<b>Foreword</b> . . . . .	x <sup>i</sup>
Michel GRIFFON	
<b>Introduction</b> . . . . .	x <sup>iii</sup>
Ludovic TEMPLE and Eveline M.F.W. COMPAORÉ SAWADOGO	
<b>Chapter 1. Innovation Platforms as a Tool to Support Technological Change in the Agri-Food Sector in Developing Countries: A Case Study of the Plantain Value Chain in Côte d'Ivoire</b> . . . . .	1
Euphrasie C.M. ANGBO-KOUAKOU, Ludovic TEMPLE, Syndhia MATHÉ and Alexandre ASSEMIEN	
1.1. Introduction . . . . .	1
1.2. Technological innovations in the Ivorian plantain sector . . . . .	4
1.2.1. Development of plantain cultivar transfers . . . . .	4
1.2.2. History of the WAAPP plantain program . . . . .	5
1.2.3. Innovation platform features: objectives, composition and governance . . . . .	6
1.3. Conceptual and methodological framework . . . . .	10
1.3.1. SIS: framework for analyzing technological changes based on the strategies of stakeholders in agri-food chains . . . . .	10
1.3.2. Conceptualization of the four components of an AIS . . . . .	11
1.3.3. Methodological and analytical framework . . . . .	13
1.4. Results . . . . .	17
1.4.1. Functionality of Côte d'Ivoire's PIPs . . . . .	17
1.4.2. Reorganization of the AIS components by PIPs . . . . .	17
1.4.3. Redirecting technological trajectories in the plantain sector in Côte d'Ivoire . . . . .	18
1.5. Discussion of the functionalities of the system and IAs . . . . .	20

1.5.1. Functionalities of the agricultural SIS for the plantain sector in Côte d'Ivoire . . . . .	20
1.5.2. IAs and changes . . . . .	21
1.5.3. Renewal of technological innovation processes . . . . .	21
1.6. Conclusion . . . . .	22
1.7. Bibliography . . . . .	23
<b>Chapter 2. Biotechnological Cotton in Burkina Faso: An Innovation Trajectory in a Development Context . . . . .</b>	<b>29</b>
Eveline M.F.W. COMPAORÉ SAWADOGO	
2.1. Introduction . . . . .	29
2.2. The rise of biotechnological cotton within a context of persistent development problems . . . . .	33
2.3. Institutional mechanisms that led to the adoption of biotechnological cotton innovation in Burkina Faso . . . . .	34
2.4. Identification of the actors and their place in the Bt innovation trajectory . . . . .	35
2.4.1. Cotton producers . . . . .	35
2.4.2. Cotton industries . . . . .	36
2.4.3. Cotton researchers . . . . .	36
2.4.4. Civil society . . . . .	37
2.4.5. The government of Burkina Faso . . . . .	37
2.5. Stabilization of the Bt cotton adoption process . . . . .	42
2.6. Discussion and conclusion on the failure of Bt cotton in Burkina Faso . . . . .	43
2.7. Bibliography . . . . .	45
<b>Chapter 3. Emergence of a Biofuel Innovation System and Production in Burkina Faso: An Analysis of the Determinants and Challenges for its Development . . . . .</b>	<b>51</b>
Salif DERRA and Ludovic TEMPLE	
3.1. Introduction . . . . .	51
3.2. Methodology . . . . .	52
3.2.1. Analytical framework . . . . .	52
3.2.2. Data collection . . . . .	55
3.3. Defining the biofuel innovation and production system. . . . .	56
3.4. Incentives for the emergence of the actor system . . . . .	58
3.4.1. Biofuel support policies . . . . .	58
3.4.2. Increased funding for biofuels research . . . . .	59
3.4.3. Financing of biofuel production projects . . . . .	60
3.5. Functional analysis of the biofuel innovation and production system. . . . .	60
3.5.1. Creation of a platform for capacity-building . . . . .	60

