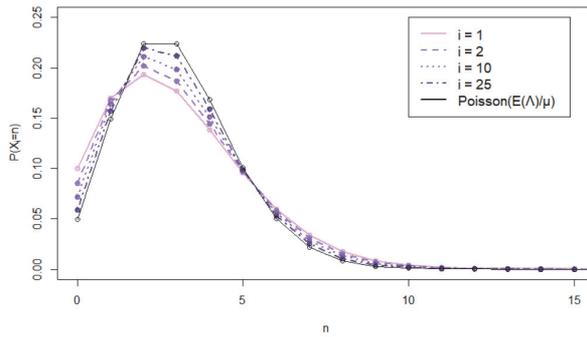

Figure 5.2. Estimated distribution of X_i for several phases i , with $\Lambda \sim U(0, 6)$ and $\gamma = \mu = 1$

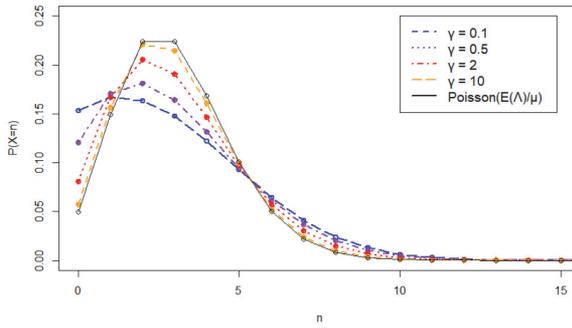

Figure 5.4. Estimated distribution of X for different values of γ , with $\Lambda \sim U(0, 6)$ and $\mu = 1$

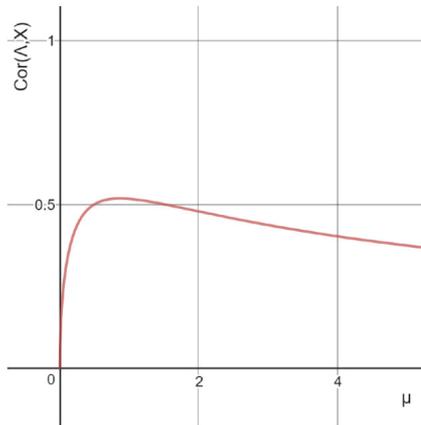

Figure 5.5. $\text{Cor}(X, \Lambda)$ for $D_\Lambda = 1$ and $\gamma = 0.5$

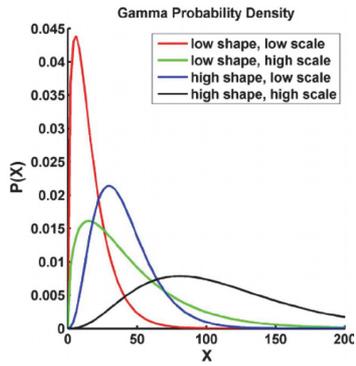

Figure 8.2. Density function of the gamma distribution

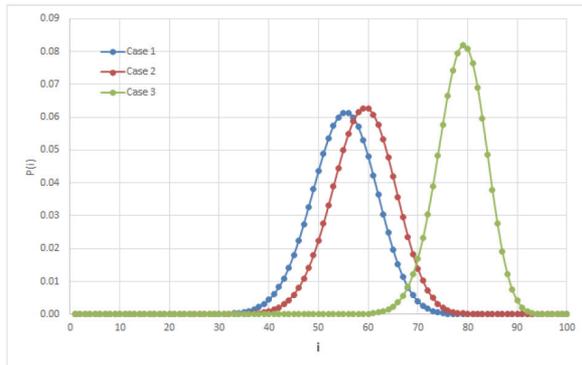

Figure 8.4. Steady-state distributions

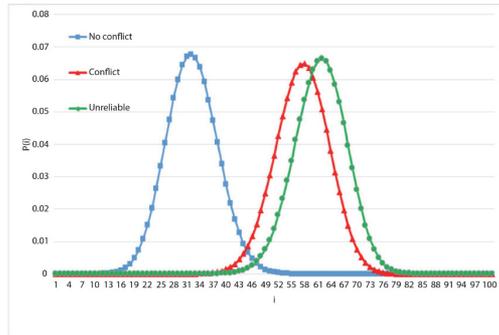

Figure 8.7. Reliable no conflict, reliable with conflict, and unreliable with conflict

