Preface	ix
List of Abbreviations	xi
Introduction	xvii
Part 1. State-of-the-Art: The Question of Social R&D	1
Introduction to Part 1.	3
Chapter 1. A Brief Overview of the Relationship between R&D and Innovation	5
1.1. Building a dominant approach to innovation	6
1.1.1. Hegemony of technological innovation	6
1.1.2. Expanding the concept of innovation	8
1.1.3. Social innovation in the literature	10
1.2. The importance of social innovation	15
1.3. R&D, a fundamental component to accompany innovation	19
1.3.1. Evolution of the innovation support system?.	20
1.3.2. R&D, a key approach to supporting innovation	24

Chapter 2. The Renewal of R&D through Social R&D	27
2.1. What about R&D applied to social innovation?	27
2.2. A suitable methodology for a complex and novel study subject	34
2.2.1. Data construction and method combination	35
2.2.2. A comprehensive approach to social R&D: articulating methods and data	37
2.2.3. Perspectives on the methodology used	44
 Chapter 3. “Social” R&D: Emergence and Construction in the French Context	47
3.1. “Social” R&D in France: a recent phenomenon	48
3.2. Social R&D: similarities with emerging practices	58
3.2.1. Knowledge valorization and research transfer in HSS	58
3.2.2. Participatory research	60
3.2.3. “Territorial” R&D?	62
3.2.4. “Public” R&D?	64
 Part 2. Social R&D: Fundamentals and Practices	69
 Introduction to Part 2.	71
 Chapter 4. Social Innovation: Specificities and Associated R&D Practices	73
4.1. Social innovation: from initiatives to specific challenges	76
4.2. R&D practices to promote social innovation	89
4.3. R&D at the service of social innovation: new practices	94
 Chapter 5. Understanding Social R&D: Construction of a Characterization Grid	101
5.1. Social R&D practices with specific characteristics	106
5.1.1. The development of social innovation: the main goal	107
5.1.2. Integration into the dynamics of societal transformations	109
5.1.3. Conducting experiments within society	114

5.1.4. Adoption of a scientific approach	119
5.1.5. Associating different types of actors.	124
5.2. An original grid	127
5.2.1. An operationalizable grid	130
5.3. The limitations of social R&D practices.	132
5.3.1. An often hidden scientific process	132
5.3.2. Conducting experiments: an inductive approach	137
5.3.3. Addressing societal problems.	141
5.3.4. Identifying and engaging all stakeholders	143
5.3.5. A societal transformation that is not easily measured.	146
 Part 3. Building the Future: Supporting and Recognizing Social R&D	 151
 Introduction to Part 3	 153
 Chapter 6. The Importance of Recognizing Social R&D	 155
6.1. Divergent trajectories: discourses and perceptions of innovation and R&D	157
6.2. Inadequate support: the challenges for social R&D mechanisms	169
6.2.1. The inadequacy of mechanisms aimed at establishing a link between research and innovation for social R&D processes.	170
6.2.2. The inadequacy of innovation and R&D funding mechanisms for social R&D	174
6.3. Overcoming obstacles: the role of methods, tools and frameworks dedicated to social R&D	178
 Chapter 7. Working toward a Support System for R&D and Social Innovation	 183
7.1. New reference frameworks: the example of the SRL scale	184
7.2. Mechanisms for rethinking R&D funding: the example of the social CIR	190
7.3. Ideas for rethinking existing mechanisms: the example of CIFRE theses and joint laboratories	193

Conclusion 199
