PREFACE	xi
Gérald KEMBELLEC, Ghislaine CHARTRON and Imad SALEH	
CHAPTER 1. GENERAL INTRODUCTION TO RECOMMENDER SYSTEMS	1
Ghislaine CHARTRON and Gérald KEMBELLEC	
1.1. Putting it into perspective	1
1.2. An interdisciplinary subject	2
1.3. The fundamentals of algorithms.	4
1.3.1. Collaborative filtering	4
1.3.2. Content filtering.	7
1.3.3. Hybrid methods	9
1.3.4. Conclusion on historical recommendation models	11
1.4. Content offers and recommender systems.	11
1.4.1. Culture and recommender systems.	11
1.4.2. Recommender systems and the e-commerce of content	16
1.4.3. The behavior of users	18
1.5. Current issues	19
1.6. Bibliography	19
CHAPTER 2. UNDERSTANDING USERS' EXPECTATIONS FOR RECOMMENDER SYSTEMS: THE CASE OF SOCIAL MEDIA	25
Jean-Claude DOMENGET and Alexandre COUTANT	
2.1. Introduction: the omnipresence of recommender systems	25
2.2. The social approach to prescription.	27
2.2.1. The theory of the prescription and online interactions	27

2.2.2. Conditions for recognition of the prescription	29
2.2.3. The specificities of social media	30
2.3. Users who do not focus on the prescriptions of platforms	31
2.3.1. Facebook: the link, the type of activity and the context	32
2.3.2. Twitter: prescription between peers and explanation of prescription	38
2.3.3. Conditions for the recognition of a prescription: announcement and enunciation	44
2.4. A guide for considering recommender systems adapted to different forms of social media	45
2.5. Conclusion	48
2.6. Bibliography	49
CHAPTER 3. RECOMMENDER SYSTEMS AND SOCIAL NETWORKS: WHAT ARE THE IMPLICATIONS FOR DIGITAL MARKETING?	53
Maria MERCANTI-GUÉRIN	
3.1. Social recommendations: an ancient practice revived by the digital age	54
3.1.1. Recommendations: a difficult management for brands	55
3.1.2. Internet recommendations: social presence and personalized recommendations	55
3.2. Social recommendations: how are they used for e-commerce?	58
3.2.1. Efficiency of recommender systems with regard to the performance of e-commerce websites	58
3.2.2. Recommender systems used by social networks: from e-commerce to social commerce	59
3.3. Conclusion	66
3.4. Bibliography	68
CHAPTER 4. RECOMMENDER SYSTEMS AND DIVERSITY: TAKING ADVANTAGE OF THE LONG TAIL AND THE DIVERSITY OF RECOMMENDATION LISTS	71
Muriel FOULONNEAU, Valentin GROUÈS, Yannick NAUDET and Max CHEVALIER	
4.1. The stakes associated with diversity within recommender systems	72
4.1.1. Individual diversity or the individual perception of diversity	73

4.1.2. The stakes and impacts of aggregate diversity	74
4.2. Recommendation algorithms and diversity: trends, evaluation and optimization	77
4.2.1. The tendency for recommendation algorithms to focus on the head	78
4.2.2. The evaluation of diversity in recommender systems	80
4.2.3. Recommendation algorithms which favor individual diversity	81
4.2.4. Recommendation algorithms which favor aggregate diversity	81
4.2.5. The shift toward user-centered diversity approaches	82
4.3. Conclusion and new directions	85
4.4. Bibliography	87
CHAPTER 5. iSoNTRE: INTELLIGENT TRANSFORMER OF SOCIAL NETWORKS INTO A RECOMMENDATION ENGINE ENVIRONMENT	93
Rana CHAMSI ABU QUBA, Salima HASSAS, Usama FAYYAD, Hammam CHAMSI and Christine GERTOSIO	
5.1. Summary	93
5.2. Introduction.	94
5.3. Latest developments, definition and history.	97
5.3.1. Collaborative filtering techniques	97
5.3.2. General use social networks: what do they contain?	97
5.3.3. Social recommendation	99
5.3.4. The recommendation of concepts	100
5.4. iSoNTRE	101
5.4.1. iSoNTRE: transformer of social networks	102
5.4.2. iSoNTRE: the core of recommendation.	107
5.5. Experiments	110
5.5.1. The preparation of data	110
5.5.2. Testing methodology.	110
5.5.3. The creation of avatars.	111
5.5.4. Results	112
5.5.5. Discussion	113
5.6. Conclusion	114
5.7. Bibliography	115

