Preface	ix
Acronyms	xiii
Introduction	xv
Chapter 1. Theoretical and Pragmatic Basis of Our Context Modeling	1
1.1. Introduction	1
1.2. Theoretical basis	2
1.2.1. Model and representation	2
1.2.2. Concepts used	11
1.2.3. The proposed scientific approach	22
1.3. Projects and applications	28
1.3.1. Introduction	28
1.3.2. The SEPT project (1986–1995)	29
1.3.3. The SART project (1996–2002)	31
1.3.4. The FlexMIm project (2012–2015)	34
1.3.5. The TACTIC project (2013–2015)	35
1.3.6. The ACA project (2005–2009)	38
1.3.7. “Contextualizing scientific workflows” project (2009–2011)	40
1.3.8. The MICO project (2011–2014)	43
1.3.9. The winemaking project (1997–1999)	44
1.3.10. The OSSMOSE project (2009–2011)	46
1.3.11. “Computer-mediated collaborative work” project (1997–1999)	48
1.4. Review of the chapter	50

Chapter 2. Context Modeling for Actor Activity (CxG_1.0)	53
2.1. Introduction	53
2.2. Conceptual level	55
2.2.1. Contextual knowledge and external knowledge	55
2.2.2. Conceptual elements used in the research	57
2.3. Operational level.	63
2.3.1. Operational knowledge and context	63
2.3.2. Contextual elements	68
2.3.3. Mental models and mental representations	69
2.4. Implementation level	71
2.4.1. The CxG_1.0 formalism	71
2.4.2. Modeling tools	72
2.4.3. Exploitation tools	79
2.4.4. Review on the CxG_1.0 formalism	88
2.5. Environment level	89
2.6. Variants of the context modeling.	91
2.6.1. Introduction	91
2.6.2. The COM	92
2.6.3. Parallel with BPEL for workflows	95
2.6.4. Comparison with two other context-based formalisms	98
2.7. Review of the chapter	103
Chapter 3. Context Modeling for Group Activity (CxG_2.0)	109
3.1. Introduction	109
3.2. Conceptual level	110
3.2.1. Introduction	110
3.2.2. Concept of activity for a group	111
3.2.3. The shared context	113
3.2.4. The turn	117
3.2.5. CxG-based simulation	118
3.3. Operational level.	121
3.3.1. Introduction	121
3.3.2. The notions of group activity and interaction.	121
3.3.3. The CxG_2.0 formalism	123
3.4. Implementation level	124
3.4.1. Introduction	124
3.4.2. From actor activity to group activity	124
3.4.3. Reserved contextual elements	125
3.4.4. Mechanisms of the CxG-based simulation	128
3.5. Environment level	136

3.6. Two examples	137
3.6.1. “Submission management” example	137
3.6.2. The TACTIC project	146
3.7. Review of the chapter	152
Chapter 4. The Two Versions of the CxG Formalism	157
4.1. Introduction	157
4.2. The key points of the research	158
4.2.1. Discussion on key concepts of the approach	158
4.2.2. Definition of the context of an activity	166
4.2.3. Contextual reasoning	167
4.2.4. Global and local contexts.	175
4.3. The “Internship-offer analysis” example	186
4.3.1. The actors	186
4.3.2. Conditions of the experiment	187
4.3.3. Development of the experiment	188
4.3.4. Interpretation of the results.	192
4.3.5. Comparison with the “DVD-reader diagnosis” task	199
4.4. CxG formalism for CIAS Design.	204
4.5. Review of the chapter	214
Chapter 5. Use of the CxG Formalism in Different Modeling	221
5.1. Introduction	221
5.2. Breast cancer diagnosis	223
5.3. Hierarchical task analysis (HTA).	229
5.4. The ACA project.	237
5.4.1. Introduction	237
5.4.2. The ACA method	237
5.4.3. Application in road safety	240
5.5. Workflow modeling in an ACP Department	249
5.5.1. The initial work	249
5.5.2. Contextual modeling of the workflow	252
5.5.3. Discussion on context-based modeling of workflow.	257
5.6. Context modeling and semiotics	258
5.7. Review of the chapter	266
Conclusion	271
References.	285
Index.	297
