Introduction	xiii
James R. BOZEMAN and Christos H. SKIADAS	
 Part 1. Health and Demography	 1
 Chapter 1. Standard and Fertility-adjusted Equitable Normal Pension Age	 3
Tomáš FIALA, Jitka LANGHAMROVÁ and Jana VRABCOVÁ	
1.1. Introduction.	4
1.2. Methodology	6
1.3. Data source and calculations.	8
1.4. Results.	10
1.5. Conclusion	14
1.6. References	15
 Chapter 2. Number of Centenarians in Brazil and Selected Countries: Evaluation of the Quality of Census Counting	 17
Neir Antunes PAES, Rozane PEREIRA DE SOUSA and Vivian Conceição Alves Leite PEREIRA DO LAGO	
2.1. Introduction.	17

2.2. Methodology	18
2.2.1. Background	18
2.2.2. Review 2	20
2.3. Results of Review 2	21
2.4. Conclusion	29
2.5. References	29

**Chapter 3. Optimal Semi-Markov Model Selection
for Pediatric Obstructive Sleep Apnea Patient Data 31**

Matthew FISCHER, Adam B. KASHLAK, Mathieu CHALIFOUR
and Giseon HEO

3.1. Introduction.	31
3.2. Sleep apnea data overview	33
3.3. Bayes factors	34
3.3.1. Geometric distribution	35
3.3.2. Poisson distribution.	35
3.3.3. Negative binomial distribution	36
3.3.4. Logarithmic distribution.	37
3.4. Semi-Markov models for sleep states	37
3.5. Sleep data model comparison	38
3.6. Conclusion	40
3.7. References	40

**Chapter 4. An Efficient Determination Criterion-based Metric
for Z-DNA Pattern Identification in the Epstein-Barr
Virus Associated with Nasopharyngeal Carcinoma 43**

James R. BOZEMAN, Jesús E. GARCÍA, V.A. GONZÁLEZ-LÓPEZ
and D.S. SANTOS

4.1. Introduction.	44
4.1.1. Z-DNA phenomenon.	45
4.1.2. The family of metrics	46
4.2. Results.	47
4.3. Discussion	51
4.4. References	52

Chapter 5. Investigating the Mediating Role of Dis/Trust in Government to Deal with the Pandemic in the Relationship Between Covid-19 Cases, the Impact of the Pandemic on Employment and Social Trust: Evidence From the 2020 European Social Survey for Four European Countries 55

Aggeliki YFANTI and Catherine MICHALOPOULOU

5.1. Introduction.	56
5.2. Method	58
5.2.1. Procedure and participants	58
5.2.2. Measures	59
5.2.3. Statistical analyses	60
5.3. Results.	62
5.3.1. Covid-19 cases and the impact of the pandemic on employment	62
5.3.2. Political and social trust in the age of a pandemic.	63
5.3.3. Mediation analysis	65
5.4. Conclusion	67
5.5. References	68

Chapter 6. Joint Forecasting of Screening/Randomization Processes in Multicenter Clinical Trials and Predicting Optimal Enrollment Stopping Time 71

Volodymyr ANISIMOV and Leo GORTZAK

6.1. Introduction.	72
6.2. Structure of screening stages.	73
6.2.1. Stages of prediction	74
6.3. Predicting randomized patients from screening pool	74
6.3.1. Distributional approach	75
6.3.2. Normal approximation.	76
6.3.3. Monte Carlo	76
6.4. Predicting the number of randomized patients	76
6.4.1. Randomization process $Y_1(t)$ from primary screening	77
6.4.2. Mean and variance of $Y_1(t)$	77
6.4.3. $Y_2(t)$ and $Y_3(t)$	78
6.5. Randomization process from future arrivals	79
6.5.1. Arrival process	79
6.5.2. Randomization process	79
6.5.3. Global randomization process	81
6.6. Parameter estimation	81

6.7. Implementation in R tool	82
6.7.1. Algorithm of simulation in R	82
6.7.2. Stopping new arrival	83
6.7.3. Predicting enrollment	84
6.7.4. Applications	86
6.8. Future considerations	86
6.9. Acknowledgment	86
6.10. References.	86
 Part 2. Applications	 89
 Chapter 7. Bidding Strategies Approaches for the Greek Electricity Market	 91
Emmanuel KARAPIDAKIS, Marios NIKOLOGIANIS and George MATALLIOTAKIS	
7.1. Introduction.	91
7.2. Methodology	93
7.3. Stand-alone and hybrid BESS bidding strategies.	97
7.3.1. Stand-alone BESS	97
7.3.2. Collocated RES with BESS.	98
7.4. Conclusion	100
7.5. References	101
 Chapter 8. Long-Term Memory, Event-Driven Dynamics and Predictive Power: An Analysis of Economic Policy Uncertainty and Market Volatility in the United States and UK.	 103
Christos FLOROS, George MATALLIOTAKIS and Fotis PAPATHEOFANOUS	
8.1. Introduction.	103
8.2. Background and theoretical foundations.	105
8.2.1. Long memory and persistence	105
8.2.2. Academic literature.	108
8.3. Methodology	109
8.3.1. Data	109
8.3.2. Hurst exponent and detrended fluctuation analysis	110
8.3.3. Augmented Dickey–Fuller test	111
8.3.4. Subperiod analysis	111
8.3.5. Pearson correlation	112

