|--|------|
| Foreword | xiii |
| Preface | xv |
| | |
| Chapter 1. Fundamental Equations, Dimensionless Numbers | 1 |
| 1.1. Fundamental equations | 1 |
| 1.1.1. Local equations | 1 |
| 1.1.2. Integral conservation equations. | 4 |
| 1.1.3. Boundary conditions | 7 |
| 1.1.4. Heat-transfer coefficient. | 7 |
| 1.2. Dimensionless numbers | 8 |
| 1.3. Flows with variable physical properties: heat transfer in a laminar Couette flow | 9 |
| 1.3.1. Description of the problem | 9 |
| 1.3.2. Guidelines | 10 |
| 1.3.3. Solution. | 10 |
| 1.4. Flows with dissipation | 14 |
| 1.4.1. Description of the problem | 14 |
| 1.4.2. Guidelines | 14 |
| 1.4.3. Solution. | 15 |
| 1.5. Cooling of a sphere by a gas flow. | 20 |
| 1.5.1. Description of the problem | 20 |
| 1.5.2. Guidelines | 21 |
| 1.5.3. Solution. | 21 |

| | |
|---|----|
| Chapter 2. Laminar Fully Developed Forced Convection in Ducts | 31 |
| 2.1. Hydrodynamics | 31 |
| 2.1.1. Characteristic parameters | 31 |
| 2.1.2. Flow regions | 32 |
| 2.2. Heat transfer | 33 |
| 2.2.1. Thermal boundary conditions | 33 |
| 2.2.2. Bulk temperature | 34 |
| 2.2.3. Heat-transfer coefficient | 34 |
| 2.2.4. Fully developed thermal region | 34 |
| 2.3. Heat transfer in a parallel-plate channel with uniform wall heat flux | 35 |
| 2.3.1. Description of the problem | 35 |
| 2.3.2. Guidelines | 36 |
| 2.3.3. Solution | 37 |
| 2.4. Flow in a plane channel insulated on one side and heated at uniform temperature on the opposite side | 46 |
| 2.4.1. Description of the problem | 46 |
| 2.4.2. Guidelines | 47 |
| 2.4.3. Solution | 47 |
| | |
| Chapter 3. Forced Convection in Boundary Layer Flows | 53 |
| 3.1. Hydrodynamics | 53 |
| 3.1.1. Prandtl equations | 53 |
| 3.1.2. Classic results | 55 |
| 3.2. Heat transfer | 58 |
| 3.2.1. Equations of the thermal boundary layer | 58 |
| 3.2.2. Scale analysis | 58 |
| 3.2.3. Similarity temperature profiles | 59 |
| 3.3. Integral method | 62 |
| 3.3.1. Integral equations | 62 |
| 3.3.2. Principle of resolution using the integral method | 64 |
| 3.4. Heated jet nozzle | 65 |
| 3.4.1. Description of the problem | 65 |
| 3.4.2. Solution | 67 |
| 3.5. Asymptotic behavior of thermal boundary layers | 68 |
| 3.5.1. Description of the problem | 68 |
| 3.5.2. Guidelines | 69 |
| 3.5.3. Solution | 69 |
| 3.6. Protection of a wall by a film of insulating material | 74 |
| 3.6.1. Description of the problem | 74 |
| 3.6.2. Guidelines | 76 |
| 3.6.3. Solution | 77 |

