Foreword by Norbert Nabet : The Challenges of Altering Frontiers: For Other More Collaborative Approaches xvii
Norbert NABET

Introduction: The Challenges of "Altering Frontiers": The Multiple Facets of Boundaries to Cross and Articulate xxi
Corinne GRENIER and Ewan OIRY

Part 1. Innovations as Seen by Stakeholders 1

Introduction to Part 1 3

Chapter 1. Recognition of Patients' Experiential Knowledge and Co-production of Care Knowledge with Patients and Citizens in the 21st Century 7
Luigi FLORA

1.1. Introduction. 7
1.2. From "empowerment" to the "patient revolution", an international trend. 8

1.3. From paternalism to different forms of participation and partnership with patients . . . 14
1.4. Innovative practices . . . 14
1.5. Conclusion . . . 25
1.6. References . . . 26

Chapter 2. Innovative Organizations and Professional Strategies: The Nursing Professional Space . . . 29

Philippe MOSSÉ

2.1. Introduction: experimenting experimentation . . . 29
2.2. Participatory evidence-based policy: a new conceptual framework? . . . 31
2.3. Article 51: a full-scale test . . . 34
2.3.1. Experimenting for recognition . . . 34
2.3.2. An expression of interest . . . 36
2.4. The nursing space: a controlled extension . . . 38
2.4.1. Asalée: a fragile experiment . . . 39
2.4.2. The nurse in advanced practice: spearhead or first in line . . . 41
2.5. Conclusion: new ways of doing things . . . 46
2.6. Appendix: examples of emancipatory innovations in the 1990s . . . 47
2.6.1. Nursing specialization versus the place of the manager . . . 47
2.6.2. Stubborn labor relations . . . 48
2.7. References . . . 48

Chapter 3. Managed Communities of Practice in the Gerontology Sector: Case of a CoP of Gerontology Volunteers in Sweden . . . 51

Bertrand PAUGET

3.1. Introduction . . . 51
3.2. Context and questions . . . 52
3.3. Conceptual framework . . . 53
3.3.1. Volunteering . . . 53
3.3.2. Communities of practice . . . 53
3.3.3. Managed communities of practice . . . 54
3.3.4. The interpretative framework of a piloted community of practice . . . 55
3.4. Illustrations . . . 55
3.4.1. The Swedish context . . . 55
3.4.2. A community of practice piloted in the field of gerontology . . . 56
3.5. Conclusion . . . 58
3.6. References . . . 59

Part 2. Innovations on the Collective Side 61

Introduction to Part 2 63

Chapter 4. Moving from Partitioning to Transversality in Operating Rooms using Robot-assisted Surgery 67
Delphine WANNENMACHER

4.1. Introduction 67
4.2. The context of operating rooms mobilizing the surgical robot 68
4.3. The issue of technical and non-technical skills in the context of robotic surgery 69
4.4. The effects of new technologies in terms of individual and collective skills 70
4.5. Viewing at the heart of robot-assisted surgery in urology 71
4.5.1. A pragmatic approach to analyzing the activity of an operating theater 71
4.5.2. A configuration of the operating room and an installation of the patient constrained by the surgical robot 72
4.5.3. A spatiotemporal separation and limited communication between team members 74
4.5.4. The impoverishment and disarticulation of individual and collective skills in the operating room, mobilizing the surgical robot . . . 75
4.6. Discussion 77
4.7. References 79

Chapter 5. Clinical Poles of Activity, an Opportunity for New Cooperation Between the Actors? The Case of a Hospital 81
Christelle HAVARD

5.1. Key elements and objectives of polar reform 82
5.2. Improving cooperation and better articulating the logics present in the hospital: challenges and theoretical identification 83
5.3. Context and methodology of the study 86
5.4. Modalities of cooperation permitted by the establishment of the clinical poles 86
5.4.1. The articulation actors 86
5.4.2. Tools supporting articulation work 88
5.4.3. The instances of exchange and articulation 90
5.5. Conditions for the use of articulations 92
5.6. Cooperation in a polar structure, some research avenues 94
5.7. References 96

Chapter 6. Learning from Reforms Aiming to Disseminate Innovative Organizational Models: The Case of Family Medicine Groups in Quebec 99

