INTRODUCTION . . . . .	ix
<b>CHAPTER 1. THE EMERGENCE OF MEDICAL INFORMATION IN THE FACE OF PERSONAL AND SOCIETAL ETHICAL CHALLENGES . . . . .</b>	<b>1</b>
1.1. An information-consuming society . . . . .	2
1.2. e-Health, m-health, the Quantified Self and Big Data . . . . .	5
1.3. Medical secrecy in the face of the computerization of healthcare data . . . . .	18
1.3.1. Regulatory characteristics of medical secrecy . . . . .	19
1.3.2. Protection of healthcare data . . . . .	24
1.4. Cultural evolution of mentalities surrounding legitimacy of information . . . . .	28
1.5. Processing of personal data in law . . . . .	30
1.5.1. European regulations concerning the processing of medical data . . . . .	32
1.5.2. American legal framework surrounding personal healthcare data . . . . .	39
1.5.3. Laws pertaining to personal data in Asia . . . . .	42
<b>CHAPTER 2. ETHICAL MODELING: FROM THE DESIGN TO THE USE OF AN INFORMATION SYSTEM . . . . .</b>	<b>45</b>
2.1. Info-ethics: data on practical wisdom . . . . .	47
2.1.1. Epistemological illumination around the pyramid of knowledge . . . . .	48
2.1.2. From data to knowledge through an information system . . . . .	52
2.1.3. Quality and choice of medical information . . . . .	56
2.2. Identification of method used to develop the ethical analysis model . . . . .	61
2.3. Development of the ethical analysis space . . . . .	68
2.4. Presentation of the ethical model . . . . .	74
2.4.1. Ethical cube of an accepted contingency . . . . .	75
2.4.2. Ethical model of information system in the doctor–patient relationship . . . . .	78
2.4.3. Ethical modeling of medical communication . . . . .	88

2.4.4. Process of creation of practical wisdom via neo-Platonic systemic ethical modeling . . . . .	95
2.4.5. Ethical inductive algorithmic governance ( $\Psi$ , G, $\Phi$ ) . . . . .	108
2.4.6. Toward a selective ranking of medical data . . . . .	113
<b>CHAPTER 3. USES OF THIS ETHICAL MODEL. . . . .</b>	<b>119</b>
3.1. Implementing the ethical model. . . . .	119
3.1.1. Implementing the model on the major aims of an information system . . . . .	121
3.1.2. Implementation of the model in the general creation of an information system . . . . .	131
3.2. Presentation of the study's questionnaires . . . . .	131
3.3. Necessary environmental changes for healthcare information systems: recommendations and actions. . . . .	134
3.3.1. From a structural and technological perspective . . . . .	137
3.3.2. From a strategic and methodological perspective . . . . .	141
3.3.3. From an organizational and regulatory perspective . . . . .	146
3.3.4. From a relational and cultural perspective. . . . .	153
3.4. Creating an ethical charter on the "ideal" computational tool for a healthcare establishment. . . . .	158
3.4.1. Missions and areas of action . . . . .	158
3.4.2. Contents . . . . .	160
<b>CHAPTER 4. ETHICS-ORIENTED PERSONALIZED MEDICINE. . . . .</b>	<b>165</b>
4.1. The evolution of society toward an ethical ideal based on information .	166
4.2. The doctor–patient–IS triangulation. . . . .	174
4.2.1. Man–machine interface. . . . .	175
4.2.2. Data compression. . . . .	178
4.2.3. Flexibility and technical adaptation to the users . . . . .	180
4.2.4. Shared knowledge engineering . . . . .	182
4.3. Ethical use of an information system in healthcare . . . . .	184
4.4. Ethics-oriented personalized medicine . . . . .	189
4.4.1. Value of management . . . . .	190
4.4.2. Ethical management . . . . .	191
4.5. Tool for the establishment and constant improvement of information systems for ethical practice in hospitals . . . . .	194
4.5.1. Construction of the dashboards . . . . .	195
4.5.2. Methodology of implementation and use . . . . .	212
<b>CONCLUSIONS . . . . .</b>	<b>221</b>
<b>APPENDIX 1 . . . . .</b>	<b>225</b>

<b>APPENDIX 2.....</b>	<b>229</b>
<b>APPENDIX 3.....</b>	<b>233</b>
<b>APPENDIX 4.....</b>	<b>235</b>
<b>APPENDIX 5.....</b>	<b>243</b>
<b>APPENDIX 6.....</b>	<b>245</b>
<b>BIBLIOGRAPHY.....</b>	<b>247</b>
<b>INDEX.....</b>	<b>261</b>
