<b>Preface</b> . . . . .	xi
<b>List of Abbreviations</b> . . . . .	xix
<b>Chapter 1. Mobile Network – Architecture</b> . . . . .	1
1.1. Functional architecture . . . . .	1
1.1.1. eNB entity . . . . .	3
1.1.2. MME entity . . . . .	4
1.1.3. SGW entity . . . . .	5
1.1.4. PGW entity . . . . .	6
1.1.5. HSS entity . . . . .	6
1.1.6. PCRF entity . . . . .	7
1.2. Protocol architecture . . . . .	8
1.2.1. Long-term evolution-Uu interface . . . . .	8
1.2.2. S1 interface . . . . .	10
1.2.3. S11 interface. . . . .	11
1.2.4. S5 and S8 interfaces . . . . .	11
1.2.5. S10 interface. . . . .	12
1.2.6. SGi interface. . . . .	12
1.2.7. X2 interface . . . . .	12
1.2.8. S6a interface. . . . .	13
1.2.9. Gx interface . . . . .	13
1.2.10. Rx interface . . . . .	14
1.2.11. S9 interface. . . . .	14
<b>Chapter 2. Mobile Network – Signaling Protocols</b> . . . . .	15
2.1. NAS protocol. . . . .	15
2.1.1. EMM messages . . . . .	16

2.1.2. ESM messages . . . . .	19
2.2. RRC protocol . . . . .	21
2.2.1. System information . . . . .	24
2.2.2. Control of RRC connection . . . . .	25
2.2.3. Measurement report . . . . .	27
2.3. S1-AP protocol . . . . .	28
2.3.1. Context management . . . . .	30
2.3.2. Bearer management . . . . .	31
2.3.3. Mobility management . . . . .	31
2.3.4. S1-MME interface management . . . . .	33
2.4. X2-AP protocol . . . . .	33
2.4.1. Mobility management . . . . .	34
2.4.2. Load management . . . . .	35
2.4.3. X2 interface management . . . . .	36
2.5. GTPv2-C protocol . . . . .	37
2.5.1. Bearer management . . . . .	39
2.5.2. Mobility management . . . . .	40
2.6. DIAMETER protocol . . . . .	41
2.6.1. S6a interface . . . . .	41
2.6.2. Gx interface . . . . .	42
2.6.3. Rx interface . . . . .	43
2.6.4. S9 interface . . . . .	44
<b>Chapter 3. Mobile Network – Procedures . . . . .</b>	<b>45</b>
3.1. Attachment . . . . .	45
3.2. Location update . . . . .	46
3.3. Session establishment . . . . .	49
3.3.1. Establishment of the default bearer . . . . .	51
3.3.2. Re-establishment of the default bearer . . . . .	54
3.3.3. Establishment of the dedicated bearer . . . . .	56
3.4. Handover . . . . .	59
3.4.1. Handover based on X2 . . . . .	60
3.4.2. Handover based on S1 . . . . .	62
<b>Chapter 4. Transport Network – MPLS-VPN Technology . . . . .</b>	<b>65</b>
4.1. MPLS network . . . . .	65
4.1.1. Architecture . . . . .	65
4.1.2. LSR tables . . . . .	66
4.1.3. PHP function . . . . .	68
4.1.4. MPLS header . . . . .	69
4.1.5. LDP protocol . . . . .	70

---

4.2. VPN function . . . . .	78
4.2.1. MPLS-VPN architecture . . . . .	78
4.2.2. Route distinguisher . . . . .	81
4.2.3. Route target . . . . .	81
4.2.4. Principles of operation . . . . .	83
<b>Chapter 5. Transport Network – VPLS Technology . . . . .</b>	<b>87</b>
5.1. Network architecture . . . . .	87
5.1.1. VPLS network . . . . .	87
5.1.2. H-VPLS network . . . . .	90
5.2. MAC address management . . . . .	90
5.3. EoMPLS header . . . . .	92
5.4. LDP protocol . . . . .	93
5.4.1. FEC parameter . . . . .	93
5.4.2. PW Status parameter . . . . .	95
5.4.3. Address Withdraw message . . . . .	95
5.5. MP-BGP protocol . . . . .	95
<b>Chapter 6. Transport Network – OTN Technology . . . . .</b>	<b>99</b>
6.1. OTN architecture . . . . .	99
6.1.1. OLT equipment . . . . .	101
6.1.2. Regenerator equipment . . . . .	102
6.1.3. OADM equipment . . . . .	103
6.1.4. OXC equipment . . . . .	104
6.2. Time-division multiplexing structure . . . . .	104
6.3. Over-head structure . . . . .	108
6.3.1. OTS module over-head structure . . . . .	108
6.3.2. OMS module over-head structure . . . . .	108
6.3.3. OCh module over-head structure . . . . .	109
6.3.4. OTU frame over-head structure . . . . .	109
6.3.5. ODU frame over-head structure . . . . .	111
6.3.6. OPU frame over-head structure . . . . .	112
6.4. GFP protocol . . . . .	113
6.4.1. GFP-F protocol . . . . .	113
6.4.2. GFP-T protocol . . . . .	115
<b>Chapter 7. Quality of Service – Principles . . . . .</b>	<b>117</b>
7.1. Introduction . . . . .	117
7.2. Parameters for the QoS . . . . .	118
7.2.1. Availability . . . . .	119
7.2.2. Admissibility . . . . .	121

