Introduction	xiii
Dimitri UZUNIDIS and Vanessa CASADELLA	
Chapter 1. Big Changes in Global Food Security and the Issue of Development: Challenges and Hopes	1
Jean-Luc HORNICK	
1.1. Introduction.	1
1.2. Food security issues	2
1.3. Elements of hope	6
1.4. Conclusion	9
1.5. References	10
Chapter 2. Agri-environmental Frugal Innovation and Sustainable Development	13
Paul BOUVIER-PATRON	
2.1. Introduction.	13
2.2. From HighTech innovation to a satisfactory technological level	18
2.3. Sustainable food in a necessary context with respect to the Natural Environment and global warming: sorghum in Africa and rice in Asia	24
2.3.1. Sorghum	26
2.3.2. Thai rice	29
2.4. Conclusion	33
2.5. References	34

Chapter 3. The National Innovation System as Applied to Agriculture: A Methodological Proposal for Diagnosis in Africa . . .	37
Eveline M.F.W. SAWADOGO/COMPAORÉ and Natewindé SAWADOGO	
3.1. Introduction.	37
3.2. Methodology	39
3.3. Linear model of agricultural innovation	41
3.4. Interactional models of agricultural innovation.	42
3.4.1. Participatory approach to agricultural development or “training and visits” approach	42
3.4.2. In search of an interactional innovation diffusion approach.	43
3.4.3. Description of the framework of NISs	44
3.5. Beyond the NIS: taking context as a key aspect	49
3.6. Practical methodology for the diagnosis of AISs in Africa	50
3.7. Conclusion	53
3.8. References	53
Chapter 4. Adoption of Rice Technological Innovations for Technical Efficiency in Senegal	59
Babacar NDIAYE and Albertine Bayompe KABOU	
4.1. Introduction.	59
4.2. Theoretical framework	61
4.2.1. Theoretical approach to the determinants of adoption	61
4.3. Empirical approach	62
4.4. Econometric model and data analysis	63
4.4.1. Specification of the production boundary method.	63
4.4.2. Analysis of results	65
4.5. Conclusion	69
4.6. Appendix 1	71
4.7. Appendix 2: empirical model of technical efficiency	72
4.8. References	73
Chapter 5. Characterization of the Sectoral Cocoa Innovation System in Cameroon	79
Synthia MATHÉ, Eric Joël FOFIRI NZOSSIÉ and Ludovic TEMPLE	
5.1. Introduction.	79
5.2. Methodological framework for analyzing information in the cocoa sector	80
5.2.1. The sectoral innovation system analysis framework	80
5.2.2. Information collection system and databases.	81

5.3. Dynamics of the innovation system in the cocoa sector in Cameroon	82
5.3.1. The evolution of scientific knowledge production on cocoa.	83
5.3.2. A highly administered institutional governance of innovation	84
5.3.3. “Liberalization”: a vector of sectoral transformation of innovation in cocoa	85
5.4. What are the consequences for the sector’s research and innovation policies?	89
5.4.1. Variable governance of the sectoral innovation system questioned by agroforestry	89
5.4.2. A challenge of innovation governance through the hybridization of scientific and local knowledge.	91
5.4.3. A potential reconfiguration of innovation models in the cocoa sector	92
5.5. Conclusion	93
5.6. References	94

Chapter 6. Valorization of the Date Industry in Tunisia by Combining “Modern” and “Traditional” Knowledge and Techniques: Difficulties, Successes and Prospects 97
 Yasmine BOUGHZALA and Néfissa BEN MAHMOUD

6.1. Introduction.	97
6.2. Literature review.	98
6.2.1. Sector and value chain: complementary but distinct concepts.	98
6.2.2. Agricultural value chains in emerging countries.	99
6.2.3. The date industry in Tunisia	101
6.3. Background and research design	108
6.3.1. The economic and social context of the date industry in Tunisia	108
6.3.2. Methods and data	108
6.4. The results of the research	110
6.4.1. An agricultural value chain in difficulty despite its global leadership	110
6.4.2. The guarantors of global leadership	111
6.4.3. Challenges of sustainability.	113
6.5. Conclusion	114
6.6. References	115

Chapter 7. Technology, Innovation and Sustainability of the Soybean Chain: Study of the Cameroonian Cotton Front Facing Environmental Challenges	123
Eric Joël FOFIRI NZOSSIE, Darryl Neil NITCHEU WAKPONOU and Christophe BRING	
7.1. Introduction.	123
7.2. State of knowledge on the subject	126
7.2.1. Soybean in the socioeconomic diversification of rural Africa.	126
7.2.2. The agribusiness industry as a lever for strengthening the use of science and technology (S&T) policies and accelerating soybean cultivation in sub-Saharan Africa	127
7.2.3. S&T policies for the valorization of soybean in energy diversification and the fight against climate change	127
7.3. Theoretical framework of the study	129
7.4. Methodological approach adopted	130
7.4.1. Diagnosis with soybean producers and resource persons	130
7.4.2. Analysis of the evolution of vegetation cover	131
7.4.3. Soil sampling	131
7.4.4. Results	136
7.5. Agro-technological and organizational innovation as the basis for the development of the soybean value chain in the Cameroonian cotton front.	136
7.5.1. The cotton crisis, a vector for the diffusion of soybeans	136
7.5.2. An increase in soybean production supported more by the expansion of cultivated areas than by technical innovation	139
7.6. The development of the national agri-food sector: a lever for the progressive construction of a soy value chain	140
7.7. Environmental issues of soybean production dynamics in the Sudano-Sahelian region	145
7.7.1. A significant regression of the vegetation cover in an ecologically fragile area.	145
7.7.2. Soil degradation linked more to cultivation practices than to soybean speculation.	150
7.8. Conclusion	150
7.9. References	152
Chapter 8. Impact of Good Agricultural Practices on Cashew Nut Crop Yields in Senegal	157
Blaise Waly BASSE, Souleymane MBAYE and Omar DIOP	
8.1. Introduction.	157
8.2. Literature review.	158

