<b>Preface by Jean Gayon</b> . . . . .	vii
<b>Introduction by Victor Petit</b> . . . . .	xi
<b>Chapter 1. Philosophy of Biology</b> . . . . .	1
1.1. The philosophy of biology . . . . .	2
1.1.1. Laws in physics and biology . . . . .	2
1.1.2. Life and the living: le vivant . . . . .	13
1.1.3. Function . . . . .	31
1.1.4. Biology and mathematics . . . . .	45
1.2. Philosophers and biology . . . . .	50
1.2.1. Nietzsche . . . . .	50
1.2.2. Bergson . . . . .	54
1.2.3. Piaget . . . . .	56
<b>Chapter 2. Darwin and Darwinism</b> . . . . .	63
2.1. Selection . . . . .	66
2.1.1. The origins of natural selection . . . . .	66
2.1.2. Artificial selection . . . . .	74
2.1.3. Sexual selection . . . . .	80
2.2. Darwin and his times . . . . .	91
2.2.1. From Newton to Darwin . . . . .	91
2.2.2. Malthus and Darwin . . . . .	98
2.2.3. Smith, Darwin and the economists . . . . .	104
2.2.4. Lamarck and Darwin . . . . .	111
2.2.5. Spencer and Darwin . . . . .	123
2.2.6. Wallace and Darwin . . . . .	127
2.3. After Darwin . . . . .	144

2.3.1. Toward the Modern Synthesis . . . . .	144
2.3.2. Variation, selection and adaptation . . . . .	150
2.3.3. Natural selection today. . . . .	160
2.3.4. Circularity of fitness and the logical framework for natural selection . . . . .	164
<b>Chapter 3. Genetics</b> . . . . .	<b>171</b>
3.1. History of genetics. . . . .	173
3.1.1. The origins of the concept of heredity. . . . .	173
3.1.2. From Mendel to Mendelism . . . . .	181
3.1.3. The birth of genetics . . . . .	193
3.1.4. History of genetics in France . . . . .	199
3.2. Philosophy of genetics . . . . .	214
3.2.1. Determinisms and genetics . . . . .	214
3.2.2. Mendelian genes and molecular genes . . . . .	222
3.2.3. Genetic information and the “genetic program” . . . . .	229
3.2.4. The many facets of the gene . . . . .	236
<b>Chapter 4. Biology and Society</b> . . . . .	<b>243</b>
4.1. Science and politics . . . . .	244
4.1.1. Scientific ideology . . . . .	244
4.1.2. Nature and nurture, inheritance and environment: the social stakes. . . . .	249
4.1.3. The birth of eugenics. . . . .	262
4.1.4. A “new eugenics”? . . . . .	270
4.2. The question of human evolution . . . . .	279
4.2.1. The debate over cultural evolution (Lewontin, Wilson, Dawkins) . . . . .	279
4.2.2. Evolution and religion . . . . .	288
4.2.3. On race . . . . .	299
4.2.4. “Homo”. . . . .	304
4.3. Biotechnologies . . . . .	313
4.3.1. Genetic engineering . . . . .	313
4.3.2. The future of medicine and human enhancement . . . . .	320
4.4. The end of a dialog . . . . .	328
<b>Bibliography by Jean Gayon</b> . . . . .	<b>341</b>
<b>Index of Names</b> . . . . .	<b>367</b>
<b>Index of Notions</b> . . . . .	<b>373</b>
