<b>Preface . . . . .</b>	<b>xi</b>
<b>Chapter 1. Simulation . . . . .</b>	<b>1</b>
1.1. Introduction . . . . .	1
1.2. Advantages of simulation . . . . .	2
1.2.1. Compressed time experimentation . . . . .	2
1.2.2. Reduced analytical requirements . . . . .	3
1.2.3. Easy to demonstrate models . . . . .	3
1.3. Disadvantages of simulation . . . . .	3
1.4. Concepts relating to simulation. . . . .	4
1.4.1. System concept . . . . .	4
1.4.2. Model and modeling . . . . .	5
1.5. Components of a simulation model . . . . .	6
1.5.1. Entities . . . . .	6
1.5.2. Attributes . . . . .	7
1.5.3. Variables. . . . .	7
1.5.4. Resources . . . . .	8
1.5.5. Waiting queues . . . . .	8
1.5.6. Statistical accumulators and performance measures . . . . .	10
1.5.7. Event, activity and process. . . . .	12
1.6. Basic principles of system representation . . . . .	13
1.6.1. Standard flowchart symbols . . . . .	13
1.6.2. Flowchart example . . . . .	15
1.7. Manual simulation. . . . .	16
1.7.1. Calculation of average total time . . . . .	19
1.7.2. Calculation of average waiting time. . . . .	19
1.7.3. Calculation of average resource utilization . . . . .	20

<b>Chapter 2. Simulation Project</b>	23
2.1. The stages of a simulation project	23
2.2. Problem formulation	24
2.3. Setting objectives	24
2.4. Construction of the conceptual model	24
2.5. Data collection and analysis	25
2.6. Software coding	25
2.7. Verification	25
2.8. Validation	26
2.8.1. Sensitivity analysis	26
2.8.2. Extreme condition testing	26
2.8.3. Validation by hypothesis testing	27
2.8.4. Validation by confidence interval	27
2.9. Design of an experimental framework	28
2.10. Running the simulation and analyzing the results	28
<b>Chapter 3. Data Processing</b>	31
3.1. Introduction	31
3.2. Collecting input data	32
3.2.1. Mode and units of time collection	32
3.2.2. Deterministic and probabilistic data	32
3.2.3. Discrete and continuous data	34
3.3. Fitting a probability distribution to the variable	34
3.3.1. Choosing a distribution	35
3.3.2. Estimation of the parameters of the chosen distribution	35
3.3.3. Test of adequacy of the chosen distribution to the data	43
<b>Chapter 4. Results Analysis</b>	47
4.1. Introduction	47
4.2. Determining the number of replications for a terminating system	48
4.2.1. Absolute precision	49
4.2.2. Relative precision	49
4.2.3. Example	49
4.3. Determining the number of replications for a non-terminating system	51
4.3.1. Determination of steady state	51
4.3.2. Long simulation	53
4.4. Statistical analysis of results	54
4.4.1. Simple comparison between two simulation models	54
4.4.2. Comparison of three or more simulation models	58

---

<b>Chapter 5. Presentation of Arena Software . . . . .</b>	71
5.1. Introduction . . . . .	71
5.2. Arena software user interface. . . . .	72
5.3. The “basic process” panel. . . . .	73
5.3.1. Flowchart modules . . . . .	73
5.3.2. Data modules . . . . .	80
5.4. The “advanced process” panel . . . . .	82
5.4.1. Flowchart modules . . . . .	82
5.4.2. Data modules . . . . .	87
5.5. The “advanced transfer” panel . . . . .	89
5.5.1. General flowchart modules. . . . .	89
5.5.2. Flow conveyor modules . . . . .	91
5.5.3. Flow transport modules. . . . .	93
5.5.4. Data modules . . . . .	98
<b>Chapter 6. Simulation Modeling . . . . .</b>	101
6.1. Introduction to using Arena software . . . . .	101
6.1.1. Description and data . . . . .	101
6.1.2. Manual simulation . . . . .	102
6.1.3. Simulation with Arena software. . . . .	103
6.1.4. Comparison between results . . . . .	105
6.2. Collection and analysis of results (transitional period detection) . . . . .	106
6.2.1. Description and data . . . . .	106
6.2.2. Simulation model . . . . .	108
6.2.3. Elimination of the transitional period . . . . .	110
6.3. Resource failure . . . . .	118
6.3.1. Description and data . . . . .	118
6.3.2. Simulation model . . . . .	119
6.3.3. Replications . . . . .	119
6.3.4. Graphs . . . . .	121
6.3.5. Breakdowns . . . . .	122
6.4. Entities transfer (PickStation). . . . .	124
6.4.1. Description and data . . . . .	124
6.4.2. Simulation model . . . . .	125
6.4.3. Choice of operation (formatting) . . . . .	127
6.4.4. New product (tablet) . . . . .	128
6.5. Queue (Hold, Batch and Match) . . . . .	132
6.5.1. Description and data . . . . .	132
6.5.2. Simulation model (Hold). . . . .	133
6.5.3. Quality control and packaging (Batch) . . . . .	136
6.5.4. Packaging and boxes (Match) . . . . .	138