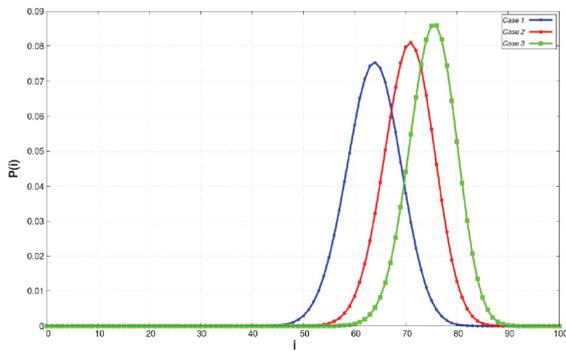

Figure 8.8. Comparison of steady-state distributions

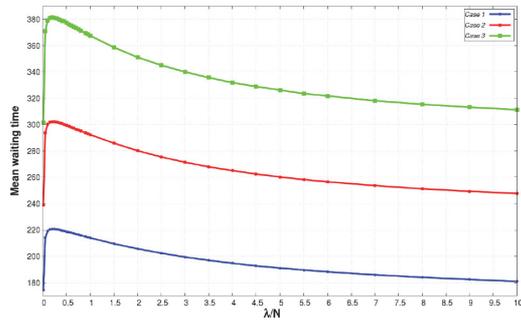

Figure 8.9. Mean waiting time versus intensity of incoming customers

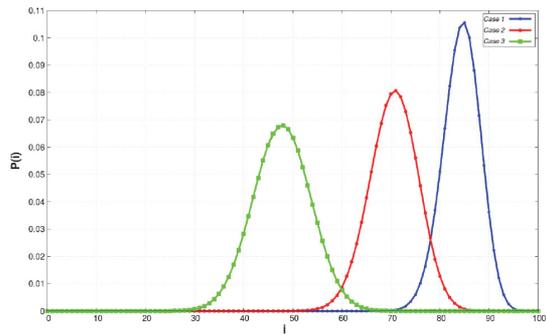

Figure 8.10. Steady-state distributions of gamma distributed interarrival times

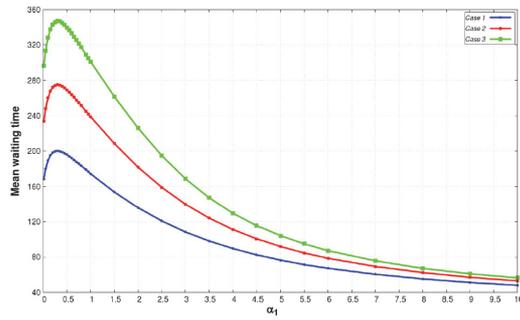

Figure 8.11. Mean waiting time versus shape parameter

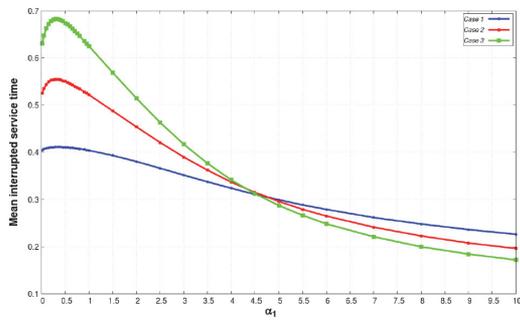

Figure 8.12. Mean interrupted service time versus shape parameter

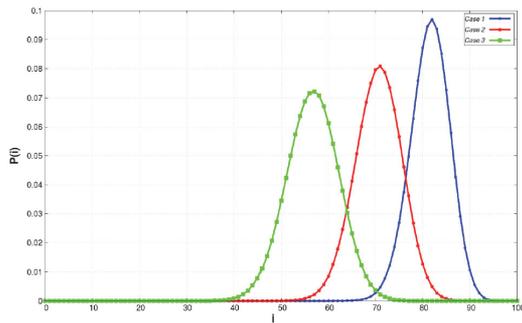

Figure 8.13. Steady-state distributions of gamma distributed retrial times

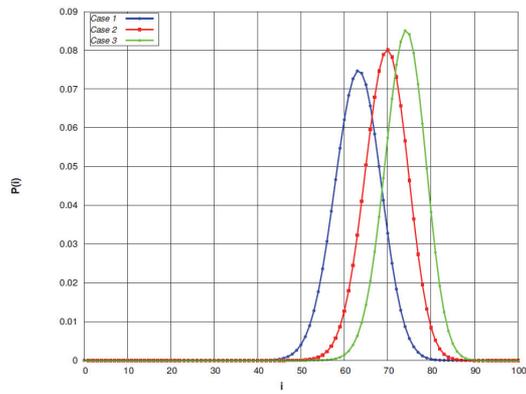

Figure 8.14. Comparison of steady-state distributions for mode 2

