<b>Introduction</b> . . . . .	ix
<b>Chapter 1. Bioreactors</b> . . . . .	1
1.1. Introduction . . . . .	1
1.1.1. What is a bioreactor? . . . . .	1
1.1.2. Classification of biological reactors . . . . .	2
1.1.3. A brief reminder of microbiology . . . . .	3
1.2. Modeling of biological reactions . . . . .	4
1.2.1. Regarding the state variables of the model . . . . .	4
1.2.2. Biological processes and reaction scheme . . . . .	8
1.2.3. Chemostat equations . . . . .	11
1.2.4. Biological kinetics . . . . .	14
1.2.5. The benefits of the chemostat . . . . .	16
1.3. Toward “a little more” realism . . . . .	17
1.3.1. Extensions . . . . .	17
1.3.2. pH and physicochemical equilibria . . . . .	20
1.3.3. Spatialization . . . . .	22
1.3.4. Recent developments . . . . .	23
<b>Chapter 2. The Growth of a Single Species</b> . . . . .	25
2.1. Mathematical properties of the “minimal model” . . . . .	26
2.1.1. General properties . . . . .	26
2.1.2. The function $\mu$ is monotonic and bounded . . . . .	29
2.1.3. The function $\mu$ is not monotonic . . . . .	35
2.1.4. Interpretations . . . . .	38
2.2. Simulations . . . . .	40
2.2.1. Simulations in the phase space . . . . .	41
2.2.2. Transients . . . . .	43

---

2.3. Some extensions of the minimal model . . . . .	45
2.3.1. Presence of biomass in the feed . . . . .	46
2.3.2. Different dilutions . . . . .	49
2.3.3. Density-dependent growth rate and characteristic at equilibrium . . . . .	52
2.3.4. Yield depending on the density of the substrate . . . . .	58
2.4. Bibliographic notes . . . . .	61
<b>Chapter 3. Competitive Exclusion . . . . .</b>	<b>63</b>
3.1. The case of monotonic growth functions . . . . .	64
3.1.1. Steady states . . . . .	64
3.1.2. Possible steady-states . . . . .	65
3.1.3. Local stability of washout steady-state . . . . .	66
3.2. Competitive exclusion at steady-state . . . . .	67
3.2.1. Statement . . . . .	68
3.2.2. Species at steady-state according to the dilution rate . . . . .	68
3.2.3. Dynamics of proportions between species . . . . .	69
3.2.4. Conclusion . . . . .	73
3.3. Global stability . . . . .	73
3.3.1. A “graphical” proof for two species . . . . .	75
3.3.2. A proof for the general case . . . . .	76
3.4. The case of non-monotonic growth functions . . . . .	80
3.4.1. Growth set . . . . .	81
3.4.2. Study of steady-states . . . . .	82
3.4.3. Competitive exclusion . . . . .	82
3.4.4. Competition between two species . . . . .	83
3.4.5. Illustration and effect of a “bio-augmentation” . . . . .	84
3.5. Bibliographic notes . . . . .	88
<b>Chapter 4. Competition: the Density-Dependent Model . . . . .</b>	<b>93</b>
4.1. Chapter orientation . . . . .	93
4.2. Two-species competition . . . . .	96
4.2.1. Behavior of an isolated species . . . . .	97
4.2.2. Steady-state of two species in interaction . . . . .	98
4.2.3. Steady-state stability . . . . .	102
4.2.4. Simulations . . . . .	103
4.3. N-species competition: exclusive intraspecific competition . . . . .	104
4.3.1. Characteristic at equilibrium and coexistence . . . . .	106
4.3.2. Simulations . . . . .	110
4.4. N-species competition: the general case . . . . .	111
4.4.1. A particular density-dependent model . . . . .	112
4.4.2. Exclusive intraspecific competition . . . . .	113
4.4.3. Dominant intraspecific competition . . . . .	113
4.4.4. Undifferentiated competition . . . . .	114

---

4.4.5. Dominant intraspecific competition . . . . .	117
4.5. Bibliographic notes . . . . .	123
<b>Chapter 5. More Complex Models . . . . .</b>	<b>125</b>
5.1. Introduction . . . . .	125
5.2. Models with aggregated biomass . . . . .	126
5.2.1. Planktonic biomass versus aggregate biomass . . . . .	127
5.2.2. Coexistence between the two forms . . . . .	128
5.2.3. Coexistence steady-state . . . . .	129
5.2.4. Stability study . . . . .	133
5.2.5. The case of fast attachments/detachments . . . . .	134
5.2.6. Consideration of several species . . . . .	138
5.3. The “predator-prey” relationship in the chemostat . . . . .	139
5.3.1. Introduction . . . . .	139
5.3.2. The substrate-bacteria-predator “chain” . . . . .	140
5.3.3. The substrate-bacteria-predators trophic network . . . . .	143
5.3.4. Comparison to experimental data . . . . .	146
5.4. Bibliographic notes . . . . .	148
<b>Appendices . . . . .</b>	<b>151</b>
<b>Appendix 1. Differential Equations . . . . .</b>	<b>153</b>
<b>Appendix 2. Indications for the Exercises . . . . .</b>	<b>195</b>
<b>Bibliography . . . . .</b>	<b>217</b>
<b>Index . . . . .</b>	<b>225</b>
