<b>Acknowledgements</b>	xii
<b>Preface</b>	xiii
<b>Introduction</b>	xvii
<b>Part 1. Introduction to – and Reminders About – NFC</b>	1
<b>Introduction to Part 1</b>	3
<b>Chapter 1. Recap of the Principles Employed in NFC</b>	5
1.1. The physical fundaments of “contactless” and NFC	5
1.1.1. Phenomenon of propagation and radiation	5
1.1.2. Classification of fields and spatial regions	6
1.1.3. Spatial regions	6
1.1.4. Far field: $r \gg \lambda/2\pi$ (Fraunhofer zone)	6
1.1.5. Intermediary field: $r$ approximately equal to $\lambda$ (Fresnel zone)	7
1.1.6. Near field: $r \ll \lambda/2\pi$ (Rayleigh zone) and the origin of NFC	7
1.1.7. Remarks on contactless, RFID and NFC applications	7
1.2. The concept of NFC	9
1.2.1. Biot–Savart law	10

1.2.2. Field H at a point on the axis of a circular antenna . . . . .	10
1.2.3. Decrease in the field H as a function of “d” . . . . .	13
1.2.4. Field H at a point on the axis of a rectangular antenna . . . . .	14
<b>Chapter 2. Normative Constraints of NFC . . . . .</b>	<b>17</b>
2.1. Introduction . . . . .	17
2.1.1. Normative, regulatory and NFC market constraints . . . . .	17
2.1.2. A little bit of vocabulary . . . . .	18
2.1.3. Norm . . . . .	19
2.1.4. Standard . . . . .	19
2.2. Normative constraints . . . . .	19
2.2.1. Uplink from initiator to targets . . . . .	20
2.2.2. “Contactless” normative constraints on NFC device antennae . . . . .	27
2.3. Conclusion . . . . .	36
<b>Chapter 3. Regulatory Constraints and Recommendations . . . . .</b>	<b>39</b>
3.1. Regulatory constraints specific to NFC and NFC antennas . . . . .	39
3.1.1. State of RF regulations . . . . .	39
3.1.2. Constraints pertaining to radiation and pollution by NFC . . . . .	41
3.1.3. The ERC 70 03 recommendation and the ETSI 300 330 norm . . . . .	41
3.2. Constraints due to recommendations . . . . .	45
3.2.1. Exposure of the human body to EM fields . . . . .	46
3.2.2. Societal constraints due to individual freedoms (privacy) . . . . .	48
3.2.3. Environmental constraints . . . . .	50
3.3. Constraints of the NFC market . . . . .	52
3.3.1. NFC applications of short range devices . . . . .	52
3.3.2. Costs and market prices desired by users . . . . .	52
3.3.3. Beware of false advertising . . . . .	53

---

<b>Part 2. Constraints Due to the Field of Applications of NFC . . . . .</b>	55
<b>Introduction to Part 2 . . . . .</b>	57
<b>Chapter 4. Applicational Typologies of the NFC and their Consequences . . . . .</b>	59
4.1. Applicational typologies of the NFC . . . . .	59
4.1.1. Technologies . . . . .	59
4.1.2. “NFC Forum Devices” and “NFC Forum Tags” . . . . .	60
4.1.3. “Modes” of communication of an NFC Forum Device . . . . .	62
4.1.4. Role of an NFC Forum Device . . . . .	63
4.1.5. Applicational typological possibilities and their constraints . . . . .	64
4.2. Application consequences and their direct constraints . . . . .	67
4.2.1. Touch & Go typology . . . . .	67
4.2.2. Touch & Confirm typology . . . . .	67
4.2.3. Touch & Connect typology . . . . .	67
4.2.4. Touch & Explore typology . . . . .	68
<b>Chapter 5. Constraints Due to Fields of Application . . . . .</b>	69
5.1. Range of technical possibilities of applications . . . . .	69
5.1.1. In architectures and electronic functions . . . . .	69
5.1.2. Shapes, dimensions and form factors (publicity aside) . . . . .	70
5.1.3. Remarks and some clarifications about the table . . . . .	70
5.1.4. Targets/tags for the monitoring of long-distance races . . . . .	72
5.1.5. Targets/tags for monitoring luxury items . . . . .	72
5.2. Segmentation, typologies of markets, their problems and their incidences, and direct technical constraints on NFC devices . . . . .	73
5.2.1. Market sectors and typologies . . . . .	74
5.3. Mobile telephony . . . . .	75
5.4. Banks/money matters/payments . . . . .	77
5.5. Transport . . . . .	78

