Preface	xiii
Gilles N’GOALA, Florence PAULHIAC SCHERRER and Fabien DURIF	
 Introduction. Smart City: Lives in Transition	xv
Gilles N’GOALA, Florence PAULHIAC SCHERRER and Fabien DURIF	
 Part 1. The Smart City: What Transitions?	1
 Introduction to Part 1.	3
Florence PAULHIAC SCHERRER	
 Chapter 1. Protection.	7
Inès KOLLI and Philippe COHARD	
1.1. Introduction: a sustainable and sober city	7
1.2. Digital city and sober city: reconcilable issues	8
1.3. A qualitative study for better understanding the development of smart cities in view of sobriety	13
1.3.1. A techno-centric approach to the smart city	13
1.3.2. Different visions between experts and citizens of the smart city	14
1.4. Sustainable and sober city: key points	16
1.5. Conclusion	17
1.6. Appendix: profiles of respondents to the qualitative study	18
1.7. References	19

Chapter 2. Including People	23
Léa CAUCHARD	
2.1. Introduction: a digital city for all citizens	23
2.2. Understanding “digital inequalities”: citizens’ relationship to digital technology	25
2.2.1. The phenomenon of the digital divide.	25
2.2.2. Differentiation of digital uses.	25
2.2.3. Digital technology, vector of exclusion or vector of inclusion . . .	26
2.3. Digital inclusion at the level of the smart city: designing digital pathways for all citizens	28
2.3.1. The inclusion process: action frameworks for urban stakeholders	28
2.3.2. Inclusive design: theoretical foundations	29
2.4. Going further in inclusive and digital design: considering citizens’ perceptions	30
2.5. Conclusion: a new approach to digital inclusion for supporting citizens during the digital transition of the city	33
2.6. References	34
 Chapter 3. Co-creating	37
Isabelle BORIES-AZEAU and Jessica CLEMENT	
3.1. Introduction: the smart city, toward a new model of governance	37
3.2. A proposed framework of analysis	38
3.2.1. Urban governance: networked governance.	38
3.2.2. Creation of public value, a challenge for participatory democracy.	38
3.3. Methodology	41
3.4. Results.	44
3.4.1. Amsterdam.	44
3.4.2. Johannesburg	45
3.4.3. London	46
3.4.4. Melbourne	47
3.4.5. Montpellier (Montpellier metropolitan area).	48
3.4.6. Ottawa	49
3.5. Conclusion	50
3.6. References	51
 Chapter 4. Reassuring	55
Audrey PORTES and Gilles N’GOALA	
4.1. Introduction: a transparent city, from reality to illusion.	55

4.2. Definition of a transparent smart city.	57
4.2.1. Smart city and transparency.	57
4.2.2. Digital transparency at the heart of a new social contract between citizens and decision-makers	60
4.3. Transparency and trust: the causalities.	62
4.3.1. From transparency to the establishment of a digital society of trust: a complex path	62
4.3.2. The illusion of transparency: between citizen trust and distrust	64
4.4. Empowerment of citizens as a condition for true digital transparency.	66
4.4.1. Empowering citizens to act and to control the digital public space	66
4.4.2. Empowering citizens to understand digital technology in the city	68
4.4.3. Empowering citizens to act collectively to preserve their privacy and individual freedoms.	70
4.5. Conclusion	72
4.6. References	73
 Chapter 5. Involvement	 77
Julie JAMMES, Gilles N'GOALA and Pauline FOLCHER	
5.1. Introduction: a socially acceptable innovative city at the service of citizen participation	77
5.2. The socially acceptable city: toward new registers of legitimacy for innovation	79
5.2.1. The social acceptability of innovation: making the innovative city a socially acceptable living space.	79
5.2.2. Toward a remediation of controversial technology to reach a social compromise.	81
5.3. The role of communication: a challenge to make the innovative city socially acceptable.	83
5.4. Effectively raising awareness among users about innovation	87
5.5. References	89
 Chapter 6. Informing	 93
Ambre GAMBIN	
6.1. Introduction: fighting the spread of fake news in the smart city	93

6.2. A technological environment facilitating the spread of misleading information.	94
6.2.1. The central role of social media in disseminating fake news online	94
6.2.2. Involvement of automated technologies in the distortion of reality	96
6.3. Technological innovation in the service of detecting false information	98
6.3.1. Identifying fake news using artificial intelligence.	98
6.3.2. The importance of content moderation on social media	99
6.4. Protecting yourself from fake news in the smart city: the need for human resources	101
6.4.1. Setting the record straight with fact-checking	101
6.4.2. Preventing the spread of the disinformation virus: inoculation and media literacy	103
6.5. References	105
 Part 2. The Smart City: What Lifestyle for Citizens?	 107
 Introduction to Part 2.	 109
Gilles N'GOALA	
 Chapter 7. Inhabiting	 113
Sarah MUSSOL and Pauline FOLCHER	
7.1. Introduction: everyday life in the smart city	113
7.2. Inhabiting tomorrow: representations of housing in the smart city.	114
7.2.1. Stories of inhabiting tomorrow	115
7.2.2. Representations of the habitat of the future.	117
7.3. Political visions of inhabiting tomorrow.	119
7.3.1. Political discourse of the smart city	119
7.3.2. Prospective scenarios for the habitat of tomorrow	120
7.3.3. Political discourse as the basis for political action	121
7.4. Residential practices in the smart cities of tomorrow	123
7.5. References	124
 Chapter 8. Eating	 127
Karine GARCIA, Andréa GOURMELEN and Angélique RODHAIN	
8.1. Introduction: creating a smart food environment, the case of the city of Montpellier	127