| | |
|---|------------|
| 3.7. Cooling of a moving sheet | 83 |
| 3.7.1. Description of the problem | 83 |
| 3.7.2. Guidelines | 84 |
| 3.7.3. Solution. | 86 |
| 3.8. Heat transfer near a rotating disk | 93 |
| 3.8.1. Description of the problem | 93 |
| 3.8.2. Guidelines | 94 |
| 3.8.3. Solution. | 96 |
| 3.9. Thermal loss in a duct. | 106 |
| 3.9.1. Description of the problem | 106 |
| 3.9.2. Guidelines | 107 |
| 3.9.3. Solution. | 108 |
| 3.10. Temperature profile for heat transfer with blowing | 117 |
| 3.10.1. Description of the problem | 117 |
| 3.10.2. Solution. | 118 |
| | |
| Chapter 4. Forced Convection Around Obstacles | 119 |
| 4.1. Description of the flow | 119 |
| 4.2. Local heat-transfer coefficient for a circular cylinder | 121 |
| 4.3. Average heat-transfer coefficient for a circular cylinder | 123 |
| 4.4. Other obstacles. | 125 |
| 4.5. Heat transfer for a rectangular plate in cross-flow | 126 |
| 4.5.1. Description of the problem | 126 |
| 4.5.2. Solution. | 126 |
| 4.6. Heat transfer in a stagnation plane flow. Uniform temperature heating | 128 |
| 4.6.1. Description of the problem | 128 |
| 4.6.2. Guidelines | 129 |
| 4.6.3. Solution. | 130 |
| 4.7. Heat transfer in a stagnation plane flow. Step-wise heating at uniform flux | 131 |
| 4.7.1. Description of the problem | 131 |
| 4.7.2. Guidelines | 132 |
| 4.7.3. Solution. | 133 |
| 4.8. Temperature measurements by cold-wire | 135 |
| 4.8.1. Description of the problem | 135 |
| 4.8.2. Guidelines | 136 |
| 4.8.3. Solution. | 137 |

| | |
|---|-----|
| Chapter 5. External Natural Convection | 141 |
| 5.1. Introduction. | 141 |
| 5.2. Boussinesq model | 142 |
| 5.3. Dimensionless numbers. Scale analysis | 142 |
| 5.4. Natural convection near a vertical wall | 145 |
| 5.4.1. Equations. | 145 |
| 5.4.2. Similarity solutions. | 146 |
| 5.5. Integral method for natural convection. | 149 |
| 5.5.1. Integral equations. | 149 |
| 5.5.2. Solution. | 150 |
| 5.6. Correlations for external natural convection | 152 |
| 5.7. Mixed convection | 152 |
| 5.8. Natural convection around a sphere | 155 |
| 5.8.1. Description of the problem | 155 |
| 5.8.2. Solution. | 155 |
| 5.9. Heated jet nozzle. | 157 |
| 5.9.1. Description of the problem | 157 |
| 5.9.2. Solution. | 158 |
| 5.10. Shear stress on a vertical wall heated at uniform temperature | 161 |
| 5.10.1. Description of the problem | 161 |
| 5.10.2. Solution. | 162 |
| 5.11. Unsteady natural convection | 164 |
| 5.11.1. Description of the problem | 164 |
| 5.11.2. Guidelines | 166 |
| 5.11.3. Solution. | 167 |
| 5.12. Axisymmetric laminar plume | 176 |
| 5.12.1. Description of the problem | 176 |
| 5.12.2. Solution. | 177 |
| 5.13. Heat transfer through a glass pane. | 183 |
| 5.13.1. Description of the problem | 183 |
| 5.13.2. Guidelines | 183 |
| 5.13.3. Solution. | 184 |
| 5.14. Mixed convection near a vertical wall with suction | 189 |
| 5.14.1. Description of the problem | 189 |
| 5.14.2. Guidelines | 190 |
| 5.14.3. Solution. | 190 |
| | |
| Chapter 6. Internal Natural Convection | 195 |
| 6.1. Introduction. | 195 |
| 6.2. Scale analysis. | 195 |

