<b>Introduction</b> . . . . .	ix
<b>Chapter 1. Conceptions and Deciding for One's Health</b> . . . . .	1
1.1. "Conception" and "decision": what do they mean? . . . . .	1
1.2. Is educability in health possible? . . . . .	3
1.3. What are the factors of efficacy in prevention at the international level? . . . . .	6
1.4. Why speak of leading practices in health? . . . . .	9
1.5. What are the unwavering links between "research" and "intervention"? . . . . .	15
<b>Chapter 2. Social Representations of Health Conceptions</b> . . . . .	17
2.1. Can we speak of quantitative preponderance? . . . . .	17
2.2. What qualitative studies are available to us at the international scale? . . . . .	20
2.3. Why is there still a paradox in health education? . . . . .	27
2.4. What meaning should be given to the terms used in publications? . . . . .	28
2.4.1. The term "perception" . . . . .	28
2.4.2. The term "belief" . . . . .	29
2.4.3. The term "knowledge" . . . . .	31
2.5. What are the benefits and limits of the notion of social representation in the field of health? . . . . .	35
2.5.1. A notion enclosing health within a "social whole" . . . . .	35
2.5.2. The contested theory of the central core . . . . .	40
2.5.3. Other elements for a critical analysis of the notion of social representation in health. . . . .	42
2.6. What are the preliminaries for a new theorization of conceptions in health? . . . . .	45

---

2.6.1. Why replace the subject in a central position? . . . . .	45
2.6.2. What limits are attributed to the KVP model (knowledge, values, social practices)? . . . . .	48
<b>Chapter 3. A Renewed Theory of Conceptions in Health . . . . .</b>	<b>51</b>
3.1. What are the paradigmatic foundations of health conceptions? . . . . .	51
3.2. Why combine health paradigms? . . . . .	52
3.3. How to avoid the pitfall of simplified thinking? . . . . .	54
3.4. Theorization of conceptions in health . . . . .	56
3.4.1. How to consider the subject from a biopsychosocial point of view? . . . . .	56
3.4.2. What are the seven criteria that characterize conceptions in health? . . . . .	57
<b>Chapter 4. Qualitative Methodologies for the Investigation of Health Conceptions . . . . .</b>	<b>75</b>
4.1. What are the main qualitative methodologies used in international publications? . . . . .	75
4.2. Which biopsychosocial interpretative model of conceptions should we use? . . . . .	77
4.3. How to model the biopsychosocial dimensions of conceptions on addictions? . . . . .	80
4.4. Are there many health conceptions from infancy? . . . . .	86
4.4.1. Domain A: biomedical health. . . . .	89
4.4.2. Domain B: social and environmental influences in prevention . . . . .	90
4.4.3. Domain C: perception of the social and societal environment. . . . .	90
4.4.4. Domain D: mobilization of relational competences and influence on the emotion of social relations . . . . .	91
4.4.5. Domain E: psychoaffective perception of others and the management of emotions . . . . .	91
4.4.6. Domain F: the physiological and psychoaffective consequences of a behavior in health . . . . .	92
4.5. Should we fear what children and adolescents have to tell us? . . . . .	93
4.5.1. What diversity of conceptions? . . . . .	93
4.5.2. How do conceptions of health evolve within a group of children? . . . . .	95
4.6. What are the elements to prioritize for intervening in health? . . . . .	99
4.7. What are the advantages for public health from this approach to health conceptions? . . . . .	100

---

<b>Chapter 5. The Convergence of Research Tools, Interventions and Training</b> . . . . .	103
5.1. How is a tool an inseparable element from human activity? . . . . .	103
5.2. Why is the transferability of “good practices” a fantasy? . . . . .	103
5.3. How to expand the notion of tools in prevention? . . . . .	105
5.3.1. What are the epistemic and epistemological principles of health intervention? . . . . .	105
5.4. Why talk about the tool syndrome in health education and prevention? . . . . .	111
5.5. What is the real process of conception of a prevention tool? . . . . .	112
5.6. How does using photographs enable a reconciliation of research and intervention? . . . . .	114
5.6.1. Methodological overview of the use of photographs . . . . .	115
<b>Chapter 6. Formative Perspectives for More Effective Prevention Actions</b> . . . . .	131
6.1. What are the andragogic foundations for better apprehending the complexity of systems of conceptions? . . . . .	132
6.1.1. On which points of vigilance is it necessary to focus training? . . . . .	132
6.2. In teaching, how can a better apprehension of the complexity of systems of conceptions be developed? . . . . .	136
6.3. What foundations of an explicit pedagogy should teaching follow? . . . . .	140
6.3.1. Why is it imperative to make the implicit explicit? . . . . .	140
6.3.2. What should lessons in health aim for? . . . . .	141
<b>Conclusion</b> . . . . .	145
<b>Appendix</b> . . . . .	149