---

7.2.3. Data transfer . . . . .	123
7.3. QoE characterization . . . . .	130
7.3.1. Application to voice . . . . .	130
7.3.2. Application to video . . . . .	133
<b>Chapter 8. Quality of Service – Mobile Network . . . . .</b>	<b>137</b>
8.1. Flow and bearer . . . . .	137
8.2. QoS characteristics . . . . .	137
8.2.1. QCI parameter. . . . .	138
8.2.2. ARP parameter . . . . .	140
8.2.3. Applying QoS. . . . .	140
8.3. Configuring QoS. . . . .	141
8.3.1. Default-bearer establishment . . . . .	141
8.3.2. Dedicated-bearer establishment . . . . .	144
<b>Chapter 9. Quality of Service – Transport Network . . . . .</b>	<b>149</b>
9.1. IP technology. . . . .	149
9.1.1. DSCP field. . . . .	149
9.1.2. DiffServ architecture. . . . .	153
9.2. Ethernet technology . . . . .	157
9.3. MPLS technology . . . . .	160
9.3.1. Support for DiffServ . . . . .	160
9.3.2. Interaction between markings. . . . .	161
9.4. Rate control. . . . .	163
9.5. Behavior. . . . .	166
9.5.1. Congestion avoidance . . . . .	166
9.5.2. Queue scheduling . . . . .	168
<b>Chapter 10. Security – Principles . . . . .</b>	<b>173</b>
10.1. Security services . . . . .	173
10.2. Encryption function . . . . .	174
10.2.1. AES algorithm. . . . .	174
10.2.2. Secret key generation. . . . .	178
10.2.3. RSA algorithm. . . . .	180
10.2.4. Public key distribution . . . . .	181
10.3. Hash function. . . . .	182
10.3.1. MD5 algorithm . . . . .	183
10.3.2. SHA algorithm. . . . .	186
10.3.3. HMAC function . . . . .	188

---

<b>Chapter 11. Security – Mobile Network</b> . . . . .	193
11.1. Security architecture . . . . .	193
11.2. Mutual authentication . . . . .	194
11.3. NAS security . . . . .	197
11.4. LTE-Uu security . . . . .	199
11.5. Security context . . . . .	201
<b>Chapter 12. Security – Transport Network</b> . . . . .	205
12.1. IPSec architecture . . . . .	205
12.1.1. Security headers . . . . .	207
12.1.2. Security association . . . . .	212
12.1.3. PMTU processing . . . . .	214
12.2. IKEv2 protocol . . . . .	215
12.2.1. Message header . . . . .	215
12.2.2. Blocks . . . . .	217
12.2.3. Procedure . . . . .	221
12.4. Security architecture over S1 interface . . . . .	225
12.4.1. RA/CA entity . . . . .	226
12.4.2. Enrolment procedure . . . . .	226
<b>Chapter 13. Synchronization – Principles</b> . . . . .	229
13.1. Synchronization types . . . . .	229
13.2. Clock characteristics . . . . .	230
13.2.1. Method based on synchronous physical layer . . . . .	230
13.2.2. Packet-based method . . . . .	233
13.3. Synchronization requirements . . . . .	234
13.3.1. Operation modes . . . . .	234
13.3.2. Interference management . . . . .	239
<b>Chapter 14. Synchronization – SyncE Mechanism</b> . . . . .	241
14.1. Synchronization network architecture . . . . .	241
14.1.1. Entities . . . . .	241
14.1.2. Synchronization chain . . . . .	243
14.2. Control channel ESMC . . . . .	244
14.2.1. SSM message . . . . .	245
14.2.2. OSSP header . . . . .	246
14.2.3. Ethernet header . . . . .	247
14.3. Network architecture based on EEC functions . . . . .	247
14.3.1. Ring network with two PRC sources . . . . .	247

14.3.2. Ring network with one SSU source and one SSU sink . . . . .	249
14.3.3. Ring network with one SSU source and one SSU filter . . . . .	251
<b>Chapter 15. Synchronization – IEEE 1588 Mechanism.</b> . . . . .	<b>253</b>
15.1. Synchronization network architecture . . . . .	253
15.2. Time synchronization principles. . . . .	256
15.2.1. Version 1 of the time synchronization . . . . .	256
15.2.2. Version 2 of the time synchronization . . . . .	258
15.3. PTP messages. . . . .	261
15.3.1. Message format . . . . .	261
15.4.2. Message transport . . . . .	266
<b>Bibliography.</b> . . . . .	<b>269</b>
<b>Index.</b> . . . . .	<b>275</b>