| | |
|--|------------|
| 6.3. Fully developed regime in a vertical duct heated at constant temperature. | 197 |
| 6.4. Enclosure with vertical walls heated at constant temperature | 198 |
| 6.4.1. Fully developed laminar regime | 198 |
| 6.4.2. Regime of boundary layers | 199 |
| 6.5. Thermal insulation by a double-pane window | 199 |
| 6.5.1. Description of the problem | 199 |
| 6.5.2. Solution. | 200 |
| 6.6. Natural convection in an enclosure filled with a heat generating fluid | 201 |
| 6.6.1. Description of the problem | 201 |
| 6.6.2. Solution. | 203 |
| 6.7. One-dimensional mixed convection in a cavity. | 206 |
| 6.7.1. Description of the problem | 206 |
| 6.7.2. Guidelines | 207 |
| 6.7.3. Solution. | 208 |
| | |
| Chapter 7. Turbulent Convection in Internal Wall Flows | 211 |
| 7.1. Introduction. | 211 |
| 7.2. Hydrodynamic stability and origin of the turbulence | 211 |
| 7.3. Reynolds averaged Navier-Stokes equations | 213 |
| 7.4. Wall turbulence scaling. | 215 |
| 7.5. Eddy viscosity-based one point closures. | 216 |
| 7.6. Some illustrations through direct numerical simulations | 227 |
| 7.7. Empirical correlations. | 231 |
| 7.8. Exact relations for a fully developed turbulent channel flow. | 233 |
| 7.8.1. Reynolds shear stress. | 233 |
| 7.8.2. Heat transfer in a fully developed turbulent channel flow with constant wall temperature. | 238 |
| 7.8.3. Heat transfer in a fully developed turbulent channel flow with uniform wall heat flux. | 240 |
| 7.9. Mixing length closures and the temperature distribution in the inner and outer layers. | 243 |
| 7.9.1. Description of the problem | 245 |
| 7.9.2. Guidelines | 245 |
| 7.9.3. Solution. | 246 |
| 7.10. Temperature distribution in the outer layer | 252 |
| 7.10.1. Description of the problem | 252 |
| 7.10.2. Guidelines | 252 |
| 7.10.3. Solution. | 252 |

| | |
|---|------------|
| 7.11. Transport equations and reformulation of the logarithmic layer | 255 |
| 7.11.1. Description of the problem | 257 |
| 7.11.2. Guidelines | 257 |
| 7.11.3. Solution | 258 |
| 7.12. Near-wall asymptotic behavior of the temperature and turbulent fluxes | 261 |
| 7.12.1. Description of the problem | 261 |
| 7.12.2. Guidelines | 261 |
| 7.12.3. Solution | 261 |
| 7.13. Asymmetric heating of a turbulent channel flow | 264 |
| 7.13.1. Description of the problem | 264 |
| 7.13.2. Guidelines | 265 |
| 7.13.3. Solution | 266 |
| 7.14. Natural convection in a vertical channel in turbulent regime | 270 |
| 7.14.1. Description of the problem | 270 |
| 7.14.2. Guidelines | 271 |
| 7.14.3. Solution | 274 |
| | |
| Chapter 8. Turbulent Convection in External Wall Flows | 281 |
| 8.1. Introduction | 281 |
| 8.2. Transition to turbulence in a flat plate boundary layer | 281 |
| 8.3. Equations governing turbulent boundary layers | 282 |
| 8.4. Scales in a turbulent boundary layer | 284 |
| 8.5. Velocity and temperature distributions. | 284 |
| 8.6. Integral equations | 285 |
| 8.7. Analogies | 286 |
| 8.8. Temperature measurements in a turbulent boundary layer | 289 |
| 8.8.1. Description of the problem | 289 |
| 8.8.2. Solution | 290 |
| 8.9. Integral formulation of boundary layers over an isothermal flat plate with zero pressure gradient | 292 |
| 8.9.1. Description of the problem | 292 |
| 8.9.2. Guidelines | 293 |
| 8.9.3. Solution | 294 |
| 8.10. Prandtl-Taylor analogy | 297 |
| 8.10.1. Description of the problem | 297 |
| 8.10.2. Guidelines | 297 |
| 8.10.3. Solution | 298 |
| 8.11. Turbulent boundary layer with uniform suction at the wall | 301 |
| 8.11.1. Description of the problem | 301 |
| 8.11.2. Guidelines | 301 |
| 8.11.3. Solution | 302 |
