

## Table of Contents

<b>Foreword</b> . . . . .	<b>xi</b>
Pierre-Noël FAVENNEC	
<b>Acronyms</b> . . . . .	<b>xiii</b>
<b>Introduction</b> . . . . .	<b>xix</b>
<b>Chapter 1. Light</b> . . . . .	<b>1</b>
<b>Chapter 2. History of Optical Telecommunications</b> . . . . .	<b>7</b>
2.1. Some definitions . . . . .	7
2.1.1. Communicate . . . . .	7
2.1.2. Telecommunication . . . . .	7
2.1.3. Optical telecommunication . . . . .	8
2.1.4. Radio frequency or Hertzian waves . . . . .	8
2.2. The prehistory of telecommunications . . . . .	8
2.3. The optical aerial telegraph . . . . .	11
2.4. The code . . . . .	14
2.5. The optical telegraph . . . . .	18
2.5.1. The heliograph or solar telegraph . . . . .	18
2.5.2. The night and day optical telegraph . . . . .	19
2.6. Alexander Graham Bell's photophone . . . . .	20
<b>Chapter 3. The Contemporary and the Everyday Life of Wireless Optical Communication</b> . . . . .	<b>25</b>
3.1. Basic principles . . . . .	25
3.1.1. Operating principle . . . . .	26
3.1.1.1. Block diagram . . . . .	26
3.1.2. The optical propagation . . . . .	27

3.1.2.1. Line of sight propagation – LOS . . . . .	27
3.1.2.2. Wide line of sight – WLOS . . . . .	29
3.1.2.3. Diffusion propagation (DIF) and controlled diffusion . . . . .	30
3.1.3. Elements of electromagnetics. . . . .	31
3.1.3.1. Maxwell's equations in an unspecified medium . . . . .	32
3.1.3.2. Propagation of electromagnetic waves in an isotropic medium . . . . .	34
3.1.3.3. Energy associated to a wave . . . . .	36
3.1.3.4. Propagation of a wave in a non-homogeneous medium . . . . .	38
3.1.3.5. Coherent and incoherent waves . . . . .	38
3.1.3.6. Relations between electromagnetism and geometrical optics . . . . .	40
3.1.3.7. The electromagnetic spectrum . . . . .	43
3.1.3.8. Units and scales . . . . .	43
3.1.3.9. Examples of sources in the visible and near visible light . . . . .	47
3.1.3.10. Conclusion. . . . .	49
3.1.4. Models for data exchange . . . . .	50
3.1.4.1. The OSI model . . . . .	50
3.1.4.2. The DoD model . . . . .	52
3.2. Wireless optical communication . . . . .	53
3.2.1. Outdoor wireless optical communication . . . . .	53
3.2.1.1. Earth-satellite wireless optical communication . . . . .	53
3.2.1.2. Intersatellite wireless optical communication . . . . .	54
3.2.1.3. Free-space optic . . . . .	55
3.2.2. Indoor wireless optical communication . . . . .	55
3.2.2.1. The remote controller . . . . .	56
3.2.2.2. The visible light communication . . . . .	57
3.2.2.3. The IrDA solutions . . . . .	57
3.2.2.4. The indoor wireless optical network (WON) . . . . .	57
3.2.3. The institutional and technical ecosystem . . . . .	59
<b>Chapter 4. Propagation Model . . . . .</b>	<b>63</b>
4.1. Introduction . . . . .	63
4.2. Baseband equivalent model . . . . .	63
4.2.1. Radio propagation model . . . . .	64
4.2.2. Model of free-space optical propagation . . . . .	66
4.2.3. The signal-to-noise ratio . . . . .	71
4.3. Diffuse propagation link budget in a confined environment . . . . .	73
4.3.1. Intersymbol interference . . . . .	73
4.3.2. Reflection models . . . . .	76
4.3.2.1. Specular reflection . . . . .	76
4.3.2.2. Diffuse reflection . . . . .	76
4.3.2.3. Lambert's model . . . . .	77

