<b>Chapter 1. Principles of Ultrasound Imaging and Signal Analysis . . . . .</b>	<b>1</b>
S. Lori BRIDAL	
1.1. Introduction: probing living systems with ultrasound . . . . .	1
1.2. Ultrasound probes . . . . .	4
1.2.1. Piezoelectric materials: electro-acoustic conversion . . . . .	4
1.2.2. Transducers . . . . .	5
1.2.3. Modeling the transducer response . . . . .	6
1.2.4. Frequency and period of oscillation . . . . .	8
1.2.5. Transducer resonant frequency and bandwidth . . . . .	9
1.3. Longitudinal ultrasound waves . . . . .	11
1.3.1. Vibrations along the axis of wave propagation . . . . .	11
1.3.2. The 1D, elastic wave equation . . . . .	12
1.3.3. The propagating wave . . . . .	15
1.4. Pulse-echo ultrasound . . . . .	17
1.4.1. Ultrasonic pulses . . . . .	17
1.4.2. Pressure and intensity . . . . .	18
1.4.3. Central frequency choice . . . . .	19
1.4.4. Attenuation . . . . .	19
1.4.5. Propagation speed . . . . .	20
1.4.6. Nonlinear propagation effects . . . . .	20
1.4.7. Reflection, transmission and refraction . . . . .	21
1.4.8. Scattering and acoustic speckle . . . . .	22
1.4.9. Cavitation and the mechanical index . . . . .	24
1.4.10. Heating and the thermal index . . . . .	24
1.4.11. Radiation pressure . . . . .	25
1.5. Forming an image . . . . .	25
1.5.1. An array of signals that can be viewed in many ways . . . . .	25
1.5.2. Diffraction and natural focusing . . . . .	26
1.5.3. Electronic focusing versus ultrafast plane waves . . . . .	27
1.5.4. Key technical innovations . . . . .	28

---

1.5.5. Time gain compensation . . . . .	28
1.5.6. Contrast-to-noise ratio . . . . .	28
1.5.7. Beam volume and spatial resolution. . . . .	29
1.5.8. Pulse repetition frequency and frame rate . . . . .	29
1.6. Imaging modes to further probe living systems. . . . .	30
1.6.1. Doppler . . . . .	30
1.6.2. Shear wave propagation speed and elastic properties . . . . .	32
1.6.3. Ultrasound contrast imaging . . . . .	33
1.6.4. Super-resolution imaging. . . . .	34
1.6.5. Photoacoustic imaging . . . . .	34
1.7. References . . . . .	34
<b>Chapter 2. Transducers, Imaging Systems and Image Formation . . . . .</b>	<b>37</b>
Enrico BONI, Alessandro RAMALLI, Alessandro Stuart SAVOIA and Piero TORTOLI	
2.1. Ultrasonic transducers. . . . .	37
2.1.1. Transducer fundamentals. . . . .	38
2.1.2. Transducer technologies . . . . .	45
2.2. Image formation techniques . . . . .	51
2.2.1. Imaging system building blocks . . . . .	51
2.2.2. High frame rate imaging . . . . .	54
2.2.4. Image quality enhancement by beamforming techniques . . . . .	59
2.3. Advanced imaging systems. . . . .	60
2.3.1. Advanced architectures and research platforms . . . . .	60
2.4. References . . . . .	63
<b>Chapter 3. Shear Wave Propagation and Probing Tissue Mechanical Properties . . . . .</b>	<b>71</b>
Stefan CATHELINE and Bruno GIAMMARINARO	
3.1. Introduction: a historical perspective of palpation . . . . .	71
3.1.1. What is elasticity?. . . . .	72
3.1.2. Clinical elastography and emergent applications. . . . .	74
3.1.3. Chapter overview . . . . .	74
3.2. Sound waves in human tissue: the liquid man. . . . .	75
3.3. Beyond ultrasound imaging: the solid man . . . . .	77
3.4. The shear wave source problem . . . . .	79
3.4.1. External vibrating piston source . . . . .	79
3.4.2. Radiation pressure . . . . .	81
3.4.3. Electromagnetic source. . . . .	83
3.4.4. Bubbles and laser sources . . . . .	83
3.4.5. Natural sources . . . . .	84
3.5. Elastography beyond ultrasound . . . . .	85
3.6. References . . . . .	87

