

## Table of Contents

<b>Introduction</b> . . . . .	ix
<b>Chapter 1. Basis of the TLM Method: the 2D TLM Method</b> . . . . .	1
1.1. Historical introduction. . . . .	1
1.2. 2D simulation . . . . .	5
1.2.1. Parallel node . . . . .	5
1.2.2. Series node . . . . .	8
1.2.3. Simulation of inhomogeneous media with losses . . . . .	9
1.2.4. Scattering matrices . . . . .	11
1.2.5. Boundary conditions . . . . .	14
1.2.6. Dielectric interface passage conditions . . . . .	15
1.2.7. Dispersion of 2D nodes. . . . .	17
1.3. The TLM process. . . . .	22
1.3.1. Basic algorithm. . . . .	22
1.3.2. Excitation . . . . .	23
1.3.3. Output signal processing . . . . .	24
<b>Chapter 2. 3D Nodes</b> . . . . .	29
2.1. Historical development . . . . .	29
2.1.1. Distributed nodes . . . . .	29
2.1.2. Asymmetrical condensed node (ACN) . . . . .	30
2.1.3. The symmetrical condensed node (SCN) . . . . .	31
2.1.4. Other types of nodes . . . . .	33

2.2. The generalized condensed node . . . . .	37
2.2.1. General description . . . . .	37
2.2.2. Derivation of 3D TLM nodes . . . . .	41
2.2.3. Scattering matrices . . . . .	46
2.3. Time step . . . . .	54
2.4. Dispersion of 3D nodes . . . . .	55
2.4.1. Theoretical study in simple cases . . . . .	56
2.4.2. Case of inhomogeneous media. . . . .	60
2.5. Absorbing walls . . . . .	60
2.5.1. Matched impedance . . . . .	61
2.5.2. Segmentation techniques . . . . .	62
2.5.3. Perfectly matched layers . . . . .	62
2.5.4. Optimization of the PML layer profile. . . . .	65
2.5.5. Anisotropic and dispersive layers . . . . .	67
2.5.6. Conclusion . . . . .	70
2.6. Orthogonal curvilinear mesh . . . . .	70
2.6.1. 3D TLM curvilinear cell. . . . .	70
2.6.2. The TLM algorithm . . . . .	73
2.6.3. Scattering matrices for curvilinear nodes . . . . .	75
2.6.4. Stability conditions and the time step . . . . .	78
2.6.5. Validation of the algorithm . . . . .	79
2.7. Non-Cartesian nodes . . . . .	81
<b>Chapter 3. Introduction of Discrete Elements and Thin Wires in the TLM Method. . . . .</b>	<b>85</b>
3.1. Introduction of discrete elements. . . . .	85
3.1.1. History of 2D TLM . . . . .	85
3.1.2. 3D TLM . . . . .	89
3.1.3. Application example: modeling of a p-n diode. . . . .	100
3.2. Introduction of thin wires . . . . .	105
3.2.1. Arbitrarily oriented thin wire model . . . . .	106
3.2.2. Validation of the arbitrarily oriented thin wire model . . . . .	119
<b>Chapter 4. The TLM Method in Matrix Form and the Z Transform . . . . .</b>	<b>123</b>
4.1. Introduction . . . . .	123

4.2. Matrix form of Maxwell's equations . . . . .	124
4.3. Cubic mesh normalized Maxwell's equations . . . . .	125
4.4. The propagation process . . . . .	127
4.5. Wave-matter interaction. . . . .	130
4.6. The normalized parallelepipedic mesh Maxwell's equations . . . . .	133
4.7. Application example: plasma modeling . . . . .	136
4.7.1. Theoretical model . . . . .	136
4.7.2. Validation of the TLM simulation . . . . .	139
4.8. Conclusion . . . . .	144
<b>APPENDICES . . . . .</b>	<b>145</b>
<b>Appendix A. Development of Maxwell's Equations using the Z Transform with a Variable Mesh . . . . .</b>	<b>147</b>
<b>Appendix B. Treatment of Plasma using the Z Transform for the TLM Method . . . . .</b>	<b>155</b>
<b>Bibliography . . . . .</b>	<b>161</b>
<b>Index . . . . .</b>	<b>171</b>