8.3. Methodology	159
8.3.1. Presentation of the study area.	159
8.3.2. Sampling and data collection	161
8.3.3. Data analysis method.	163
8.4. Results and discussion	166
8.4.1. Sociodemographic characteristics of producers	166
8.4.2. Socioeconomic characteristics of adopters and nonadopters	166
8.4.3. The contribution of good practices to performance	168
8.5. Conclusion	170
8.6. References	171
Chapter 9. Bioeconomy and Sustainable Conservation of Plants and Forests in Madagascar	175
Hery Lisy Tiana RANARIJAONA, Tiantsoa ANDRIANASETRA, Liva Jackson RAHARINAIVO, Vololoniaina RAMAHATAFANDRY, Michaël BEFINOANA, Auguste Botovao RAMIANDRISOA, Cyrille MAHAROMBAKA, Sylvana TOMBOANONA, Chéri Christian TOTONDRABESA, Fenozo ANDRIAMANANTENA, Simon Georges ANDRIANASETRA, Ainazo ANDRIAMANANTENA and Antoine Zafera RABESA	
9.1. Introduction.	175
9.2. Study methods	178
9.3. “Vololona” Educational Botanical Garden (JBE)	181
9.4. Results.	183
9.4.1. Perception of Covid-19 in the city of Mahajanga	183
9.4.2. Perception of Covid-19 in Fokontany Antsanitia	183
9.4.3. Perception of the use of medicinal plants in the socioeconomic field at the two target sites	183
9.4.4. Medicinal plants identified	184
9.4.5. Medicinal plants used to prevent and treat Covid-19-related diseases in Fokontany Antsanitia	184
9.4.6. Medicinal plants to prevent Covid-19 collected in the JBE	187
9.4.7. Suggested plants for the bioeconomy of Mahajanga	187
9.5. Discussion	190
9.6. Conclusion	193
9.7. References	194
Chapter 10. Bricolage in Agriculture Sector: Emergence Dynamic and Consequences in Vietnam	197
Son Thi Kim LE, To The NGUYEN and Phuong Anh Thi NGUYEN	
10.1. Introduction	197
10.2. Bricolage in the agriculture sector.	199

10.2.1. Bricolage and scarcity	199
10.2.2. Three main domains stimulate bricolage	200
10.3. Bricolage in agriculture sectors – How does it work?	201
10.4. Bricolage to improve Vietnamese agriculture in a scarcity context	204
10.5. Infrastructure resources and advanced technology	205
10.6. Financial resources.	209
10.7. Human resources and skills.	212
10.8. Conclusion	214
10.9. References.	214

Chapter 11. The Contribution of Food Hubs in the Digital Age to the Sustainable Agri-food Transition: A Review of Research in Sub-Saharan Africa 219

Gérard DE LA PAIX BAYIHA

11.1. Introduction	219
11.2. Literature review	222
11.2.1. Territorial innovation, a lever for the development of short food circuits	222
11.2.2. Food hubs, an innovative model for supplying cities in the transition process toward sustainable agri-food systems	224
11.3. Methodology of the documentary research and results	225
11.4. A lack of scientific work on food hubs in sub-Saharan Africa despite their development	228
11.5. Conclusion: a need for studies on food hubs in sub-Saharan Africa	231
11.6. References.	232

Chapter 12. Total Processing of Soy *Glycine max* through Valorization of the Tofu Whey into Cosmetic Products 239

Dinah ANDRIANJAFY, Helga RIM FARASOA and Felamboahangy RASOARAHONA

12.1. Introduction	239
12.2. Interests in the valorization of soya whey in cosmetics	240
12.3. Materials and methods	241
12.3.1. Preparation of the tofu	241
12.3.2. Tofu preservation process	241
12.3.3. Tofu acceptability test	242
12.3.4. Tofu shelf life test.	242
12.3.5. Preparation of whey before its use in cosmetics	242
12.3.6. Development of cosmetic products.	243
12.3.7. Quality and shelf life tests of cosmetic products.	243

12.3.8. Efficacy testing of cosmetic products	243
12.4. Results and interpretations	244
12.4.1. Tofu and whey yields.	244
12.4.2. Sensory analysis of tofu	244
12.4.3. Preservability of processed tofu.	247
12.4.4. Whey stability	247
12.4.5. Characterization and stability of the developed cosmetic products	247
12.4.6. Effectiveness of the manufactured cosmetic products.	248
12.4.7. General discussion	248
12.5. Conclusion	249
12.6. References.	250
