<b>Introduction</b> . . . . .	ix
Dimitri UZUNIDIS	
<b>Chapter 1. Enterprise Knowledge Capital and Innovation: Definition, Roles and Challenges</b> . . . . .	1
Blandine LAPERCHÉ	
1.1. Knowledge capital: definition and roles . . . . .	3
1.1.1. Information and knowledge . . . . .	3
1.1.2. Definition of knowledge capital . . . . .	6
1.1.3. Knowledge capital and managing knowledge . . . . .	8
1.2. Productive use of knowledge capital . . . . .	11
1.2.1. Knowledge capital and the production of new goods and services . . . . .	12
1.2.2. Knowledge capital and the cohesiveness of work collectives . . . . .	16
1.2.3. The use of knowledge capital in the digital era: reduction of the production process completion time. . . . .	17
1.3. Conclusion . . . . .	21
1.4. Bibliography . . . . .	22
<b>Chapter 2. The Non-economic Values of Innovation</b> . . . . .	27
Edouard LE MARÉCHAL	
2.1. Introduction. . . . .	27
2.2. The development of business models caused by digitization. . . . .	29
2.3. Extending the notion of value generation to include non-economic values . . . . .	32

---

2.4. Putting forward a value system to be considered when creating innovation business models . . . . .	35
2.5. How values can be used in a systemic representation of innovation. . . . .	39
2.6. Conclusion . . . . .	41
2.7. Bibliography . . . . .	43
<b>Chapter 3. Long-term Survival of Innovative Organizations . . . . .</b>	<b>47</b>
Sophie MIGNON	
3.1. Long-term survival: finding a balance between change and continuity . . . . .	48
3.2. Multiple possibilities between change and continuity . . . . .	50
3.2.1. A balance resulting from a structural, spatial and architectural separation of opposite forces: the theory of structural ambidexterity . . . . .	50
3.2.2. Reaching an equilibrium by temporally alternating between the two dynamics: punctuated equilibrium theory . . . . .	51
3.2.3. Finding a balance through ambidexterity in individuals and more generally in the organizational context: the contextual ambidexterity approach . . . . .	52
3.3. Which innovation strategy should companies aiming for long-term survival adopt? The concept of prudent innovation . . . . .	54
3.4. Conclusion . . . . .	58
3.5. Bibliography . . . . .	59
<b>Chapter 4. The Resources Potential of the Innovative Entrepreneur . . . . .</b>	<b>63</b>
Sophie BOUTILLIER	
4.1. The resources potential of innovative entrepreneurs . . . . .	64
4.1.1. Defining innovative entrepreneurs . . . . .	64
4.1.2. The resources potential of innovative entrepreneurs . . . . .	69
4.2. The innovative entrepreneur's resources: knowledge, finance and social networks . . . . .	72
4.2.1. Knowledge and financial means, the indispensable resources for innovative entrepreneurs. . . . .	72
4.2.2. Mobility thanks to the networks of social relationships . . . . .	76
4.3. Conclusion . . . . .	81
4.4. Bibliography . . . . .	82

<b>Chapter 5. Innovation Spaces: New Places for Collective Intelligence?</b> . . . . .	87
Laure MOREL, Laurent DUPONT and Marie-Reine BOUDAREL	
5.1. Introduction. . . . .	87
5.2. Innovation spaces: the spaces where all the new innovation trends coexist . . . . .	89
5.3. Which types of spaces, to what innovating or innovative ends? . . . . .	91
5.4. The innovation space: a design issue approached in the wrong way. . . . .	94
5.5. Places in the service of collective intelligence?. . . . .	97
5.6. Conclusion . . . . .	102
5.7. Bibliography . . . . .	103
<b>Chapter 6. The Innovative Territory</b> . . . . .	109
Corinne TANGUY	
6.1. Territory and innovation: a collective process of co-construction . . . . .	110
6.2. Territorial proximities and cooperation networks . . . . .	114
6.2.1. Challenging the predominant role of geographic proximity . . . . .	114
6.2.2. Different forms of proximity . . . . .	115
6.3. The complementary nature of local and distant collaborations. . . . .	118
6.4. Conclusion: project territories and new governance systems. . . . .	120
6.5. Bibliography . . . . .	122
<b>Chapter 7. The “Eco-innovative” Milieu: Industrial Ecology and Diversification of Territorial Economy</b> . . . . .	131
Fedoua KASMI	
7.1. Industrial ecology and the “eco-innovative” milieu . . . . .	132
7.1.1. Industrial ecology and industrial regions . . . . .	132
7.1.2. Industrial ecology as an “eco-innovative” milieu . . . . .	134
7.2. From specialization to “smart” diversification: altering the economic trajectory of a region . . . . .	138
7.2.1. Specialization versus diversification. . . . .	138
7.2.2. “Smart” diversification and a new territorial path . . . . .	143
7.3. Conclusion . . . . .	150
7.4. Bibliography . . . . .	150
<b>Chapter 8. Responsible Innovation</b> . . . . .	159
Leïla TEMRI	
8.1. Foundations. . . . .	160

8.1.1. Responsibility in science and technology . . . . .	160
8.1.2. Technology assessment . . . . .	161
8.2. Responsible research and innovation in European policies . . . . .	163
8.3. Responsible innovation and companies . . . . .	166
8.4. Conclusion . . . . .	173
8.5. Bibliography . . . . .	174
<b>Chapter 9. Innovation Capacities as a Prerequisite for Forming a National Innovation System . . . . .</b>	<b>177</b>
Vanessa CASADELLA and Dimitri UZUNIDIS	
9.1. Institutions and innovation capacities . . . . .	179
9.1.1. Taking institutions into consideration in economic theory. . . . .	179
9.1.2. Institutions and innovation capacities . . . . .	182
9.2. Innovation capacities and national innovation systems . . . . .	185
9.2.1. National innovation systems and their heterogeneity . . . . .	186
9.2.2. Innovation capacities, the inseparable pillars of NIS . . . . .	191
9.3. Conclusion . . . . .	194
9.4. Bibliography . . . . .	195
<b>List of Authors . . . . .</b>	<b>201</b>
<b>Index . . . . .</b>	<b>203</b>
