Introduction	xiii
Gwenaëlle ORUEZABALA and Hicham ABBAD	
I.1. The main issues raised by the authors	xiii
I.2. The main issues raised	xiv
I.3. Structure of the text	xiv
 Part 1. Design and (Mis)alignment of Digital Strategies in Supply Chains	 1
 Chapter 1. Penet: Challenges and Opportunities for AI in the Modernization of the Supply Chain of a Construction Firm	 3
Jean-Marc JOYEUX, Marc SOUPLY, Orlane VOISIN and Marc MALMAISON	
1.1. Introduction	3
1.2. Background.	3
1.2.1. Building on uncertainty: the construction sector's response to contemporary challenges.	3
1.2.2. From the factory to the construction site: the art of distribution in the construction sector.	5
1.2.3. At the heart of innovation: Penet and the future of construction	6
1.2.4. From data to action: the impact of AI on Penet's supply chain	7
1.3. Questions to discuss	12
1.4. References	17
 Chapter 2. Alstom: Towards a More Efficient and Connected Unified Supply Chain	 19
Fatiha NAOUI-OUTINI and Adeline SIAU	
2.1. Introduction	19
2.2. Background.	19

2.2.1. Alstom: a historic firm, flagship of French industry	19
2.2.2. Digitalization at Alstom	21
2.3. Questions to discuss	25
2.4. References	28
 Chapter 3. Marjanemall: A New Electronic Marketplace and a Digital Revolution in Logistics in Morocco.	 31
Malika AJERAME	
3.1. Introduction	31
3.2. Background.	32
3.2.1. Marjane Holding: ahead in the digital revolution	32
3.2.2. Marjanemall: a digital bridge between actors in commerce.	32
3.2.3. Digitalized logistics at Marjanemall: cross-docking and fulfillment	33
3.2.4. Logistics optimization: the complete digitization of inventory management with Marjanemall	35
3.2.5. Marjanemall: digital logistics solutions	35
3.3. Questions to discuss	36
3.4. References	42
 Chapter 4. NAOS: Scrum Project and Augmented Purchaser.	 45
Cécile GODÉ and Pauline KEH	
4.1. Introduction	45
4.2. Background.	45
4.3. Questions to discuss	51
4.4. References	62
 Chapter 5. Trackdéchets: A Digital Platform for Hospital Waste Management	 65
Meriam KARAA, Hanane EL BAHRAOUI and Sarah GARIDI	
5.1. Introduction	65
5.2. Background.	65
5.2.1. Presentation of Trackdéchets: a tool for securing waste traceability	67
5.2.2. Experiments by CHOF	70
5.3. Questions to discuss	70
5.4. References	78
 Chapter 6. Mooville: Behind the Scenes of Self-Service E-bike Logistics	 79
Robert BESSONNAUD, Jennifer LAZZERI GRACIA-CAMPO and Laurence SAGLIETTO	
6.1. Introduction	79

6.2. Background.	79
6.3. Current organization of the self-service e-bike offer in Frama.	81
6.3.1. The town of Frama's bike plan	82
6.3.2. A faulty logistics organization.	84
6.3.3. Future quality and service requirements of the Frama local authority . . .	86
6.4. Feedback on the current solution via an extract from the press	86
6.5. Questions to discuss	86
6.6. References	93
Chapter 7. GRF: The Blockchain in Organizing River Transport Logistics Chains.	95
Thierry MORVAN, Mathieu LESUEUR-CAZÉ and Laurent BIRONNEAU	
7.1. Introduction	95
7.2. Background.	95
7.2.1. Presentation of river network manager (GRF) and its issues	95
7.2.2. Challenges for the four actors in the network	98
7.2.3. The different possible blockchain scenarios	100
7.3. Questions to discuss	106
7.4. References	113
Chapter 8. Labeyrie: Adoption of the Blockchain in the Context of an Agri-food Company	115
Lisa LAFORET	
8.1. Introduction	115
8.2. Background.	115
8.3. The blockchain, a popular technology!	116
8.3.1. History of the blockchain.	116
8.3.2. How the blockchain works.	116
8.3.3. The blockchain and the supply chain	117
8.4. The case of Labeyrie: adoption of technology as a traceability solution and a response to market expectations	118
8.4.1. Adoption of blockchain technology	119
8.4.2. Business strategy	121
8.5. Business strategy, technological strategy, institutional pressures	121
8.6. Questions to discuss	124
8.7. References	128
Chapter 9. Parnassos: Rehumanizing Digitalization of a Supply Chain?	129
Nejib FATTAM and Tarik SAIKOUK	
9.1. Introduction	129