8.2. The smart city on food issues	128
8.2.1. Reality	128
8.2.2. The importance of an interest in accessibility to healthy food in smart cities	129
8.2.3. Accessibility of healthy eating	130
8.2.4. A food environment at the collective and individual level.	131
8.3. The case of the city of Montpellier	132
8.3.1. Context of the city and its food policy	132
8.3.2. Ma cantine autrement (MCA): an innovative approach to a familiar target for the city	134
8.3.3. The Food City: a project to broaden the target audience of the city's actions.	139
8.3.4. La Maison de l'alimentation solidaire (Solidarity Food House): third place and target audience.	141
8.4. Conclusion	146
8.5. References	147
 Chapter 9. Smart Culture, Immersion, Co-creation and Public Engagement	 151
Olga GONCALVES, Camille LACAN and Gilles N'GOALA	
9.1. Introduction.	151
9.2. The digital in search of legitimization	152
9.3. Toward new cultural trails: creation or destruction of value for audiences	156
9.4. From accessibility to the appropriation of cultural experience by the public	159
9.5. Public engagement or disengagement	162
9.6. Conclusion: smart culture, smart people.	164
9.7. References	167
 Chapter 10. Consuming	 171
Fabien DURIF	
10.1. Introduction: claims of better consumption in the city of tomorrow.	171
10.2. The need to move toward more "sustainable" consumption	173
10.2.1. A diversity of practices serving more "sustainable" consumption	174
10.2.2. Building pro-social and pro-environmental attitudes to achieve more "sustainable" consumption	175

10.3. Thinking of the city of tomorrow as a living laboratory for sustainable consumption.	176
10.3.1. The city: a “legitimate” actor promoting more sustainable consumption	178
10.3.2. Making the city of tomorrow a space for sharing	179
10.4. Conclusion: challenges linked to sustainable consumption at the territorial level	179
10.5. References.	179
 Chapter 11. Moving Around	183
Sara LAURENT and Florence PAULHIAC SCHERRER	
11.1. Introduction: integrating marketing into mobility policies	183
11.2. Demand management for low-carbon mobility	185
11.2.1. Acting on mobility: the key role of demand management	185
11.2.2. Incentives or constraints	186
11.3. Supporting changes initiated by public policies through marketing	187
11.3.1. Resistance to active mobility policies	187
11.3.2. The value of a marketing approach for demand management	188
11.4. Effective design of MaaS solutions using nudge and gamification	190
11.4.1. Understanding and distinguishing nudge and gamification	190
11.4.2. State of the art of digital solutions to encourage active mobility.	191
11.4.3. Enhancing the effectiveness of nudge and gamification through fine user segmentation.	193
11.5. Conclusion	193
11.6. References.	194
 Chapter 12. Traveling	199
Intissar ABBES and Arnaud MAES	
12.1. Introduction: technology enhancing the hospitality experience at the heart of a <i>smart destination</i>	199
12.2. Hospitality and its meanings	200
12.3. The contributions of digital technology to territorial tourist hospitality	202
12.4. Locals: new ambassadors for a <i>smart destination</i>	205
12.5. Virtual hospitality, a reflection of territorial hospitality	206
12.6. Technology and prejudice: the dark side of virtual hospitality	207

12.7. Technology supporting a more hospitable destination for its residents.	208
12.8. Conclusion	210
12.9. References.	210
Chapter 13. Healing	215
Blandine CHAPEL and Sarah GARIDI	
13.1. Introduction: connected care, digital health in smart cities	215
13.2. Embedding digital health in <i>smart cities</i>	216
13.2.1. Definition and challenges of digital health in smart cities	216
13.2.2. Digital health in smart cities: opportunity or menace for meeting the challenges of 4P medicine	219
13.3. Creation of solutions and initiatives in territories: when actors mobilize to innovate	221
13.3.1. Interdisciplinary approach to chronic diseases	221
13.3.2. Lockdown: an opportunity for better accessibility to care	224
13.4. Rethinking coordination of pathways across the territory: shared digital platforms	225
13.4.1. Patient care pathways: coordination through information systems	225
13.4.2. Coordination system for pathway relevance	227
13.5. Conclusion	229
13.6. References.	230
Chapter 14. Learning	235
Sara LAURENT	
14.1. Introduction: creating new learning experiences accessible to all	235
14.2. Designing new learning experiences	236
14.2.1. A variety of tools for an enhanced learning experience.	236
14.2.2. Motivations to adopt digital technologies for designing new learning experiences	237
14.3. Thinking about the accessibility of new learning experiences	239
14.3.1. At learner level	239
14.3.2. Within institutions and among teachers	239
14.4. Conclusion: challenges linked to education at the territorial level.	240
14.5. References.	241

Conclusion. Shaping the Digitized City	243
