

CONTENTS

Part I: Invited and Regular Papers	17
<i>Invited lectures</i>	
Comparison of Monotonicity for some Multipoint Flux Approximation Methods Aavatsmark I.	19
A Symmetric and Coercive Finite Volume Scheme for Multiphase Porous Media Flow Problems with Applications in the Oil Industry – Agelas L., Di Pietro D.A., Masson R.	35
A Finite-Volume Approach to Liquid-Vapour Fluids with Phase Transition Dressel A., Rohde C.	53
A Recipe to Couple Two Finite Volume Schemes for Elliptic Problems Droniou J.	69
Coupling Fluid Models. Exploring some features of interfacial coupling Godlewski E.	87
Finite Volume Scheme Satisfying Maximum and Minimum Principles for Anisotropic Diffusion Operators – Le Potier C.	103
The Mimetic Finite Difference Method – Manzini G.	119
Mortar Coupling of Multiphase Flow and Reactive Transport on Non-Matching Grids – Wheeler M.F., Pencheva G., Thomas S.-G.	135

Regular papers

Convergence of the Finite Volume MPFA O Scheme for Heterogeneous Anisotropic Diffusion Problems on General Meshes – Agelas L., Masson R.	145
Relaxation and Numerical Approximation of a Two-Fluid Two-Pressure Model Ambroso A., Chalons C., Coquel F., Galié T.	153
A Gradient Reconstruction Formula for Finite Volume Schemes and Discrete Duality – Andreianov B., Bendahmane M., Karlsen K.H.	161
Vector Penalty-Projection Methods for the Solution of Unsteady Incompressible Flows – Angot P., Caltagirone J.-P., Fabrie P.	169
A Monotone Scheme for the k - ε RNG Model – Angot P., Larcher A., Latché J.-C.	177
A Finite Volume Stability Result for the Convection Operator in Compressible Flows ... and Some Finite Element Applications – Ansanay-Alex G., Babik F., Gastaldo L., Larcher A., Lapuerta C., Latché J.-C., Vola D.	185
Computing Two-Phase Flows in Porous Media with a Two-Fluid Hyperbolic Model – Archambeau F., Girault L., Hérard J.-M., Hurisse O.	193
Numerical Modelling of Compressible Flows Using pressure-Correction Algorithms – Archambeau F., Hérard J.-M., Laviéville J.	201
Two Cases of the Real ABL Flow over Complex Orography – Beneš L., Bodnár T., Kozel K., Sládek L.	209
The m-DDFV Method for Heterogeneous Linear and Nonlinear Elliptic Problems – Boyer F., Hubert F.	217
Non-overlapping Schwartz Algorithm for DDFV Schemes on General 2D Meshes – Boyer F., Hubert F., Krell S.	225
Some Error Estimates in Finite Volume Methods of Parabolic Equations Bradji A., Fuhrmann J.	233
Numerical Validation of a Bilayer Viscous Model for Shallow Water Equations Bresch D., Fernández-Nieto E., Narbona-Reina G., Zabsonré J.D.D.	241
Two-phase Flows Involving Discontinuities on the Capillary Pressure Cancès C.	249
The Influence of the Boundary Discretization on the Multipoint Flux Approximation L-method – Cao Y., Helmig R., Wohlmuth B.	257
High Order 2D Schemes Based on State Reconstructions for Non-Conservative Hyperbolic Systems: Application to Bedload Sediment Transport Castro-Díaz M.J., Fernández Nieto E.D., Ferreiro A.M.	265