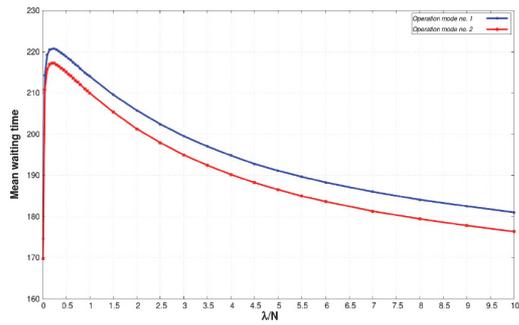

Figure 8.15. Mean waiting time versus intensity of incoming customers of Case 1

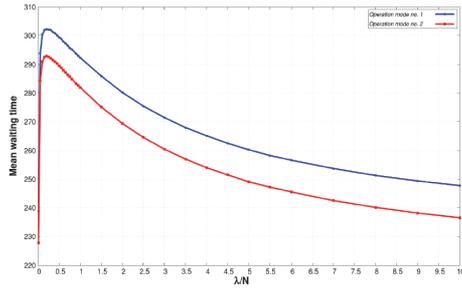

Figure 8.16. Mean waiting time versus intensity of incoming customers of Case 2

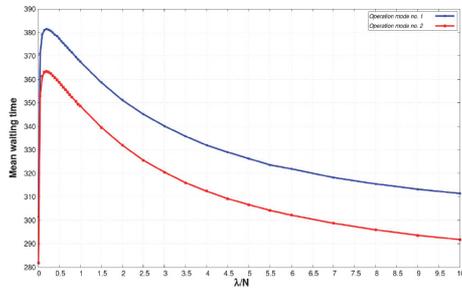

Figure 8.17. Mean waiting time versus intensity of incoming customers of Case 3

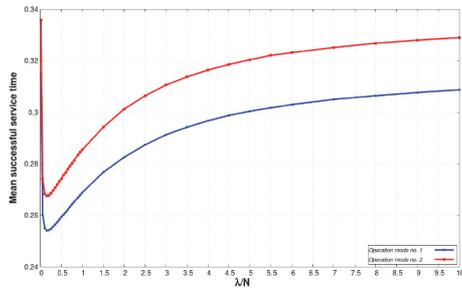

Figure 8.18. Mean successful service time versus intensity of incoming customers of Case 1

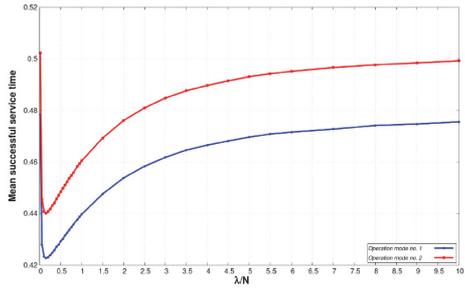

Figure 8.19. Mean successful service time versus intensity of incoming customers of Case 2

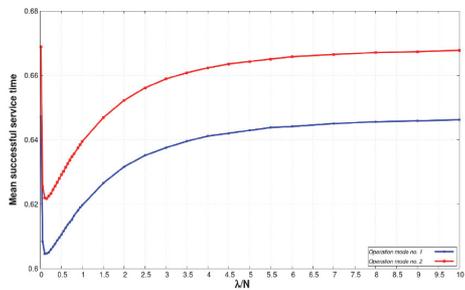

Figure 8.20. Mean successful service time versus intensity of incoming customers of Case 3