5.5.1. 1st case: card emulation mode in battery-assisted and then flat battery . . . . .	81
5.5.2. 2nd case: card emulation mode with battery out . . . . .	81
5.5.3. 3rd case: collisions and loading effects . . . . .	82
5.6. Automobiles . . . . .	82
5.6.1. Consumer electronics . . . . .	85
5.7. Healthcare. . . . .	88
5.8. Communicating objects. . . . .	89
5.8.1. NFC tablets . . . . .	89
5.8.2. NFC USB key . . . . .	90
5.8.3. NFC communication and promotional objects. . . . .	91
5.8.4. “Add-on” NFC devices, sticks, and stickers . . . . .	92
<b>Part 3. Applicational Constraints Needing to be Solved when Designing NFC Systems and their Antennas . . . . .</b>	95
<b>Introduction to Part 3 . . . . .</b>	97
<b>Chapter 6. Structural Constraints in NFC . . . . .</b>	99
6.1. Constraints due to the form factors of the antennas. . . . .	99
6.2. Constraints due to variations of the operating distance. . . . .	100
6.2.1. Distances and magnetic couplings . . . . .	100
6.2.2. Constraint of the maximum acceptable value of the quality coefficient Q of the initiator antenna . . . . .	100
6.4. Constraint of the value of return (retro) modulation voltage . . . . .	102
6.4.1. Passive Load Modulation (PLM) . . . . .	103
6.4.2. Active Load Modulation (ALM) . . . . .	106
<b>Chapter 7. Functional Applicational Constraints . . . . .</b>	111
7.1. Antenna tuning/detuning constraints . . . . .	111
7.1.1. The case of an initiator. . . . .	111
7.1.2. Electrical representation of the target . . . . .	112
7.1.3. “Tuned”, “untuned” and “detuned” mobile phones. . . . .	120
7.2. Constraints and influences of the environment . . . . .	124
7.2.1. Physical influence of the environment . . . . .	124

---

7.2.2. Impacts of the environment on the antenna and its performance . . . . .	124
7.2.3. Electrical fields E . . . . .	125
7.2.4. Magnetic field . . . . .	128
<b>Part 4. Conformity and Interoperability Constraints . . . . .</b>	<b>137</b>
<b>    Introduction to Part 4 . . . . .</b>	<b>139</b>
<b>    Chapter 8. Conformity Constraints . . . . .</b>	<b>141</b>
8.1. Conformity tests for NFC devices . . . . .	141
8.2. Norms of “conformity” tests for NFC IPx . . . . .	142
8.2.1. ISO 23917 tests (NFC IP1 protocol) . . . . .	143
8.2.2. ISO 22536 tests (NFC IP1 RF interface) . . . . .	143
8.3. Electrical characterizations of the initiator antenna . . . . .	146
8.3.1. The antenna’s inductance and resistance . . . . .	146
8.3.2. Quality coefficient . . . . .	149
8.3.3. Bandwidth . . . . .	149
8.3.4. Tuning of the antenna and its impedance matching . . . . .	149
8.4. Method of adjustment of the target antenna . . . . .	154
8.4.1. Absorption threshold, H_thr . . . . .	154
8.4.2. Absorption in reading mode, H_read . . . . .	154
8.4.3. Resonance frequency, f_res . . . . .	154
8.4.4. Bandwidth . . . . .	155
8.5. Measuring methods for use with the target . . . . .	155
8.6. Electrical measurements of the initiator antenna . . . . .	156
8.6.1. Measuring the magnetic field H radiated by the initiator . . . . .	156
8.6.2. Measurement of the quality coefficient – Q . . . . .	158
8.6.3. Measuring Q in the application . . . . .	162
8.6.4. Measuring the bandwidth in the application . . . . .	163
8.7. Method for adjustment of whole systems . . . . .	165
8.7.1. Measurements needing to be performed . . . . .	165
8.7.2. Order in which the measurements must be taken . . . . .	165
8.7.3. Energy domains, zero lines, and safe operating areas . . . . .	165
8.8. Measuring tools . . . . .	166

<b>Chapter 9. Interoperability Constraints</b>	169
9.1. Norms and interoperability	169
9.2. Problems of the tests; JNCF ISO vs EMV vs NFC Forum; etc.	170
9.2.1. EMV conformity tests	171
9.3. In practice: a few simple examples of measurements	178
9.3.1. Example 1	179
9.3.2. Example 2	181
9.3.3. Conformity tests of the NFC Forum	185
9.3.4. NFC Forum testing and certification methods for the lower levels	186
9.3.5. Testing the conformity of NFC with the CEN – <i>Comité européen de normalisation</i> (European Standardizing Committee)	187
9.3.6. What about overall interoperability?	188
<b>Conclusion</b>	189
<b>Bibliography</b>	197
<b>Index</b>	199