Analysis of some Finite Volume Schemes for the Geostrophic Adjustment Problem in a Rotating Shallow Water System – Castro Díaz M.J., López-García J.A., Parés C.	273
Finite Volume Scheme for a Corrosion Model – Chainais-Hillairet C.	281
A Collocated Finite Volume Scheme for the Incompressible Navier-Stokes Equations on General Non-Matching Grids – Chénier E., Eymard R., Herbin R.	289
The Multi-Slope MUSCL Method – Clain S., Clauzon V.	297
An Asymptotic Preserving Scheme for Euler Equations with Gravity and Friction – Coquel F., Godlewski E., Raviart P.-A., Seguin N.	305
2D/3D Discrete Duality Finite Volume Scheme (DDFV) applied to ECG Simulation – Coudière Y., Pierre C., Rousseau O., Turpault R.	313
Renormalization of the Numerical Diffusion for an Upwind Finite Volume Method. Application to the Simulation of Kelvin-Helmholtz Instability Dauvergne F., Ghidaglia J.-M., Pascal F., Rovarch J.-M.	321
Preconditioning Navier-Stokes Problem Discretized by Discrete Duality Finite Volume Schemes – Delcourte S., Jennequin D.	329
Stability of High order Finite Volume Schemes for the 1D Transport Equation Després B.	337
Semi-implicit Diamond-cell Finite Volume Scheme for 3D Nonlinear Tensor Diffusion in Coherence Enhancing Image Filtering – Drblíková O., Mikula K.	343
Using the Lattice Boltzmann Scheme for Anisotropic Diffusion Problems Dubois F., Lallemand P., Tekitek M.M.	351
Adaptive Cell-Centered Finite Volume Method – Erath C., Funken S., Praetorius D.	359
A Well-Balanced Runge-Kutta Discontinuous Galerkin Method for the Shallow-Water Equations with Flooding and Drying – Ern A., Piperno S., Tassi P.	367
Discretization Schemes for Linear Diffusion Operators on General Non-Conforming Meshes – Eymard R., Gallouët T., Herbin R.	375
A Finite Volume Scheme for Sensitivity Analysis in Dynamic Reliability Eymard R., Mercier S., Prignet A., Roussignol M.	383
Numerical Simulation with Finite Volume of Dynamic Liquid-Vapor Phase Transition – Faccanoni G., Kokh S., Allaire G.	391

Optimality of Error Estimates in the Combined Finite Volume-Finite Element and Discontinuous Galerkin Methods for Nonlinear Convection-Diffusion Problems – Feistauer M.	399
An Adaptive Finite Volume Method for Nonstationary Problems – Felcman J., Kubera P.	407
Flux-Based Level Set Method for Two-Phase Flow. Towards pure finite-volume discretization of incompressible two-phase flow using a level set formulation Frolkovič P., Logashenko D., Wittum G.	415
Modeling and Simulation of Coupled Species Transport, Porous Electrode Effects and Catalytic Reactions in a Rectangular Flow Cell – Fuhrmann J., Zao H., Langmach H., Holzbecher E.	423
The WLSQR Scheme for the Flows in Complex Geometry – Fürst J.	431
A Two-Fluid Model for Dense Granular Flows – Gallouët T., Helluy P., Hérard J.-M., Nussbaum J.	439
A Pressure Correction Scheme for the Homogeneous Two-phase Flow Model with Two Barotropic Phases – Gastaldo L., Herbin R., Latché J.-C.	447
Modeling Thermal Behavior of Bioreactor Landfills Before Leachate Recirculation – Gholamifard S., Eymard R., Duquennoi C.	455
Convergence Rate of Finite Volume Schemes for Hyperbolic Conservation Laws on Riemannian Manifolds – Giesselmann J.	463
Adaptive Basis Enrichment for the Reduced Basis Method Applied to Finite Volume Schemes – Haasdonk B., Ohlberger M.	471
CFFV Scheme Based Finite Volume Method for Condensing Steam Flow Halama J., Benkhaldoun F., Fořt J.	479
An ALE Averaging Approach for the Computing Bubble Oscillations Helluy P., Mathis H., Müller S.	487
Suspensions of Rod-Like Molecules. A FV-ELLAM-type discretization of the Smoluchowski equation describing the orientation of rod-like molecules Helzel C., Kirsten J., Otto F.	495
The Numerical Coupling of a Two-Fluid Model with an Homogeneous Relaxation Model – Hérard J.-M., Hurisse O.	503
FV Schemes for Hyperelastic-Plastic Models in Finite Deformations – Kluth G., Després B.	511
An Anti-Diffusive Method for Simulating Compressible Two-Phase Flows with Interfaces – Kokh S., Lagoutière F.	519