Frédéric GILBERT

6.1. Introduction 99
6.2. Conceptual framework 100
6.2.1. The impact of intervention precision on the ability to learn 100
6.2.2. The impact of evaluations on learning capacities 101
6.3. Illustration of the analytical framework: the reflexive processes related to the implantation of family medicine groups in Quebec. 103
6.3.1. Method and context of the study 103
6.3.2. Results of the analysis 104
6.4. Discussion 108
6.4.1. A brief overview of intervention theory. 108
6.4.2. Evaluations that support rather than question 108
6.4.3. Evaluations that are not well integrated into the GFM policy 110
6.4.4. Improvements to increase learning potential in primary care reforms 110
6.5. Conclusion 110
6.6. References 111

Chapter 7. Variety and Performance of Innovative Organizational Structures: The Emergence of Territorial Support Platforms 115

Matthieu SIBÉ, Sandrine CUEILLE and Tamara ROBERTS

7.1. Introduction 115
7.2. Context of the study 118
7.2.1. Organizational forms for the care and support to complex patients: an overview of the literature 118
7.2.2. Territorial support platforms: a new organizational arrangement in the French healthcare system 119
7.2.3. Context of the study, expected empirical observations on organizational forms and performance of PTAs. 120
7.3. Conceptual framework 122
7.3.1. Analytical framework and concepts from structural contingency theory 122
7.3.2. The adhocratic structural configuration: an innovative organizational form to carry out complex tasks in dynamic environments 123

7.4. Empirical analysis 125
7.4.1. Analysis of contingency factors (situational elements) and expected organizational form of PTAs. 125
7.4.2. Organizational congruence and PTAs performance. 133
7.5. Conclusion 136
7.6. Acknowledgments. 137
7.7. References 137

Part 3. Reflective Insights on Organizational Innovations in Healthcare 141

Introduction to Part 3. 143

Chapter 8. Proposals for New Approaches to Contributory Evaluation of Healthcare Pathways from Interface Organizations 147
Jessica GHELLER, Christian BOURRET and Gérard MICK

8.1. Introduction. 147
8.2. Context and research questions 148
8.2.1. Background 148
8.2.2. Positioning for the method 150
8.2.3. Methodology 151
8.3. Framework for analyzing the processes of diffusion of organizational innovations: definition and principles (conceptual framework) 152
8.4. Empirical illustrations of the innovation diffusion processes supported by coordination platforms. 153
8.4.1. A community of "expert" stakeholders, resulting from dynamic processes of territorial construction 154
8.4.2. Territory of practices as a framework for the intelligibility of processes for disseminating organizational innovations 156
8.4.3. Learning process 158
8.4.4. Process of building collective standards 161
8.5. Conclusion 165
8.5.1. Lessons. 165
8.5.2. Perspectives 166
8.6. Acknowledgments. 167
8.7. References 167

Chapter 9. Innovation and Absorptive Capacity of Organizations in the Healthcare Field 169
Corinne GRENIER and Christine DUTRIEUX

9.1. Introduction: absorbing to innovate. 169
9.2. Context and questions: the challenge of openness 170
9.3. Theoretical framework: the notion of organizational absorption capacity 172
9.4. Responses to the three OAC pitfalls: illustrations 175
9.4.1. Entering the absorption process 175
9.4.2. The quality of what is absorbed 177
9.4.3. The transition from potential to realized 180
9.5. Conclusion 183
9.6. References 184

Chapter 10. Quality Management in Hospitals: The Two Faces of Rationalization Through Indicators 187
Hugo BERTILLOT

10.1. Introduction: are quality indicators a managerial innovation? 187
10.2. Context and issues 188
10.2.1. An institutional response in the context of a confidence crisis. . . 188
10.2.2. From cautious indicators to equivocal uses 189
10.3. Management tools and organizational rationalization dynamics 190
10.3.1. What rationalization of professional organizations?. 190
10.3.2. Investigating rationalization induced by quality indicators. 191
10.4. A dynamic of professional rationalization? 192
10.4.1. Standardization of professional practices 192
10.4.2. Traceability of hospital activities 193
10.4.3. The local rooting of evidence-based medicine 195
10.5. A dynamic of managerial rationalization? 197
10.5.1. Control and competition 197
10.5.2. Rationalization and bureaucratization 199
10.5.3. A certain disenchantment with the hospital world 200
10.6. Conclusion: rationalizing through indicators to rationalize "softly" 202
10.7. References. 203
