Foreword	ix
Acknowledgements	xiii
Introduction	xv
Chapter 1. Open Innovation, or Collaborative Innovation, Between Clients and Suppliers	1
1.1. Managing client–supplier interactions in Open Innovation	3
1.1.1. Sourcing Open Innovation selecting a partner and choosing the time of their involvement	4
1.1.2. Configuring the relationship for the innovation project	9
1.1.3. Internally managing the supplier’s involvement in the project	13
1.1.4. The pivotal role of Purchasing in Open Innovation	15
1.2. The dynamics of client–supplier cooperation in innovation	18
1.2.1. The effects of the experiment on the client–supplier relationship	20
1.2.2. The evolution of inter-firm relationships	22
1.2.3. The evolution of the relationship environment over time	27
1.2.4. In conclusion, interpretation is needed for reading the dynamics of Open Innovation	28
Chapter 2. Conditions and Impacts of Client–Supplier Open Innovation Governance	29
2.1. A benchmark: the performance of the relationship	31
2.1.1. What is performance?	31

2.1.2. Three levels of performance measured in client–supplier Open Innovation relationships in France	33
2.2. Governance of the relationship, elements, forms and influence on performance.	35
2.2.1. What elements constitute the governance of client–supplier Open Innovation and how do they influence performance?	35
2.2.2. The governance of Open Innovation: a complex blend.	48
2.3. The atmosphere of the relationship, elements, forms and influence on governance and performance.	55
2.3.1. What are the components of the atmosphere of an inter-firm relationship, and how are they related to performance and governance?	55
2.3.2. The four atmospheres of client–supplier Open Innovation and their performance	63
2.3.3. Which atmospheres correspond to which type of Open Innovation governance?	67
2.4. The innovation project and its influence on governance	70
2.4.1. Innovation maturation and the evolution of governance	70
2.4.2. Which type of governances corresponds to which stages of maturity?	72
2.5. Forms of governance to be favored according to the atmosphere of the relationship and the maturity of the innovation project	73
Chapter 3. The Dynamics of Client–supplier Innovation Interactions – History and Analysis of a Collaboration	79
3.1. The context of the collaboration.	80
3.1.1. DELCAR: an automotive equipment division	80
3.1.2. The Innovation Project at the heart of the relationship: the DELTA project.	82
3.2. History of a client–supplier innovation collaboration	87
3.2.1. Engaging the relationship	87
3.2.2. Exploring the possibilities.	93
3.2.3. A “false start”	109
3.2.4. Exploring a potential collaboration	112
3.2.5. Passed gate opening the door to collaboration	133
3.2.6. The negotiation of an agreement	138
3.2.7. Launch of the DELTA collaboration	151
3.2.8. An urgent delay	157
3.2.9. A line, not so straight, until delivery.	173
3.2.10. Attainment of the collaboration.	188

3.3. Feedback on the collaboration – the contribution of the relational approach to the “life cycle” and “teleological” approaches to the dynamics of inter-firm cooperation	195
3.3.1. A model for reading the dynamics	195
3.3.2. The trust–control link in Open Innovation	199
3.3.3. Learning and exchanges in real life	201
3.3.4. Sources and dynamics of the performance	203
Conclusion	207