Finite Volume Method for Conservation Laws with Noise – Kröker I.	527
A Five-Equation Dissipative Model for Two-Phase Flows – Labois M., Guillard H., Grandotto M.	535
The VoFiRe Finite Volume Method Applied to Multi-Component Flows on Unstructured Meshes – Labourasse E., Després B., Lagoutière F., Marmajou I.	543
Numerical Simulation of Liquid-Gas Stratified Flows using Two-phase Eulerian Approach – Laviéville J., Coste P.	553
Finite Volume Method on Moving Surfaces – Lenz M., Nemađjieu S.F., Rumpf M.	561
Analysis of the Mixed Finite Volume Scheme for a Convection-Diffusion Equation – Mahamane A.	569
Some Improvements of a FV Aggregation-Based Multigrid Method Applied to Elliptic Problems – Méchitoua N., Bosse S., Hulsemann F., Boucker M.	577
3D Embryogenesis Image Segmentation by the Generalized Subjective Surfaces Method using the Finite Volume Technique – Mikula K., Peyriéras N., Remešíková M., Sarti A.	585
Modeling and Simulation of Turbidity Currents – Morales T., Castro M.J., Parés C.	593
Recursive Mesh Refinement for Vertex Centered FVM Applied to a 1-D Phase-Change Problem – Muhieddine M., Canot E.	601
A Comparison of Second Order Schemes for Shallow Water Flows with Source Terms – Murillo J., Latorre B., García-Navarro P.	609
An <i>A-Posteriori</i> Error Bound for the Discrete Duality Finite Volume Discretization of the Laplace Equation and Application to the Adaptive Simulation in a Domain with a Crack – Omnes P.	617
Influence of Cell Geometry on the Behaviour of the First-Order Roe Scheme in the Low Mach Number Regime – Rieper F.	625
The Sub-Mesh Penalty Method – Sarthou A., Vincent S., Angot P., Caltagirone J.-P.	633
A Non-Uniform Lattice Boltzmann Coupled to the Finite Volumes Method for Solving Phase Change Problems – Semma E., Addakiri S., El Ganaoui M., Bennacer R.	641
Two Types of Guaranteed (and Robust) <i>A Posteriori</i> Estimates for Finite Volume Methods – Vohralík M.	649

Part II: Contributions to the Benchmark on Anisotropic Problems 657*Synthesis of Benchmark Results*

Benchmark on Discretization Schemes for Anisotropic Diffusion Problems on General Grids – Herbin R., Hubert F.	659
--	-----

Benchmark on Anisotropic Problems

Numerical Simulation for the Anisotropic Benchmark by a Vertex-Centred Finite Volume Method – Afif M., Amaziane B.	693
A Symmetric Finite Volume Scheme for Anisotropic Heterogeneous Second-order Elliptic Problems – Agelas L., Di Pietro D.A.	705
A Galerkin Finite Element Solution – Ansanay-Alex G., Piar B., Vola D.	717
The DDFV “Discrete Duality Finite Volumes” and m-DDFV Schemes Boyer F., Hubert F.	735
Use of the Mixed Finite Volume Method – Chainais-Hillairet C., Droniou J., Eymard R.	751
The Compact Discontinuous Galerkin Method for Elliptic Problems Dedner A., Klöfkom R.	761
A Discontinuous Galerkin Flux for Anisotropic Heterogeneous Second-Order Elliptic Problems – Di Pietro D.A., Ern A.	777
Using Lattice Boltzmann Scheme for Anisotropic Diffusion – Dubois F., Lallemand P., Tekitek M.M.	795
SUSHI: a Scheme Using Stabilization and Hybrid Interfaces for Anisotropic Heterogeneous Diffusion Problems – Eymard R., Gallouët T., Herbin R.	801
Numerical Investigation of a Mimetic Finite Difference Method Flemisch B., Helmig R.	815
Numerical Results with Two Cell-Centered Finite Volume Schemes for Heterogeneous Anisotropic Diffusion Operators – Le Potier C.	825
Mimetic Finite Difference Method – Lipnikov K.	843
Numerical Experiments with the DDFV Method – Hermeline F.	851
The Mimetic Finite Difference Method – Manzini G.	865
A Mimetic Finite Difference Method – Marnach S.	879
Some MPFA Methods of DDFV Type – Moukouop Nguena I., Njifenjou A.	891

Compact-Stencil MPFA Method for Heterogeneous Highly Anisotropic Second-Order Elliptic Problems – Mundal S., Di Pietro D.A., Aavatsmark I.	905
Tests with the Discrete Duality Finite Volume Method – Omnes P.	919
Nonlinear Monotone Finite Volume Method – Svyatskiy D.	935
Index of Authors	949