---

6.6. Resource group, schedule and record results (Set, Schedule, Record) . . . . .	141
6.6.1. Description and data . . . . .	141
6.6.2. Simulation model . . . . .	142
6.6.3. Resource augmentation (set) . . . . .	144
6.7. Supply chain (Request, Transport and Free) . . . . .	148
6.7.1. Description and data . . . . .	148
6.7.2. Simulation model . . . . .	149
6.7.3. Everyone has their own truck . . . . .	152
<b>Chapter 7. Simulation within the Manufacturing Sector</b> . . . . .	157
7.1. Study of a television assembly line. . . . .	157
7.1.1. Objective. . . . .	158
7.1.2. Setting up the TV assembly line. . . . .	158
7.1.3. Collection of data . . . . .	159
7.1.4. Simulation model . . . . .	169
7.1.5. Verification of the simulation model . . . . .	173
7.1.6. Validation of the simulation model . . . . .	174
7.1.7. Experimentation and analysis of results. . . . .	178
7.1.8. Conclusion. . . . .	183
7.2. Simulation-based optimization of a flexible manufacturing system . . . . .	184
7.2.1. Objective. . . . .	184
7.2.2. The FMS studied . . . . .	184
7.2.3. Simulation models . . . . .	187
7.2.4. Verification of the simulation model . . . . .	199
7.2.5. Validation of the simulation model . . . . .	199
7.2.6. Experimentation and analysis of results. . . . .	202
7.2.7. Conclusion. . . . .	204
<b>Chapter 8. Simulation within the Health Sector: Study of a Covid-19 Mass Vaccination Center</b> . . . . .	205
8.1. Introduction . . . . .	205
8.2. Objective . . . . .	206
8.3. Description of the vaccination center . . . . .	206
8.4. Conceptual models of the vaccination center . . . . .	207
8.4.1. Actual model . . . . .	207
8.4.2. Proposed model . . . . .	209
8.5. Data collection and analysis of service times . . . . .	210
8.6. Arrival rate of citizens at the center . . . . .	211
8.7. Coding the simulation model . . . . .	212
8.7.1. Actual model . . . . .	212

---

8.7.2. Proposed vaccination center . . . . .	216
8.8. Verification of simulation models . . . . .	217
8.9. Validation of the simulation model of the real center. . . . .	217
8.9.1. Simulation replication length . . . . .	217
8.9.2. Calculating the number of simulation replications. . . . .	218
8.9.3. Validation . . . . .	219
8.10. Experimentation and analysis of results . . . . .	222
8.10.1. Performance indicators . . . . .	222
8.10.2. Analysis of simulation results . . . . .	222
8.11. Discussion and conclusion. . . . .	238
8.11.1. Center response to arrival variability . . . . .	238
8.11.2. Comparison of the results of the two vaccination center models. . . . .	238
8.11.3. Conclusion . . . . .	239
<b>Chapter 9. Simulation in Supply Chains: Optimizing CO<sub>2</sub> Emissions Through Pooling Strategies . . . . .</b>	<b>241</b>
9.1. Introduction . . . . .	241
9.2. Pooling strategy . . . . .	242
9.2.1. Multi-pick pooling strategy (pick-up round) . . . . .	242
9.2.2. Multi-drop pooling strategy (distribution tour) . . . . .	242
9.2.3. Pooling strategy with pooled hub . . . . .	243
9.3. Objective . . . . .	244
9.4. Description of the channel studied . . . . .	244
9.5. Formulation of the CO <sub>2</sub> emissions indicator. . . . .	245
9.6. Conceptual models. . . . .	246
9.6.1. Non-pooled supply chain. . . . .	246
9.6.2. Pooled supply chain with multi-pick strategy . . . . .	247
9.6.3. Pooled supply chain with multi-drop strategy . . . . .	248
9.6.4. Pooled supply chain with hub . . . . .	248
9.7. Simulation models. . . . .	249
9.7.1. Non-pooled supply chain model. . . . .	249
9.7.2. Pooled supply chain model with multi-pick strategy . . . . .	254
9.7.3. Pooled supply chain model with multi-drop strategy . . . . .	258
9.7.4. Pooled supply chain model with hub . . . . .	260
9.8. Verification and validation of simulation models. . . . .	263
9.9. Results and discussion. . . . .	266
9.10. Conclusion . . . . .	268

<b>Appendices</b>	269
<b>Appendix 1. Table of <math>\chi^2</math></b>	271
<b>Appendix 2. Table of F for <math>\alpha = 0.05</math></b>	273
<b>Appendix 3. Duncan Multiplier Table for <math>\alpha = 0.05</math></b>	275
<b>Appendix 4. UTIL (in %)</b>	277
<b>References</b>	281
<b>Index</b>	283