---

---

<b>Chapter 4. Doppler Ultrasound and Flow Mapping . . . . .</b>	<b>93</b>
Alfred C.H. YU	
4.1. Continuous-wave (CW) Doppler . . . . .	94
4.1.1. Origin of signals in blood . . . . .	94
4.1.2. Doppler equation in the context of blood flow measurements . . . . .	95
4.1.3. Practical implementations and considerations . . . . .	98
4.1.4. Output format and applications . . . . .	99
4.2. Pulsed Doppler . . . . .	100
4.2.1. Principles of pulse-echo sensing of blood flow . . . . .	101
4.2.2. The concept of slow-time sampling . . . . .	103
4.2.3. Practical implementation . . . . .	104
4.2.4. Technical considerations: aliasing and Doppler resolution . . . . .	106
4.2.5. CW Doppler versus pulsed Doppler . . . . .	107
4.3. Color flow imaging (CFI) . . . . .	108
4.3.1. An extension from single-gate pulsed Doppler . . . . .	109
4.3.2. Principles of color pixel estimation . . . . .	110
4.3.3. Doppler power estimation and mapping . . . . .	111
4.3.4. Imaging considerations . . . . .	112
4.4. New flow mapping techniques . . . . .	114
4.4.1. B-flow imaging . . . . .	114
4.4.2. Flow vector estimation . . . . .	116
4.4.3. High frame rate flow imaging . . . . .	117
4.4.4. Flow mapping in 3D . . . . .	118
4.5. Summary . . . . .	119
4.6. References . . . . .	120
<b>Chapter 5. Cardiac Ultrasound Imaging . . . . .</b>	<b>123</b>
Konstantina PAPANGELOPOULOU, Marta ORLOWSKA, Sjoerd NOOIJENS and Jan D'HOOGE	
5.1. Introduction to cardiac ultrasound . . . . .	123
5.1.1. Heart disease, anatomy and function . . . . .	124
5.1.2. Typical clinical measurements . . . . .	127
5.1.3. Unmet clinical needs . . . . .	134
5.2. High-frame-rate imaging (in 2D) . . . . .	135
5.2.1. Multi-line transmit . . . . .	135
5.2.2. Plane waves and diverging waves . . . . .	137
5.2.3. Clinical potential . . . . .	139
5.3. Volumetric imaging . . . . .	140
5.3.1. Why 3DUS of the heart . . . . .	141
5.3.2. Ideal configuration for 3DUS of the heart . . . . .	142
5.3.3. Hardware challenges . . . . .	142

---

5.3.4. Hardware – multiplexing . . . . .	143
5.3.5. Hardware – sparse arrays . . . . .	144
5.3.6. Hardware – motorized probes and motion tracking . . . . .	145
5.3.7. Beamforming – challenges and solutions . . . . .	146
5.3.8. Software challenges . . . . .	148
5.4. References . . . . .	148
<b>Chapter 6. Ultrasound Contrast Agents: Microvascular Characterization . . . . .</b>	<b>159</b>
Simona TURCO, Peiran CHEN, Andrej LYSHCHIK, Ahmed EL KAFFAS and Massimo MISCHI	
6.1. Introduction . . . . .	159
6.2. Ultrasound contrast agents and their acoustic response . . . . .	162
6.2.1. Contrast-specific imaging . . . . .	164
6.2.2. Calibration to assess UCA concentration . . . . .	165
6.3. Analysis of UCA kinetics . . . . .	167
6.3.1. Analysis with a bolus injection . . . . .	168
6.3.2. Analysis with a constant infusion rate . . . . .	177
6.3.3. Spatial analysis . . . . .	179
6.3.4. 3D spatio-temporal analysis . . . . .	183
6.4. Current challenges and future perspectives . . . . .	188
6.5. References . . . . .	192
<b>Chapter 7. Resolution Limits and Super-Resolution Imaging . . . . .</b>	<b>207</b>
Vincent HINGOT and Olivier COUTURE	
7.1. Introduction . . . . .	207
7.1.1. Scales in biology and medicine . . . . .	207
7.1.2. Resolution depends on wavelength and geometry . . . . .	209
7.1.3. The resolution penetration trade-off . . . . .	212
7.1.4. Surpassing the resolution penetration trade-off . . . . .	213
7.1.5. Super-resolution with single-molecule localization microscopy . . . . .	216
7.2. Ultrasound localization microscopy . . . . .	218
7.2.1. Microbubbles as contrast sources for localization microscopy . . . . .	218
7.2.2. The process of ultrasound localization microscopy . . . . .	220
7.2.3. Localization of individual and punctual sources . . . . .	222
7.2.4. Inter-frame tracking of moving microbubbles . . . . .	224
7.2.5. Visualization of ultrasound localization microscopy data . . . . .	225
7.2.6. Comparison with micro-CT for ground truth . . . . .	226
7.3. Topics in ultrasound localization microscopy . . . . .	227
7.3.1. Topics in ultrasound localization microscopy . . . . .	227
7.3.2. Definition and measurement of the resolution . . . . .	227

