| Valérie NÈGRE                                                                    |     |
| 4.1. Introduction. . . . .                                                       | 61  |
| 4.2. A new understanding of innovation . . . . .                                 | 65  |
| 4.3. Forms of knowledge based on matter? . . . . .                               | 68  |
| 4.4. Reintroducing techniques into culture . . . . .                             | 70  |
| 4.5. Conclusion . . . . .                                                        | 72  |
| 4.6. References . . . . .                                                        | 73  |
| <br><b>Chapter 5. Concepts of the History of Techniques: Technology.</b> . . . . | 81  |
| Eric SCHATZBERG                                                                  |     |
| 5.1. Introduction: an odd concept. . . . .                                       | 81  |
| 5.2. History of technology or history of techniques? . . . . .                   | 82  |
| 5.3. Roots of the English-language concept of technology: an overview . . . . .  | 87  |
| 5.4. Discourse of the arts from the ancient world to the enlightenment . . . . . | 90  |
| 5.5. Technology fills a semantic void . . . . .                                  | 91  |
| 5.6. Technology triumphant . . . . .                                             | 93  |
| 5.7. References . . . . .                                                        | 94  |
| <br><b>Chapter 6. Industry in the History of Techniques</b> . . . . .            | 97  |
| Guillaume CARNINO                                                                |     |
| 6.1. Introduction. . . . .                                                       | 97  |
| 6.2. Defining industry . . . . .                                                 | 99  |
| 6.3. “Industrial revolution” and industrialization . . . . .                     | 103 |

|                                                                |     |
|----------------------------------------------------------------|-----|
| 6.4. Know-how, grammatization and proletarianization . . . . . | 112 |
| 6.5. References . . . . .                                      | 119 |

## **Chapter 7. From Standards to Commodification (and Back Again): Histories of Technology and Capitalism. . . . . 127**

Joris MERCELIS

|                                                                                   |     |
|-----------------------------------------------------------------------------------|-----|
| 7.1. Introduction. . . . .                                                        | 127 |
| 7.2. Standards and standardization: economic and technological histories. . . . . | 130 |
| 7.3. Standardization and commodification . . . . .                                | 136 |
| 7.4. Conclusion . . . . .                                                         | 139 |
| 7.5. References . . . . .                                                         | 140 |

## **Chapter 8. History of Techniques and the Environment . . . . . 147**

Anaël MARREC

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| 8.1. Introduction. . . . .                                                                                           | 147 |
| 8.2. Environment in the history of techniques (1960s–1990s): natural background, social context, resources . . . . . | 150 |
| 8.2.1. History of techniques through great universal sagas: the environment as a natural backward . . . . .          | 151 |
| 8.2.2. History of companies and social studies: social and economic context, instrumental materiality . . . . .      | 152 |
| 8.2.3. History of engineers, cities and industry: pollution, waste, resources . . . . .                              | 153 |
| 8.3. Environmental history and the history of techniques . . . . .                                                   | 155 |
| 8.3.1. Techniques in American environmental history: from the destruction of nature to hybrids . . . . .             | 155 |
| 8.3.2. An environmental history of technology: “envirotechnical” approaches. . . . .                                 | 156 |
| 8.3.3. An environmental history of techniques? . . . . .                                                             | 158 |
| 8.4. Conclusion . . . . .                                                                                            | 161 |
| 8.5. References . . . . .                                                                                            | 162 |

## **Chapter 9. Techniques and Gender. . . . . 169**

Delphine GARDEY

|                                                       |     |
|-------------------------------------------------------|-----|
| 9.1. Women, machines and progress. . . . .            | 169 |
| 9.2. Tools, appropriation and qualification . . . . . | 170 |

|                                                                                                                                                             |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 9.3. Machinism, techniques and masculinities . . . . .                                                                                                      | 172     |
| 9.4. Technical cultures and women's industries . . . . .                                                                                                    | 173     |
| 9.5. Invent, innovate and undertake . . . . .                                                                                                               | 174     |
| 9.6. Consume, choose and mobilize . . . . .                                                                                                                 | 175     |
| 9.7. Interpret, interact and socialize . . . . .                                                                                                            | 176     |
| 9.8. Scripts, facts and identities. . . . .                                                                                                                 | 177     |
| 9.9. Communication, information technology and digital worlds. . . . .                                                                                      | 178     |
| 9.10. Self-techniques, sex/gender and sexualities . . . . .                                                                                                 | 179     |
| 9.11. Detour, criticism and protest . . . . .                                                                                                               | 180     |
| 9.12. References. . . . .                                                                                                                                   | 181     |
| <br><b>Chapter 10. History of Techniques and Anthropology:</b><br><b>Measure, Means, Mirror . . . . .</b>                                                   | <br>189 |
| Nathan SCHLANGER                                                                                                                                            |         |