8.3.6. Lagged correlation analysis	112
8.3.7. Granger causality test	112
8.4. Empirical results	113
8.4.1. Overall EPU persistence and stationarity	113
8.4.2. Presentation of data.	113
8.4.3. Subperiod analysis of EPU persistence	116
8.4.4. Relationship between US EPU and VIX	117
8.5. Discussion	122
8.5.1. Persistent nature of EPU.	122
8.5.2. Impact of major events on EPU persistence	122
8.5.3. Relationship between US EPU and VIX	124
8.6. Conclusion and future research	125
8.7. References	127
8.8. Appendix EPU US_Daily_Policy_Data	128
 Chapter 9. Spatial Dependence in Extreme Precipitation: An Extreme Value Analysis in R	 145
Dora PRATA GOMES and Maria Manuela NEVES	
9.1. Introduction.	145
9.2. Asymptotic models for spatial extremes	146
9.2.1. Marginal modeling of extremes	146
9.2.2. Max-stable processes.	147
9.2.3. Spatial models.	149
9.2.4. Extremal coefficient	151
9.3. An application using the R environment – rainfall data in the North of Portugal	152
9.4. Final remarks.	158
9.5. Acknowledgments.	159
9.6. References	159
 Chapter 10. Time Series and Cluster Analysis of Groundwater Level in Slovakia	 161
Jana KALICKÁ, Dominika Sónak BALLOVÁ and Michalea ČERVEŇANSKÁ	
10.1. Introduction	161
10.2. Data specifications and methods.	162
10.3. Analysis of trend and periodic components in groundwater levels	163
10.4. The residuals component and ARMA modeling	166
10.5. Probe cluster analysis and visualization	168

10.6. Conclusion	170
10.7. Acknowledgments	171
10.8. References.	171

Chapter 11. Coupon Collector Problem with Partial and Total Resets 173

Jelena JOCKOVIĆ and Bojana TODIĆ

11.1. Introduction and motivation	173
11.2. CCP with total resets	174
11.3. CCP with partial resets	176
11.3.1. Partial reset (1).	176
11.3.2. Partial reset (2).	178
11.4. Model comparison	180
11.4.1. Probability of completing a full collection of coupons in the minimum number of steps.	180
11.4.2. Expected value and variance of the waiting time until completing a full collection.	181
11.5. Numerical results.	182
11.5.1. $E(W_n^{(c)})$ and $Var(W_n^{(c)})$ for different values of reset probabilities	182
11.5.2. $E(W_n^{(c)})$ and $Var(W_n^{(c)})$ for the same $P^{(min)}$	183
11.5.3. $E(W_n^{(c)})$ and $Var(W_n^{(c)})$ for different values of n	183
11.5.4. Conclusion	184
11.6. Discussion.	185
11.7. Acknowledgments	186
11.8. References.	186

Chapter 12. The Relationship Between Quality of Life and Brain Drain. 187

Aleksei N. KURBATSKII and Marina V. MIRONENKOVA

12.1. Introduction	187
12.2. Data and methodology	189
12.3. Results	193
12.4. Conclusion	197
12.5. Acknowledgments	198
12.6. References.	198

Part 3. Statistical Techniques 201

**Chapter 13. A Unified Model for SPC and Maintenance
in High Investigation Cost Processes with Multiple
Quality Disruptions** 203

Konstantina TSIOTA and Konstantinos A. TASIAS

13.1. Introduction	203
13.2. Problem statement	204
13.3. Mathematical model	206
13.3.1. Failure probabilities.	206
13.3.2. Error probabilities.	206
13.3.3. Transition and steady-state limiting probabilities	207
13.4. Cost structure analysis.	209
13.5. Optimization framework	211
13.6. Numerical analysis.	212
13.7. Conclusion	214
13.8. References.	216

**Chapter 14. A Note on Spectral Risk Measures when
Systemic Risk is Present** 217

Georgios C. ZACHOS

14.1. Introduction and motivation	217
14.1.1. Motivation	219
14.2. Preliminaries	221
14.2.1. Risk measures	221
14.2.2. Properties of risk measures	222
14.2.3. Important risk measures	223
14.3. Theoretical framework	223
14.4. Contribution.	226
14.5. A suggested application.	230
14.6. Conclusion	231
14.7. References.	232
14.8. Appendix A	234
14.9. Appendix B	235

Chapter 15. Mutual Information and Pearson's Correlation in Analysis of Statistical Tests Suites: A Case Study	237
Elena ALMARAZ LUENGO	
15.1. Introduction	237
15.2. ENT battery analysis	239
15.3. Conclusion	243
15.4. References.	243
 Chapter 16. Binary Regression and Non-monotonic Link Functions	 245
Gloria GHENO	
16.1. Introduction	246
16.2. Proposed method.	247
16.3. Methodology	250
16.4. Comparison	253
16.4.1. Sensitivity analysis of starting values	253
16.4.2. Nonlinearity	254
16.4.3. ROC curve comparison	255
16.4.4. AUC area comparison	257
16.4.5. Inference	257
16.5. Conclusion	258
16.6. References.	259