4.3.2.4. Phong's model . . . . .	79
4.3.3. Modeling . . . . .	81
<b>Chapter 5. Propagation in the Atmosphere . . . . .</b>	<b>85</b>
5.1. Introduction . . . . .	85
5.2. The atmosphere . . . . .	86
5.2.1. The atmospheric gaseous composition . . . . .	86
5.2.2. Aerosols . . . . .	87
5.3. The propagation of light in the atmosphere . . . . .	87
5.3.1. Molecular absorption. . . . .	89
5.3.2. Molecular scattering . . . . .	89
5.3.3. Aerosol absorption . . . . .	90
5.3.4. Aerosol scattering. . . . .	91
5.4. Models. . . . .	93
5.4.1. Kruse and Kim models. . . . .	93
5.4.2. Bataille's model. . . . .	94
5.4.2.1. Molecular extinction . . . . .	94
5.4.2.2. Aerosol extinction . . . . .	95
5.4.3. Al Naboulsi's model . . . . .	95
5.4.4. Rain attenuation. . . . .	96
5.4.5. Snow attenuation . . . . .	97
5.4.6. Scintillation . . . . .	98
5.5. Experimental set-up . . . . .	103
5.6. Experimental results. . . . .	104
5.6.1. Comparaison with Kruse and Kim model (850 nm) . . . . .	105
5.6.2. Comparaison with Al Naboulsi's model . . . . .	105
5.7. Fog, haze, and mist . . . . .	107
5.8. The runway visual range (RVR) . . . . .	108
5.8.1. The visibility. . . . .	108
5.8.2. Measuring instruments. . . . .	110
5.8.2.1. The transmissometer . . . . .	110
5.8.2.2. The scatterometer . . . . .	112
5.9. Calculating process of an FSO link availability . . . . .	114
5.10. Conclusion . . . . .	116
<b>Chapter 6. Indoor Optic Link Budget. . . . .</b>	<b>119</b>
6.1. Emission and reception parameters. . . . .	119
6.1.1. Transmission device: parameters. . . . .	121
6.1.2. Reception device . . . . .	125
6.2. Link budget for line of sight communication . . . . .	128
6.2.1. Geometrical attenuation . . . . .	128
6.2.2. Optical margin . . . . .	130

6.2.3. Coverage . . . . .	130
6.2.4. Reciprocity and not reciprocity of the channel. . . . .	131
6.3. Link budget for communication with retroreflectors. . . . .	132
6.3.1. Principle of operation . . . . .	132
6.3.2. Optical budget. . . . .	133
6.4. Examples of optical budget and signal-to-noise ratio (SNR) . . . . .	135
6.4.1. Examples of optical budget . . . . .	136
6.4.2. Examples of SNR and BER . . . . .	139
<b>Chapter 7. Immunity, Safety, Energy and Legislation . . . . .</b>	<b>141</b>
7.1. Immunity . . . . .	141
7.1.1. International references . . . . .	141
7.1.2. Type of laser classes . . . . .	143
7.1.3. Method for calculation. . . . .	146
7.2. The confidentiality of communication . . . . .	149
7.2.1. Physical confidentiality . . . . .	149
7.2.2. Numerical solution . . . . .	150
7.2.2.1. Cryptography . . . . .	150
7.2.2.2. Public and secret key cryptography . . . . .	151
7.2.2.3. Quantum cryptography . . . . .	151
7.2.2.4. Quantum telecommunications in free space . . . . .	152
7.2.2.5. Non-encrypted connections in confined space . . . . .	153
7.3. Energy . . . . .	153
7.4. Legislation . . . . .	154
7.4.1. Organization of regulation activities. . . . .	154
7.4.2. Regulation of wireless optical equipment. . . . .	155
<b>Chapter 8. Optics and Optronics . . . . .</b>	<b>157</b>
8.1. Overview . . . . .	157
8.2. Optronics: transmitters and receivers. . . . .	157
8.2.1. Overviews on materials and structures . . . . .	157
8.2.2. Light sources . . . . .	160
8.2.2.1. Light-emitting diodes (LEDs) and spontaneous emission . . . . .	161
8.2.2.2. White LEDs or visible light communication (VLC) LED. . . . .	162
8.2.2.3. The semiconductor laser structure . . . . .	163
8.2.2.4. Synthesis . . . . .	165
8.2.3. Optronics receivers. . . . .	166
8.2.3.1. Photovoltaic cells . . . . .	167
8.2.3.2. PIN photodiode. . . . .	168
8.2.3.3. Avalanche photodiode . . . . .	169
8.2.3.4. Metal–semiconductor–metal (MSM) structure . . . . .	170
8.3. Optics . . . . .	170

