Preface	ix
Chapter 1. Algae: Biological and Ecological Characteristics	1
1.1. The biology of algae.	1
1.1.1. Definition and taxonomy.	1
1.1.2. Development cycles and reproduction	6
1.1.3. Pigment composition	10
1.1.4. Size.	15
1.2. Ecology of algae	16
1.3. References	19
Chapter 2. Algae Species Used in Human Nutrition	21
2.1. Phaeophyceae (brown algae)	21
2.2. Rhodophyceae (red algae)	27
2.3. Chlorophyceae (green algae)	31
2.4. Marine microalgae.	34
2.5. References	36
Chapter 3. Production Methods	39
3.1. Context	39
3.2. Exploitation of natural fields	39
3.3. Algaculture.	44
3.4. References	56
Chapter 4. Biochemical Composition and Nutritional Value of Marine Algae	59
4.1. Introduction	59
4.2. Carbohydrates	60
4.2.1. Carbohydrates in brown algae (Phaeophyceae)	60

4.2.2. Carbohydrates in red algae (Rhodophyceae)	66
4.2.3. Carbohydrates in green algae (Chlorophyceae)	70
4.3. Proteins	71
4.3.1. Brown algae proteins (Phaeophyceae)	71
4.3.2. Red algae proteins (Rhodophyceae).	72
4.3.3. Green algae proteins (Chlorophyceae)	78
4.4. Lipids and fatty acids	81
4.4.1. Lipids in brown algae (Phaeophyceae)	82
4.4.2. Fatty acids and sterols in brown algae (Phaeophyceae)	84
4.4.3. Lipids in red algae (Rhodophyceae).	87
4.4.4. Fatty acids and sterols in red algae (Rhodophyceae).	89
4.4.5. Lipids in green algae (Chlorophyceae)	90
4.4.6. Fatty acids and sterols in green algae (Chlorophyceae)	91
4.5. Minerals	92
4.6. Vitamins	95
4.6.1. Vitamins in unprocessed algae.	95
4.6.2. Vitamins in processed algae	96
4.7. Nutritional quality	99
4.7.1. Dietary fiber.	99
4.7.2. Proteins	102
4.7.3. Minerals	106
4.7.4. In vivo studies.	108
4.8. References	112
Chapter 5. Processing Methods	119
5.1. Introduction	119
5.2. Drying	119
5.2.1. Sun drying or the traditional method	120
5.2.2. Ash drying.	122
5.2.3. Drying by thermal heating	124
5.3. Appertization.	126
5.4. Salting and brining.	127
5.5. Fast freezing	131
5.6. Freeze-drying	134
5.7. Fermentation	135
5.8. Enzymatic liquefaction or enzymatic hydrolysis	141
5.9. Liquid extraction (maceration)	148
5.10. Maturation	150
5.11. Preservation in seawater	155
5.12. References	156

Chapter 6. Applications in Human Nutrition	161
6.1. Background.	161
6.2. Sea vegetables	161
6.3. Ingredients and intermediate food products	173
6.4. Dietary supplements	185
6.5. Some culinary preparations based on algae	186
6.6. Iodine intake from algae consumption	188
6.7. Phycocolloids (additives)	195
6.8. References	199
 Chapter 7. Regulations Applicable to Algae and Their Use in Food	 203
7.1. Background.	203
7.2. Regulations on seaweed farming	204
7.2.1. French regulations on the harvesting of shore seaweed	204
7.2.2. French regulations on the harvesting of algae growing in the sea	205
7.2.3. French regulations on the harvesting of stranded algae	205
7.2.4. Specific provisions for the Mediterranean	206
7.2.5. Foreign regulations	206
7.3. Regulations on the use of algae in food	207
7.3.1. French regulations	207
7.3.2. European regulations	213
7.3.3. US regulations (United States).	214
7.3.4. Other regulations	216
7.4. References	218
 Chapter 8. Outlook	 221
8.1. Background.	221
8.2. Algae: an alternative source of plant protein in human nutrition	222
8.3. Algae as functional foods: the specific case of hypoallergenic foods	223
8.4. Other cases	225
8.5. Algae: an alternative source of vegetable protein in animal feed	227
8.5.1. Feeding aquaculture animals (fish farming, abalone farming, pen farming)	228
8.5.2. Feeding livestock	233
8.6. References	235

Conclusion	239
Index.	241
