<b>PREFACE</b> . . . . .	ix
<b>NOMENCLATURE</b> . . . . .	xi
<b>CHAPTER 1. KINEMATICS AND DYNAMICS OF CRANK SHAFT–CONNECTING ROD–PISTON LINKAGE</b> . . . . .	1
1.1. Kinematic model of crank shaft–connecting rod–piston linkage. . . . .	2
1.1.1. Model description . . . . .	2
1.1.2. Expressions of angular velocities . . . . .	5
1.1.3. Expressions of velocity for points A, $G_2$ and B. . . . .	5
1.1.4. Expressions of connecting rod angular acceleration and points $G_2$ and B accelerations. . . . .	7
1.2. Efforts in the links between the crank shaft, the connecting rod and the piston . . . . .	8
1.2.1. Hypothesis and data . . . . .	8
1.2.2. Dynamics equations for the piston. . . . .	9
1.2.3. Dynamics equations for the axis . . . . .	9
1.2.4. Dynamics equations for the connecting rod. . . . .	10
1.2.5. Dynamics equations for the crank shaft . . . . .	11
1.2.6. Efforts for frictionless links . . . . .	12
1.3. Load diagram correction in the case of large deformations. . . . .	13
1.3.1. Kinematics of crank shaft–connecting rod–piston system with mobility . . . . .	14
1.3.2. Dynamics of crank shaft–connecting rod–piston system with mobility . . . . .	20

1.4. Examples of link efforts between the elements of crank shaft-connecting rod-piston system . . . . .	23
1.4.1. Data . . . . .	23
1.4.2. Load diagrams for the connecting rod big end bearing . . . . .	24
1.4.3. Load diagrams for a connecting rod small end bearing . . . . .	26
1.4.4. Load diagrams for a crank shaft main bearing . . . . .	27
1.4.5. Engine torque . . . . .	28
1.5. Bibliography . . . . .	29
<b>CHAPTER 2. THE CRANK SHAFT-CONNECTING ROD LINK . . . . .</b>	<b>31</b>
2.1. Geometrical and mechanical characteristics of the connecting rod big end bearing. . . . .	31
2.2. Lubricant supply . . . . .	33
2.3. Correction of the load diagram in the case of large deformations. . . . .	34
2.4. Multibody models . . . . .	38
2.4.1. Interfaces and interactions: main assumptions . . . . .	39
2.4.2. Equations of unilateral contact with friction and equilibrium equations . . . . .	41
2.4.3. Compliance matrices . . . . .	42
2.4.4. Finite element modeling of the contact in the joint plane . . . . .	46
2.4.5. Modelization of the contact between the housing and the shells . . . . .	65
2.5. Case of V engines . . . . .	72
2.6. Examples of connecting rod big end bearing computations. . . . .	79
2.6.1. Presentation of connecting rods and corresponding load diagrams . . . . .	80
2.6.2. Geometry and lubricant data . . . . .	84
2.6.3. Analysis of some isothermal results . . . . .	85
2.6.4. Influence of mesh downsizing . . . . .	96
2.6.5. Search of potential damage zones due to cavitation . . . . .	98
2.6.6. Examples taking into consideration thermoelastohydrodynamic effects . . . . .	100
2.7. Bibliography . . . . .	118

<b>CHAPTER 3. THE CONNECTING ROD–PISTON LINK . . . . .</b>	<b>123</b>
3.1. Geometrical particularities and mechanics of connecting rod–piston link . . . . .	123
3.2. Lubricant supply . . . . .	125
3.3. Example of computation for a connecting rod small end bearing with the axis embedded into the piston. . . . .	127
3.4. Complete model of the connecting rod–piston link . . . . .	133
3.4.1. Equations. . . . .	134
3.4.2. Integration of dynamics equation . . . . .	137
3.4.3. Piston structural model . . . . .	139
3.4.4. Example: the piston–axis–connecting rod small end link for a Formula 1 engine . . . . .	142
3.5. Bibliography . . . . .	158
<b>CHAPTER 4. THE ENGINE BLOCK–CRANK SHAFT LINK. . . . .</b>	<b>161</b>
4.1. Geometrical and mechanical particularities of the engine block – crank shaft link . . . . .	161
4.2. Lubricant supply . . . . .	162
4.3. Calculus of an isolated crank shaft bearing . . . . .	163
4.4. Complete model of the engine block – crank shaft link. . . . .	170
4.4.1. Model presentation . . . . .	171
4.4.2. Expression of the elastic deformations . . . . .	173
4.4.3. Expression of the film thickness . . . . .	175
4.4.4. Equation system . . . . .	175
4.4.5. Resolution method . . . . .	178
4.4.6. Examples. . . . .	180
4.5. Bibliography . . . . .	196
<b>CHAPTER 5. INFLUENCE OF INPUT PARAMETERS AND OPTIMIZATION . . . . .</b>	<b>197</b>
5.1. Design of experiments method . . . . .	197
5.2. Identification of the input parameters: example . . . . .	201
5.3. Multiobjective optimization. . . . .	202
5.4. Optimization of a connecting rod big end bearing: example . . . . .	204
5.4.1. Viscosity factors. . . . .	208
5.4.2. Radial clearance factor . . . . .	209
5.4.3. Radial shape defect . . . . .	209
5.4.4. Axial shape defect. . . . .	210
5.4.5. Shell bore relief factors . . . . .	210

5.4.6. Supply pressure and temperature . . . . .	210
5.4.7. Power loss . . . . .	211
5.4.8. Contact pressure velocity factor . . . . .	211
5.4.9. Severity criterion based on the minimum film thickness . . . . .	212
5.4.10. Leakage . . . . .	213
5.4.11. Global functioning temperature . . . . .	214
5.4.12. Bearing optimization method . . . . .	214
5.5. Bibliography . . . . .	221
<b>INDEX . . . . .</b>	<b>223</b>
