Introduction. The Mobile Individual or the Progressive Complexification of an Analytical Model	xi
Thomas BUHLER	
List of Figures	xix
List of Tables	xxi
Part 1. The Mobile Individual and Daily Time	1
Chapter 1. Mobility and Everyday Life	3
Vincent KAUFMANN	
1.1. Introduction.	3
1.2. The diversity of spatio-temporalities in everyday life	3
1.3. Three facets of mobility	6
1.3.1. Mobility as a socio-spatial phenomenon	6
1.3.2. Mobility as an analytical indicator.	8
1.3.3. Mobility as a social norm	10
1.4. The valorization of reversibility: an organizing principle of everyday life?	12
1.5. References	13
Chapter 2. Time Experienced in Everyday Mobility: Perceptions, Uses and Values	17
Thomas BUHLER	
2.1. Introduction.	17
2.2. Research gradually becoming interested in the time spent on everyday travel	18
2.2.1. From the 19th century to the 1970s: a focus on flows	18

2.2.2. From the 1970s to the 1990s: “wasted” time that we try to reduce.	19
2.2.3. Since the 2000s: “shorter” is not always “better”	22
2.3. Perception of travel times: principle of general relativity	23
2.4. Travel and its uses: a busy time	24
2.4.1. Activities performed on public transport	24
2.4.2. Practices associated with driving in the city	28
2.4.3. “Secondary tasks” on a bicycle.	29
2.4.4. Appropriating our time: a matter of know-how	30
2.4.5. The smartphone, or questioning the specificity of travel time	31
2.5. Values at stake	31
2.5.1. A contested “value” of time.	31
2.5.2. What if we “temporalized” money?	34
2.6. Conclusions.	36
2.7. References	37
 Chapter 3. Mobility and Daytime Population in Geographical Space	 43
Hadrien COMMENGES and Julie VALLÉE	
3.1. Introduction.	43
3.2. Estimating the daytime population	45
3.2.1. Brief state of the art	45
3.2.2. Methods	46
3.2.3. Issues and applications.	47
3.3. Characterizing the social composition of daytime populations	48
3.3.1. Brief state of the art	48
3.3.2. Methods	49
3.3.3. Issues and applications.	55
3.4. Defining the exposure of individuals based on places and times of presence.	56
3.4.1. Brief state of the art	56
3.4.2. Methods	57
3.4.3. Issues and applications.	58
3.5. Conclusion	59
3.6. References	59

Part 2. Mobile Socializations, or the Effects of the Long Term	65
Chapter 4. Mobility Trajectories and Biographies: A Valuable Hybridization	67
Philippe GERBER	
4.1. Introduction.	67
4.2. From life course to changes in daily mobility.	69
4.2.1. The need for a longitudinal approach	69
4.2.2. Temporalities and events to be grasped in the evolution of mobility behaviors	71
4.2.3. Ambivalence and multidimensionality	74
4.3. Evolution of mobility and other areas of the life course.	76
4.4. Towards a planning tool? Aggregate or individual-centered approaches to mobility biographies	78
4.5. Conclusion	80
4.6. References	82
Chapter 5. Gendered Cycling Socializations of Future Mobile Adults	89
David SAYAGH	
5.1. Introduction.	89
5.2. A process in action from a very young age	91
5.2.1. Gendered parental injunctions	91
5.2.2. Gendered injunctions in the school environment	92
5.2.3. Gendered injunctions in the media.	92
5.2.4. Gendered injunctions of toys and bicycles	93
5.3. A process reinforced during adolescence	94
5.3.1. Gendered socialization to bodily aesthetics	94
5.3.2. Gendered socialization to risk	95
5.3.3. Gendered socialization to (and through) physical activities	96
5.3.4. Gendered socialization to (and through) the street	98
5.4. A process to be analyzed intersectionally and contextually.	99
5.4.1. A gender divide reinforced in working-class areas and in areas with few cyclists	99
5.4.2. A less marked gender divide in environments with higher levels of cultural capital	101
5.4.3. Individual, plural, variable, and often contradictory injunctions to be contextualized	102
5.5. Conclusion	103
5.6. References	104