3.5.2. Functioning of the biofuels sector in Burkina Faso . . . . .	61
3.5.3. Biofuel development models . . . . .	62
3.6. The failures of the biofuel innovation and production system . . . . .	63
3.6.1. Insufficient knowledge on the consequences of technological choices . . . . .	63
3.6.2. Poor interaction within the actor network. . . . .	64
3.6.3. Lack of regulatory frameworks and standards . . . . .	64
3.6.4. Apprehension from national and international civil society . . . . .	65
3.7. Conclusion . . . . .	65
3.8. Bibliography . . . . .	66
<b>Chapter 4. Trajectories of Innovation in Conservation Agriculture at Lake Alaotra in Madagascar . . . . .</b>	<b>71</b>
Eric PENOT, Valentin FEVRE and Patricia FLODROPS	
4.1. Introduction. . . . .	71
4.2. The problem . . . . .	73
4.3. Methodology . . . . .	75
4.4. Status report on the adoption of CA in 2013 . . . . .	76
4.5. Developments in farming practices and innovations in CA. . . . .	79
4.6. A wide variety of growing systems among the early adopters . . . . .	80
4.7. Learning, innovation co-design and IS. . . . .	82
4.7.1. Learning and recombination of knowledge. . . . .	82
4.7.2. Empirical example of an evolution towards co-construction of systems . . . . .	82
4.7.3. Toward innovation comanagement . . . . .	83
4.8. Contrasting behaviors after project shutdown. . . . .	84
4.9. Conclusion . . . . .	87
4.10. Bibliography . . . . .	91
<b>Chapter 5. Ecological Transition of an Innovation Model: Yam Seed Production in Haiti . . . . .</b>	<b>95</b>
James BOYER and Ludovic TEMPLE	
5.1. Introduction. . . . .	95
5.2. Conceptual and methodological frameworks . . . . .	97
5.2.1. Yam production in Haiti . . . . .	97
5.2.2. Methodology and data collection. . . . .	97
5.2.3. A three-phase mechanism for collecting data and validating results . . . . .	98
5.3. The diffusionist attempt to transfer Miniset technology in Haiti. . . . .	100
5.3.1. Emergence of the Miniset technique in Haiti. . . . .	100
5.3.2. Orientation based on external research and exogenous elements . . . . .	100
5.3.3. The diffusionist model's failed attempt at adapting. . . . .	102

5.3.4. Co-constructing adoption: adapting the technology to green the process . . . . .	104
5.4. From adoption results to the socioeconomic impacts of Miniset. . . . .	107
5.4.1. Evolution of the adoption rate . . . . .	107
5.4.2. Impact on production. . . . .	107
5.5. Discussion of the conditions for changing an innovation model. . . . .	109
5.5.1. Miniset: the failure of linear and diffusionist innovation models . .	109
5.5.2. Miniset: a positive contribution to agro-ecological innovation . .	110
5.5.3. Miniset: a reaffirmation of the importance of action research. . .	111
5.6. Conclusion . . . . .	111
5.7. Appendix: characteristics of surveyed areas . . . . .	113
5.8. Bibliography . . . . .	115
<b>Chapter 6. Diversity of Innovation Processes in the Niayes Market Gardening System (Senegal): Between Conventional Intensification and Agro-Ecological Transition . . . . .</b>	117
Patrick DUGUÉ, Isabelle MICHEL, Victor KETTELA and Serge SIMON	
6.1. Introduction . . . . .	117
6.2. Theoretical position . . . . .	119
6.3. Methodology . . . . .	120
6.3.1. Context . . . . .	120
6.3.2. Combination of methods . . . . .	122
6.4. Results: diversity of technical innovation processes . . . . .	124
6.4.1. Adoption and adaptation of an innovation from large capital-intensive farms: drip irrigation and electric pumping . . . . .	124
6.4.2. An innovation process led by a development operator: the use of biopesticides and organic manure . . . . .	125
6.4.3. Poorly visible innovations carried forward by market gardeners . .	128
6.5. Discussion . . . . .	131
6.5.1. Recognizing the innovation capacities of farmers . . . . .	131
6.5.2. Why should agronomists be interested in farming innovation? . .	132
6.5.3. How to support innovation processes? . . . . .	135
6.6. Conclusion . . . . .	136
6.7. Bibliography . . . . .	137
<b>Chapter 7. Food Challenges in Africa . . . . .</b>	141
Jean-Marc BOUSSARD	
7.1. Food challenge in Africa . . . . .	141
7.2. How to improve the food production capacity of sub-Saharan Africa .	143
7.3. Difficulty in raising capital. . . . .	145
7.4. Agricultural prices south of the Sahara . . . . .	149

7.5. Reasons for agricultural price volatility in Africa . . . . .	152
7.6. The “endogenous” causes of price instability . . . . .	155
7.7. Conclusion and implications for agricultural policies . . . . .	159
7.7.1. Improving infrastructure . . . . .	160
7.7.2. Input subsidies . . . . .	161
7.7.3. Price stabilization . . . . .	163
7.8. Bibliography . . . . .	165
<b>List of Authors</b> . . . . .	167
<b>Index</b> . . . . .	169
