<b>Foreword</b> . . . . .	vii
<b>Preface</b> . . . . .	xi
<b>Notations</b> . . . . .	xv
<b>Chapter 1. The Vertical Distribution of Temperature in the Ocean</b> . . . . .	1
1.1. Introduction . . . . .	2
1.2. Measuring the temperature of ocean waters . . . . .	5
1.2.1. Ordinary thermometers . . . . .	8
1.2.2. Recording thermometers . . . . .	10
1.2.3. Electric thermometer . . . . .	19
1.3. Sources of errors in temperature measurement . . . . .	21
<b>Chapter 2. Global Ocean Circulation</b> . . . . .	33
2.1. Introduction . . . . .	34
2.2. Global ocean circulation . . . . .	38
2.2.1. Geostrophic flow . . . . .	40
2.2.2. Sverdrup relation: transport of planetary vorticity or effect of latitude on flow? . . . . .	52
2.3. Conclusion and summary . . . . .	67
<b>Chapter 3. A Brief Consideration of Thermocline Properties</b> . . . . .	71
3.1. Modeling of the thermocline . . . . .	72
3.1.1. Taking heat exchanges into account. . . . .	72
3.1.2. Setting up boundary conditions . . . . .	82

---

3.2. Assumptions used to solve the thermocline model . . . . .	87
3.2.1. First simplified approaches. . . . .	87
3.2.2. Approach proposed by the authors . . . . .	88
3.2.3. Formulating the equation of state . . . . .	93
3.2.4. Discussion . . . . .	100
3.3. Characteristic properties of the thermocline. . . . .	101
3.3.1. Determining the characteristic scale of the thermocline depth from measurements. . . . .	101
3.3.2. Examples of empirical expressions of $\tilde{\kappa}_{0th}(\theta)^{-1}$ . . . . .	106
3.3.3. Vertical velocity at the base of the thermocline . . . . .	109
3.3.4. Ocean water temperature, measurements and models . . . . .	111
<b>Chapter 4. Effect of the Ocean Mixed Layer (OML) . . . . .</b>	<b>117</b>
4.1. Ocean mixed layer modeling . . . . .	118
4.1.1. Ekman layer . . . . .	124
4.1.2. Consequences of Ekman transport. . . . .	134
4.1.3. Conclusion and summary . . . . .	141
4.2. Coupling between the OML and the geostrophic layer. . . . .	143
4.2.1. Taking the bottom boundary layer into account . . . . .	147
4.2.2. Coupling of Ekman boundary layers with the thermocline . . . . .	158
4.3. Seasonal fluctuations . . . . .	175
4.3.1. Role of the vertical temperature gradient in the OML . . . . .	178
4.3.2. Effect of the Earth's rotation on stratification . . . . .	182
4.4. Role of sea ice . . . . .	187
4.5. Thermohaline circulation . . . . .	192
<b>Conclusion . . . . .</b>	<b>197</b>
<b>References. . . . .</b>	<b>201</b>
<b>Index. . . . .</b>	<b>205</b>
<b>Summary of Volume 1 . . . . .</b>	<b>209</b>