8.3.1. Transmitter optical device . . . . .	170
8.3.2. Receiver optical device . . . . .	171
8.3.3. Optical filtering . . . . .	174
8.3.3.1. Spatial filter or diaphragm. . . . .	174
8.3.3.2. Wavelength filters or attenuators . . . . .	174
8.3.4. Summary . . . . .	176
<b>Chapter 9. Data Processing . . . . .</b>	<b>177</b>
9.1. Introduction . . . . .	177
9.2. Modulation . . . . .	178
9.2.1. On-off keying (OOK) modulation . . . . .	178
9.2.2. The pulse position modulation . . . . .	180
9.2.3. The orthogonal frequency-division multiplexing (OFDM) . . . . .	181
9.2.4. The diversity: MIMO . . . . .	182
9.2.5. Summary . . . . .	184
9.3. The coding . . . . .	184
9.3.1. Principle and definitions . . . . .	184
9.3.1.1. Principle . . . . .	184
9.3.1.2. Definitions . . . . .	185
9.3.2. Example of coding . . . . .	186
9.3.2.1. Basic codes . . . . .	186
9.3.2.2. Block codes . . . . .	187
9.3.2.3. Convolutional codes . . . . .	191
9.3.3. Summary . . . . .	194
<b>Chapter 10. Data Transmission . . . . .</b>	<b>197</b>
10.1. Introduction . . . . .	197
10.1.1. Definition . . . . .	197
10.1.2. The access methods . . . . .	198
10.1.2.1. Time division multiple access . . . . .	198
10.1.2.2. Frequency division multiple access . . . . .	199
10.1.2.3. Code division multiple access . . . . .	199
10.1.2.4. Carrier sense multiple access . . . . .	199
10.1.2.5. Wavelength division multiple access . . . . .	199
10.1.2.6. Space division multiple access . . . . .	200
10.1.3. Quality of service parameters . . . . .	200
10.2. Point-to-point link . . . . .	201
10.2.1. The remote control . . . . .	201
10.2.2. Infrared Data Association . . . . .	203
10.2.3. Visible light communication consortium . . . . .	206
10.3. Point-to-multipoint data link . . . . .	206
10.3.1. IEEE 802.11 IR . . . . .	206

10.3.2. ICSA – STB50 (IEEE 802.3 – Ethernet) . . . . .	208
10.3.3. IEEE 802.15.3 . . . . .	209
10.3.4. IEEE 802.15.7 . . . . .	209
10.3.5. Optical wireless media access control . . . . .	210
10.4. Summary . . . . .	212
<b>Chapter 11. Installation and System Engineering . . . . .</b>	<b>213</b>
11.1. Free-space optic system engineering and installation . . . . .	213
11.1.1. Principle of operation. . . . .	213
11.1.2. Characteristics . . . . .	214
11.1.2.1. Principal parameters . . . . .	215
11.1.2.2. Secondary parameters . . . . .	216
11.1.2.3. Examples of FSO systems . . . . .	216
11.1.3. Implementation recommendations . . . . .	217
11.1.4. Optic link budget . . . . .	218
11.1.4.1. Geometrical attenuation concept. . . . .	219
11.1.4.2. Link margin concept. . . . .	219
11.1.5. FSO link availability . . . . .	220
11.1.5.1. Characteristics . . . . .	220
11.1.5.2. Results . . . . .	223
11.1.6. Summary . . . . .	225
11.2. Wireless optical system installation engineering in limited space . . . . .	225
11.2.1. Habitat structure. . . . .	225
11.2.2. Statistical analysis and coverage area . . . . .	226
11.2.3. Optical link budget . . . . .	230
11.2.4. Optimization of indoor wireless optical system . . . . .	234
<b>Chapter 12. Conclusion. . . . .</b>	<b>237</b>
<b>APPENDICES . . . . .</b>	<b>241</b>
<b>Appendix 1. Geometrical Optics, Photometry and Energy Elements . . . . .</b>	<b>243</b>
<b>Appendix 2. The Decibel Unit (dB) . . . . .</b>	<b>257</b>
<b>Bibliography . . . . .</b>	<b>261</b>
<b>List of Figures . . . . .</b>	<b>273</b>
<b>List of Tables . . . . .</b>	<b>277</b>
<b>List of Equations . . . . .</b>	<b>279</b>
<b>Index . . . . .</b>	<b>283</b>