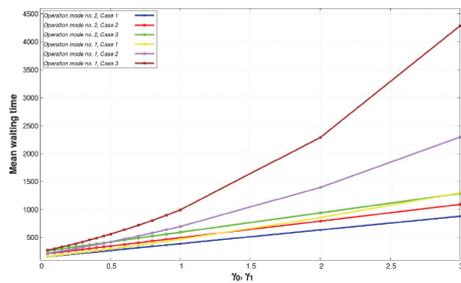

Figure 8.21. Mean waiting time versus intensity of failure rate

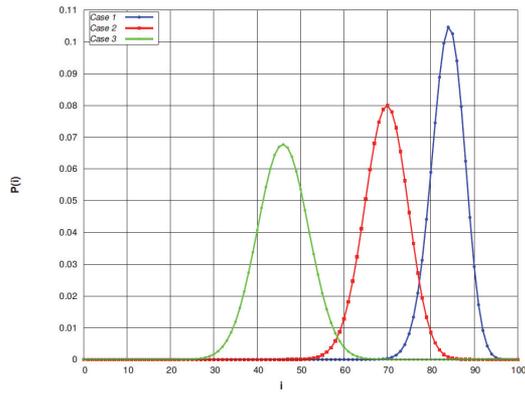

Figure 8.22. Steady-state distributions of scenario B

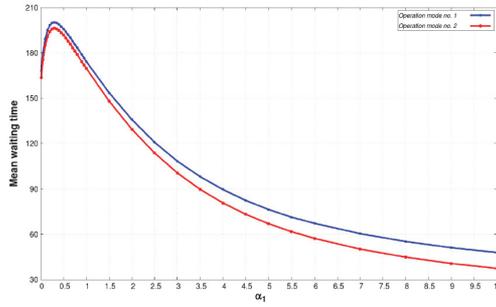

Figure 8.23. Mean waiting time versus shape parameter, $\alpha = \beta = 0.5$

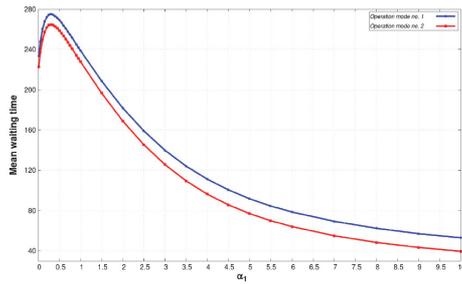

Figure 8.24. Mean waiting time versus shape parameter, $\alpha = \beta = 1$

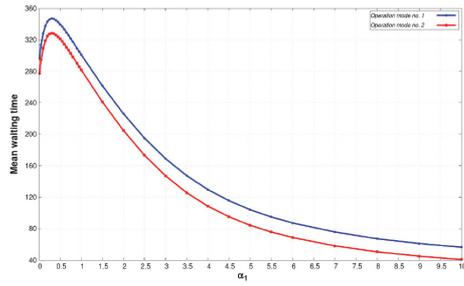

Figure 8.25. Mean waiting time versus shape parameter, $\alpha = \beta = 2$

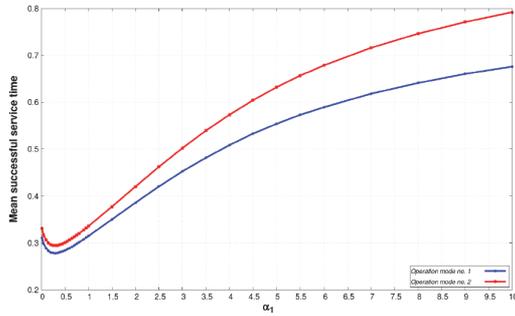

Figure 8.26. Mean successful service time versus shape parameter, $\alpha = \beta = 0.5$

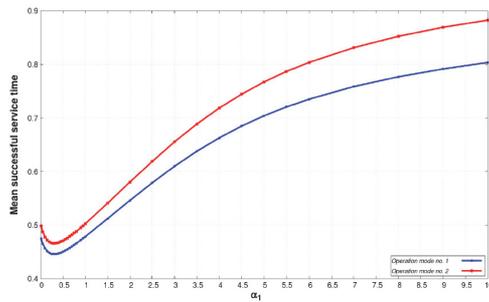

Figure 8.27. Mean successful service time versus shape parameter, $\alpha = \beta = 1$

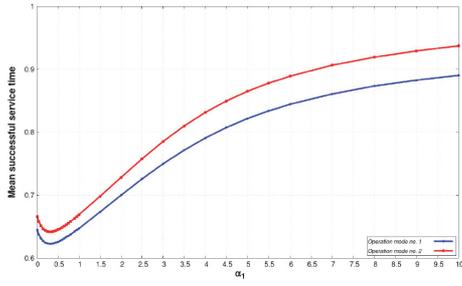

Figure 8.28. Mean successful service time versus shape parameter, $\alpha = \beta = 2$
