# Contents

**INTRODUCTION** . . . . . vii

**CHAPTER 1. VIDEO CODING** . . . . . 1

1.1. Video coding . . . . . 1
1.2. Video coding standards . . . . . 3
1.2.1. The MPEG video coding standard . . . . . 4
1.2.2. H.264/MPEG-4 AVC . . . . . 8
1.2.3. H.264 SVC . . . . . 10
1.2.4. H.264 MVC . . . . . 12
1.3. Rate control . . . . . 15
1.4. Summary . . . . . 16

**CHAPTER 2. VIDEO TRAFFIC MODELING** . . . . . 19

2.1. The AR models . . . . . 19
2.1.1. Review of the AR process . . . . . 20
2.1.2. Survey of AR video traffic models . . . . . 22
2.2. Models based on Markov processes . . . . . 32
2.2.1. Review of Markov process models . . . . . 33
2.2.2. Survey of Markov process models . . . . . 35
2.2.3. Summary . . . . . 42
2.3. Self-similar models . . . . . 43
2.3.1. A survey of self-similar models for video traffic . . . . . 44
2.3.2. Summary . . . . . 46
2.4. Wavelet-based models . . . . . 47
2.4.1. Survey of wavelet-based video traffic models . . . . . 47
2.4.2. Summary . . . . . 49
2.5. Other approaches . . . . . 50
2.5.1. The M/G/$\infty$ process . . . . . 50
2.5.2. The SARIMA model . . . . . 51

2.5.3. TES-based models . . . . . 53
2.5.4. Summary . . . . . 54
2.6. Video traffic models for layered scalable video . . . . . 54
2.6.1. Summary . . . . . 57
2.7. Video traffic models for three-dimensional video . . . . . 58
2.7.1. A video traffic model for MVC video . . . . . 60
2.8. Conclusion . . . . . 62

**CHAPTER 3. EVALUATION OF VIDEO TRAFFIC MODELS FOR H.264 AVC VIDEO** . . . . . 65

3.1. Model implementation . . . . . 67
3.1.1. The DAR(1) model . . . . . 67
3.1.2. A frame-based AR(2) model . . . . . 69
3.1.3. A Markov-modulated gamma model . . . . . 70
3.1.4. A wavelet model . . . . . 72
3.2. Experimental setup . . . . . 73
3.3. Frame size distribution and ACF comparisons . . . . . 74
3.4. QoS evaluation . . . . . 81
3.4.1. End-to-end delay . . . . . 81
3.4.2. Jitter . . . . . 82
3.4.3. Packet loss . . . . . 83
3.4.4. The simulation model . . . . . 84
3.4.5. Results . . . . . 86
3.5. Conclusion . . . . . 94

**CHAPTER 4. EVALUATION OF VIDEO TRAFFIC MODEL FOR H.264 MVC VIDEO** . . . . . 97

4.1. A video traffic model for MVC video . . . . . 97
4.2. Experimental setup . . . . . 99
4.3. Results . . . . . 100
4.3.1. Q–Q plots and ACF comparisons . . . . . 100
4.3.2. QoS evaluation . . . . . 100
4.4. Conclusion . . . . . 113

**CONCLUSION** . . . . . 115

**APPENDIX** . . . . . 119

**GLOSSARY** . . . . . 131

**BIBLIOGRAPHY** . . . . . 135

**INDEX** . . . . . 145