Chapter 6. Cycling in the City: Situated Practices and Unequal Policies	113
Matthieu ADAM	
6.1. Introduction.	113
6.1.1. Environment, health, economy: when cycling returns to the city	114
6.1.2. An unequal redevelopment	116
6.1.3. At the origin of inequalities, planning and socialization	117
6.2. When cycling returns to the city	119
6.2.1. In the name of sustainable development, the bike-friendly city	119
6.2.2. The actors in the bike-friendly city	120
6.2.3. Cycling in the city as an object of research.	122
6.3. Cycling mobility and socio-spatial inequalities.	123
6.3.1. Socio-spatial inequalities in access to cycling	123
6.3.2. Mobility policies, a social issue	126
6.4. Towards new research on cycling in the city	127
6.4.1. Interweaving urban studies with research on everyday mobility	127
6.4.2. Cycling in the city, at the intersection of global injunction and territorialized practices	130
6.4.3. Viewing all urban cyclists, reviewing qualifications of mobile practices	131
6.5. Conclusion	133
6.6. References	134
 Part 3. Mobile Subjectivities: Representations and Effects of Habits	143
 Chapter 7. Modal Choice and Representations of Transport Modes	145
Florian MASSE and Samuel CARPENTIER-POSTEL	
7.1. Introduction.	145
7.2. Stages of modal choice analysis.	146
7.2.1. Behaviors as an expression of processes of rational choice	146
7.2.2. Behaviors as an expression of attitudes	147
7.2.3. Behaviors as an expression of social representations	150
7.3. Application to the choice of modes for leisure mobility.	151
7.3.1. Method for collecting representations of modes of transport	151

7.3.2. Influence of representations on modal choice during leisure mobility.	154
7.4. Conclusion	160
7.5. References	162

Chapter 8. Not Just a Detail: Modal Habit as Central to Everyday Mobility 167

Julia-Pearl AVELINE and Thomas BUHLER

8.1. Which “habit” are we talking about?	170
8.1.1. Clarifications for rejecting a misleading common definition	170
8.1.2. Distinguishing habit from its false synonyms	171
8.1.3. Habit is not the negation of choice (either).	173
8.1.4. Habit, the combination of two schemas	174
8.2. Why the interest in habits when studying everyday mobility?	176
8.2.1. Habit, a force of resistance to change	177
8.2.2. Habit, or the know-how of everyday mobility	180
8.3. How to measure the force of a modal habit	181
8.4. The driving habit at the center of attention	183
8.4.1. The driving habit, target of many public policies	183
8.4.2. When driving a car is more habitual than walking	184
8.4.3. A habit that tends to be exclusive at the individual level.	185
8.4.4. A habit that cannot be explained solely by territorial inequalities	186
8.4.5. A habit that resists change... except in the presence of life events	187
8.5. Research conclusions and operational conclusions	191
8.6. References	193

Chapter 9. Responsive Adaptations to Traffic Congestion: A Matter of Habit? 199

Thomas BUHLER and Gaële LESTEVEN

9.1. Introduction.	199
9.2. A simulation game to collect drivers’ adaptations to congestion	202
9.2.1. Scenarios and possible responses	203
9.2.2. Presentation of the area of study and the sample	204
9.3. Results.	206
9.3.1. Dominant marginal adjustments correlated with force of driving habit	206
9.3.2. Explanatory variables for marginal adjustments.	208

9.4. Discussion	211
9.4.1. Habit as a conservative force	211
9.4.2. The differentiated effects of congestion.	211
9.5. Conclusion	212
9.6. References	213
 Conclusions. Three Avenues for Increased Convergence of Analytical Models	 217
