Acknowledgments	xi
Preface	xiii
Chapter 1. General Introduction	1
1.1. Bird evolution	1
1.2. Extant large terrestrial birds	2
1.3. General stratigraphic distribution	4
1.4. General geographical distribution	6
1.5. Phylogenetic position of large terrestrial fossil birds	7
1.6. Methodological approaches used	8
1.6.1. Equations derived from living organisms	9
1.6.2. Isotope geochemistry	20
1.6.3. Functional morphology	28
1.6.4. Bone histology	31
1.6.5. General anatomy of birds	35
1.7. Organization of the book	36
Chapter 2. Dinornithiformes	39
2.1. Historical background	39
2.2. Taxonomy, systematics and classification	40
2.2.1. Taxonomy	40
2.2.2. Systematics	41
2.2.3. Classification	42

2.3. Stratigraphic and geographical distribution	42
2.3.1. Miocene	43
2.3.2. Early Pleistocene	45
2.3.3. Late Pleistocene and Holocene	45
2.4. Anatomy	47
2.4.1. Skeleton	48
2.4.2. Soft parts	50
2.5. Paleophysiology and paleoecology	51
2.5.1. Size and body mass	51
2.5.2. Sexual dimorphism	53
2.5.3. Locomotion	53
2.5.4. Diet	55
2.5.5. Reproduction and growth	57
2.5.6. Paleopathology	59
2.6. Paleoenvironment	59
2.6.1. Climate and vegetation	59
2.6.2. Predators	61
2.7. Extinction	62
Chapter 3. Aepyornithiformes	65
3.1. Historical background	65
3.2. Taxonomy, systematics and classification	67
3.2.1. Taxonomy	67
3.2.2. Systematics	69
3.2.3. Classification	70
3.3. Stratigraphic and geographical distribution	72
3.3.1. Northern Madagascar	74
3.3.2. The central plateau of Madagascar	74
3.3.3. Western Madagascar	75
3.3.4. South-western Madagascar	75
3.3.5. Southern Madagascar	77
3.3.6. Outside Madagascar	77
3.4. Anatomy	78
3.5. Paleophysiology and paleoecology	83
3.5.1. Diet	83
3.5.2. Body mass	85
3.5.3. Locomotion	86
3.5.4. Reproduction	87
3.6. Paleoenvironment	91

3.7. Extinction	92
3.7.1. The extinction date of Aepyornithiformes	92
3.7.2. Possible causes for the extinction of Aepyornithiformes	92
Chapter 4. Dromornithidae	95
4.1. Historical background	95
4.2. Taxonomy, systematics and classification	96
4.2.1. Taxonomy	96
4.2.2. Systematics	98
4.2.3. Classification	99
4.3. Stratigraphic and geographical distribution	100
4.3.1. Eocene	103
4.3.2. Upper Oligocene (Lower Miocene)	103
4.3.3. Miocene	104
4.3.4. Pliocene	105
4.3.5. Pleistocene	105
4.3.2. The attribution of non-osseous fossils to Dromornithidae	110
4.4. Anatomy	113
4.5. Paleophysiology and paleoecology	116
4.5.1. Diet	116
4.5.2. Body mass	118
4.5.3. Locomotion	121
4.5.4. Salt gland	124
4.5.5. Reproduction	124
4.6. Paleoenvironment	128
4.7. Extinction	129
4.7.1. Climate changes	129
4.7.2. Human action	130
Chapter 5. Phorusrhacidae	133
5.1. Historical background	133
5.2. Taxonomy, systematics and classification	134
5.2.1. Taxonomy	134
5.2.2. Systematics	135
5.2.3. Classification	138
5.3. Stratigraphic and geographical distribution	139
5.3.1. South America	140
5.3.2. North America	145
5.3.3. Africa	145
5.3.4. Europe	146

5.4. Anatomy	147
5.5. Paleophysiology and paleoecology	151
5.5.1. Size and body mass.	151
5.5.2. Locomotion	152
5.5.3. Flight abilities	154
5.5.4. Hearing	155
5.5.5. Diet	155
5.5.6. Reproduction	158
5.7. Paleoenvironment	158
5.6. Extinction	159
Chapter 6. Brontornithidae	161
6.1. Historical background.	161
6.2. Taxonomy, systematics and classification.	162
6.2.1. Taxonomy	162
6.2.2. Systematics	162
6.2.3. Classification	163
6.3. Stratigraphic and geographical distribution	163
6.4. Anatomy	165
6.5. Paleophysiology and paleoecology	167
6.5.1. Diet	167
6.5.2. Body mass	168
6.5.3. Locomotion	169
6.5.4. Sexual dimorphism	170
6.6. Paleoenvironment	170
6.7. Extinction	170
Chapter 7. Gastornithidae	173
7.1. Historical background.	173
7.2. Taxonomy, systematics and classification.	173
7.2.1. Taxonomy	173
7.2.2. Systematics	177
7.2.3. Classification	178
7.3. Stratigraphic and geographical distribution	179
7.3.1. Body fossils of Gastornithidae	179
7.3.2. Other fossils attributed to Gastornithidae.	189
7.4. Anatomy	193
7.5. Paleophysiology and paleoecology	195
7.5.1. Diet	195
7.5.2. Sexual dimorphism	199

7.5.3. Reproduction	200
7.5.4. Locomotion	207
7.5.5. Body mass	208
7.6. Extinction	211
7.6.1. Climate and environmental changes	211
7.6.2. Changes in the mammal fauna	213
Chapter 8. <i>Gargantuavis</i>	215
8.1. Historical background	215
8.2. Taxonomy, systematics and classification	215
8.2.1. Taxonomy	215
8.2.2. Systematics	216
8.2.3. Classification	216
8.3. Stratigraphic and geographical distribution	217
8.4. Anatomy	218
8.5. Paleophysiology and paleoecology	220
8.5.1. Diet	220
8.5.2. Body mass	220
8.5.3. Locomotion	221
8.5.4. Bone growth and insularity	221
8.5.5. Reproduction	223
8.6. Extinction	224
General Conclusions	225
Bibliography	231
Index	267