9.2. Background	130
9.2.1. Digitalization: a promising but uncontextualized project	130
9.2.2. Empirical observation 1: employee views	131
9.2.3. Empirical observation 2: views of the digitalization project team	133
9.2.4. Empirical observation 3: views of the external consultants	134
9.2.5. The digitalization project: towards a convergence of multilevel visions	137
9.3. Questions to discuss	140
9.4. References	143
Part 2. Use and Evaluation of Digital Projects Implemented in Supply Chains	145
Chapter 10. Brasserie de la Pleine Lune: Deployment of an Information System (IS) for Traceability of Beer Kegs	147
Blandine AGERON and Olivier LAVASTRE	
10.1. Introduction	147
10.2. History and current situation of Brasserie de la Pleine Lune	148
10.2.1. History and evolution of the firm	148
10.2.2. The logistics flow diagram and its issues	149
10.3. Identifying needs for a closed-loop supply chain	151
10.3.1. Strategic objectives	151
10.3.2. Expected data and performance	153
10.4. Initial choices	153
10.5. Making changes to the existing information system	154
10.5.1. Informational modeling	155
10.5.2. Functional modeling	157
10.5.3. Observing the need for change in the information system	158
10.6. Migration to a new information system	159
10.6.1. Supplier audits and choice	160
10.6.2. Expected gains for traceability	161
10.7. Questions to discuss	162
10.8. References	167
Chapter 11. HAROPA PORT: Digitalization of Seaports	169
Sophie CROS and Carine DOMINGUEZ-PÉRY	
11.1. Background	169
11.2. Presentation of HAROPA PORT	170
11.2.1. The territory: from Le Havre to Paris	170
11.2.2. The tasks	171
11.2.3. HAROPA PORT's digitalization project: to be a European benchmark port for cyber-resilience	171
11.3. The operating principle of a port	172

11.3.1. The actors	173
11.3.2. Services offered by ports: processes and related information flows	173
11.4. The port as a complex system undergoing digitalization	176
11.4.1. Port information systems	176
11.4.2. Opportunities in digitalization of ports	180
11.4.3. Threats related to port digitalization	183
11.5. Conclusion	184
11.6. Questions to discuss	185
11.7. References	193
Chapter 12. AXA: Making Business More Inclusive Through Purchasing and Artificial Intelligence	195
Oihab ALLAL-CHÉRIF	
12.1. Introduction	195
12.2. Background	195
12.2.1. Giving meaning through inclusive purchasing	195
12.2.2. AXA, an insurance expert for over 200 years	197
12.2.3. AXA as a pioneering firm in inclusion	198
12.2.4. Long-term prospects	201
12.2.5. AI to boost inclusive purchasing	202
12.2.6. Best practices to follow	204
12.3. Questions to discuss	205
12.4. References	210
Chapter 13. Royal Treasures of Abomey in Benin: The Impossible Digitalization of Memorial Logistics	213
Marc BIDAN and Gilles PACHÉ	
13.1. Introduction	213
13.2. Background	214
13.2.1. From awareness to legislation	215
13.2.2. Restitution and physical return of the works	216
13.2.3. Questions around memorial logistics	218
13.3. Questions to discuss	220
13.4. References	226
Chapter 14. McGill University Health Center: Decentralization and Security of Medical Data	229
Rami ALKHUDARY and Ghassan AL-SUMAIDAE	
14.1. Introduction	229
14.2. Background	229

14.3. Questions to discuss	232
14.4. References	238
Chapter 15. Hemera: Implementing Robotic Process Automation (RPA) Within Energy Sector Purchasing Departments	241
Laurence VIALE	
15.1. Introduction	241
15.2. Context of the energy sector and the Hemera firm	242
15.3. The challenges of digitalization	243
15.4. Purchasing within the Hemera firm.	243
15.5. Robotization of direct purchasing processes	245
15.6. Robotization of indirect purchasing processes.	246
15.7. Implementation of RPA seen from the suppliers' perspective	247
15.8. Implementation of RPA seen from the IT service's perspective	248
15.9. Questions to discuss	249
15.10. References	256
Chapter 16. BT&C: Implementation of a WMS at a B2B Distributor of Electrotechnical Products	257
Célestin ELOCK SON and Georges BIDI	
16.1. Introduction	257
16.2. Presentation of BT&C	257
16.3. Context	258
16.4. Some products from the range offered by BT&C Electro-Technical Products	259
16.5. Information system to help optimization	261
16.6. Steps in setting up the information system.	263
16.7. Main results.	266
16.8. Questions to discuss	266
16.9. References	273
Chapter 17. Save the Children NGO: Digitalization of Asset Management	275
Pingwende Nathanaïel CONGO and Grégoire NABI	
17.1. Introduction	275
17.2. Background	276
17.3. Importance of asset management	277
17.4. Development, implementation and deployment of e-Asset.	278
17.4.1. Needs analysis	278
17.4.2. Development and deployment of the solution.	279

17.5. The managerial contributions of e-Asset and GPE Platform	289
17.5.1. Optimizing asset management processes	289
17.5.2. Reducing downtime and maintenance costs.	289
17.5.3. Better allocation of financial resources	290
17.5.4. Promoting transparency, combating fraud and ensuring accurate accounting management.	290
17.6. Questions to discuss	290
17.7. References	293
Chapter 18. SCA Ouest: An Experiment in Automation and Robotization in Action!	295
Hicham ABBAD and Gwenaëlle ORUEZABALA	
18.1. Introduction.	295
18.2. Background.	295
18.2.1. E.Leclerc Group: undisputed leader in food retail in France.	295
18.2.2. E.Leclerc: a decentralized logistics organization	297
18.2.3. SCA Ouest: a testing ground for automation and robotization projects. .	298
18.2.4. What's new with digitalization?	300
18.3. Questions to discuss	301
18.4. References	306
List of Authors	309
Index.	313