---

7.3.3. Common artifacts and compensation methods . . . . .	229
7.3.4. From 2D to 3D ultrasound localization microscopy . . . . .	231
7.3.5. Artificial intelligence . . . . .	232
7.4. Perspectives and challenges . . . . .	233
7.4.1. Applications of super-resolution ultrasound . . . . .	233
7.4.2. Upcoming challenges and perspectives . . . . .	237
7.5. References . . . . .	240
<b>Chapter 8. Sources of Image Degradation and their Correlation in Single-sided Ultrasound Imaging of Heterogeneous Tissues . . . . .</b>	249
Guillaume RENAUD, Danai E. SOULIOTI and Gianmarco PINTON	
8.1. Introduction . . . . .	249
8.2. Sources of image degradation . . . . .	250
8.2.1. Aberration and aberrators . . . . .	251
8.2.2. Multiple scattering (reverberation) . . . . .	256
8.2.3. Importance of the ultrasound frequency . . . . .	256
8.2.4. Illustration of the impact of aberration and multiple scattering on image quality with numerical simulations . . . . .	257
8.2.5. Anisotropic elasticity in bone . . . . .	261
8.2.6. Attenuation heterogeneity (shadowing and enhancement) . . . . .	263
8.3. Correction methods . . . . .	265
8.3.1. Need for correction techniques in diagnostic ultrasound . . . . .	265
8.3.2. Correction of phase aberration . . . . .	266
8.3.3. Correction of anisotropic elasticity in bone . . . . .	273
8.3.4. Reduction of multiple scattering with tissue harmonic imaging . . . . .	274
8.4. Current limitations for correcting the sources of image degradation and future . . . . .	277
8.4.1. Need for matrix arrays and high computational power . . . . .	277
8.4.2. Real-time versus offline aberration correction . . . . .	277
8.4.3. Blood flow quantification . . . . .	278
8.5. References . . . . .	278
<b>Chapter 9. Tomography and Spectroscopy: Photoacoustics . . . . .</b>	285
Théotime LUCAS and Jérôme GATEAU	
9.1. Combining ultrasound with optical waves. . . . .	285
9.1.1. Optical properties of biological tissue. . . . .	286
9.1.2. Interaction between optical and ultrasound waves . . . . .	287
9.2. Generation and tomographic detection of ultrasound in photoacoustic imaging . . . . .	288
9.2.1. Optical generation of ultrasound waves in biological tissues . . . . .	288
9.2.2. Tomographic ultrasound detection . . . . .	292
9.2.3. Photoacoustic image reconstruction . . . . .	299

9.3. Multispectral photoacoustic imaging . . . . .	301
9.3.1. Separation of optical absorbers with different absorption spectra . . . . .	301
9.3.2. Endogenous and exogenous absorbers . . . . .	303
9.4. Conclusion and perspectives . . . . .	308
9.5. References . . . . .	309
<b>Glossary</b> . . . . .	315
<b>List of Authors</b> . . . . .	331
<b>Index</b> . . . . .	335