CHAPTER 6. A TWO-LEVEL RECOMMENDATION APPROACH FOR DOCUMENT SEARCH.	119
Manel HMIMIDA and Rushed KANAWATI	
6.1. Introduction.	119
6.2. Tag recommendation: a brief state of the art	120
6.3. The hypertagging system.	122
6.3.1. Metadata	122
6.3.2. Architecture	123
6.4. Recommendation approach	124
6.4.1. Presentation	124
6.4.2. Recommendation algorithm.	126
6.5. Evaluation.	127
6.5.1. Generation of facets	127
6.5.2. Generation of association rules.	129
6.5.3. Evaluation of recommendation rules	130
6.6. Conclusion	131
6.7. Bibliography	132
CHAPTER 7. COMBINING CONFIGURATION AND RECOMMENDATION TO ENABLE AN INTERACTIVE GUIDANCE OF PRODUCT LINE CONFIGURATION	135
Raouia TRIKI, Raúl MAZO and Camille SALINESI	
7.1. Introduction.	135
7.2. Context	137
7.2.1. Configuration	137
7.2.2. Recommendation	139
7.2.3. Obstacles and challenges of interactive PL configuration	141
7.3. Overview of the proposed approach	142
7.4. Preliminary evaluation	148
7.5. Discussion and related work.	148
7.5.1. Recommendation techniques	148
7.6. Conclusion and future work	151
7.7. Bibliography	151
CHAPTER 8. SEMIO-COGNITIVE SPACES: THE FRONTIER OF RECOMMENDER SYSTEMS.	157
Hakim HACHOUR, Samuel SZONIECKY and Safia ABOUAD	
8.1. Introduction.	157
8.2. Latest developments: finalized activities, recommender systems and the relevance of information	159
8.2.1. Cognitive dynamics of finalized activities	159

8.2.2. The foundations of recommender systems	161
8.2.3. What information relevance?	166
8.3. Observable interests for decision theory: a combination of content-based, collaboration- based and knowledge-based recommendations	169
8.3.1. Methodology: meta-analysis and modeling of the process	169
8.3.2. Analysis and modeling of a macro-process for responding to a call for R&D projects	171
8.3.3. Analysis and model of a socio-organizational tool for the management of customer complaints	173
8.4. Discussion and conclusions	177
8.4.1. Discussion: the performance of the filtering methods and semio-cognitive criteria for relevance	177
8.5. Conclusions: recommender systems linked to finalized activities	181
8.5.1. The localization of activities and geographical information systems: a new kind of data	182
8.5.2. Transparency of the use of personal data, data protection and ownership	183
8.6. Acknowledgments	185
8.7. Bibliography	185
CHAPTER 9. THE FRENCH-SPEAKING LITERARY PRESCRIPTION MARKET IN NETWORKS	191
Louis WIART	
9.1. Introduction.	191
9.2. The economy of prescription	193
9.2.1. The notion of prescription.	193
9.2.2. From the advisors market to the prescription market.	194
9.3. Methodology	196
9.4. The competitive structure of the market of online social networks of readers.	197
9.4.1. Pure player networks and the audience strategy	199
9.4.2. Amateur networks and the survival strategy	201
9.4.3. Backed networks and the hybridization strategy.	202
9.5. The organization of prescription	204
9.5.1. Social prescription	205
9.5.2. Editorial prescription.	206
9.5.3. Algorithmic prescription	207

9.6. Conclusion: what legitimacy for literary prescription?	208
9.7. Appendix: list of interviews undertaken	210
9.8. Bibliography	210
CHAPTER 10. PRESENTATION OF OFFERED SERVICES: BABELIO, A RECOMMENDATION ENGINE DEDICATED TO BOOKS	213
Vassil STEFANOV, Guillaume TEISSEIRE and Pierre FRÉMAUX	
10.1. Introduction	213
10.2. The problem of qualitative pertinence	216
10.3. The problem of quantitative pertinence.	217
10.4. Balancing recall and precision	217
10.5. The issue of sparse data	218
10.6. Performance and scalability	218
10.7. A few issues specific to books	219
CHAPTER 11. PRESENTATION OF THE OFFER OF SERVICES: NOMAO, RECOMMENDER SYSTEMS AND INFORMATION SEARCH	221
Estelle DELPECH, Laurent CANDILLIER and Étienne CHAI	
11.1. Introduction: the actors of Internet recommendation.	221
11.2. Approaches to recommendation	222
11.3. Nomao: a local outlets search and recommendation engine	223
11.3.1. Popularity score	223
11.3.2. Affinity score	224
11.3.3. Social recommendation	225
11.4. Prospects: the move toward interactive recommender systems	225
11.5. Appendix	226
LIST OF AUTHORS	227
INDEX	231
