| Preface | xi |
| Thérèse ENCRENAZ and James LEQUEUX | |
| | |
| Chapter 1. General Presentation of the Solar System | 1 |
| Thérèse ENCRENAZ, Françoise ROQUES and Laurent LAMY | |
| | |
| 1.1. Introduction | 1 |
| 1.2. Mechanics and dynamics of the Solar System | 6 |
| 1.2.1. Newton's law of gravitation..... | 7 |
| 1.2.2. Kepler's laws r | 7 |
| 1.2.3. Mean motion resonances..... | 9 |
| 1.2.4. The N-body problem | 10 |
| 1.2.5. The role of collisions | 12 |
| 1.2.6. Migrations in the Solar System | 13 |
| 1.2.7. The role of gravity in a solid body | 15 |
| 1.2.8. Special configurations of the Sun–Earth–Moon system | 17 |
| 1.3. Physics of the Solar System | 18 |
| 1.3.1. Equilibrium temperature of an object in the Solar System | 19 |
| 1.3.2. Planets | 22 |
| 1.3.3. Satellites | 29 |
| 1.3.4. Small bodies of the Solar System | 32 |
| 1.3.5. The interplanetary medium | 37 |
| 1.4. References | 42 |

Chapter 2. Solar and Planetary Systems 45
James LEQUEUX

| | |
|--|----|
| 2.1. The Sun in the Galaxy | 45 |
| 2.2. Planetary systems in the Galaxy. | 47 |
| 2.3. Interstellar matter | 49 |
| 2.3.1. History | 49 |
| 2.3.2. Chemical composition | 50 |
| 2.3.3. Physical properties | 52 |
| 2.4. The formation of stars with masses close to that of the Sun | 55 |
| 2.5. Circumstellar disks | 63 |
| 2.6. Formation of planetesimals and planetoids | 67 |
| 2.7. The environment of the Solar System at its birth. | 70 |
| 2.8. Detection and properties of exoplanets and their systems. | 71 |
| 2.8.1. First attempts | 71 |
| 2.8.2. The unexpected discovery of planets around a pulsar. | 73 |
| 2.8.3. Exoplanet detection methods | 74 |
| 2.8.4. Some statistical results | 82 |
| 2.8.5. The diversity of exoplanets | 83 |
| 2.8.6. Exoplanet atmospheres. | 88 |
| 2.8.7. Habitable planets | 91 |
| 2.8.8. Some extrasolar planetary systems. | 94 |
| 2.9. References | 95 |

Chapter 3. The Interaction of Solar System Bodies with the Interplanetary Medium 99
Laurent LAMY

| | |
|--|-----|
| 3.1. Interplanetary plasma: origin and properties of the solar wind. | 100 |
| 3.1.1. Coronal expansion | 100 |
| 3.1.2. The structure of the heliosphere in the ecliptic plane | 103 |
| 3.1.3. The three-dimensional structure of the heliosphere | 107 |
| 3.1.4. Transient structures of the solar wind | 109 |
| 3.1.5. The boundaries of the heliosphere | 112 |
| 3.2. Planetary envelopes | 116 |
| 3.2.1. Upper planetary atmospheres | 116 |
| 3.2.2. Planetary magnetic fields | 124 |
| 3.3. The solar wind's interaction with objects of the Solar System | 126 |
| 3.3.1. The different types of interaction. | 126 |
| 3.3.2. The case of non-magnetized gaseous envelopes | 129 |

| | |
|---|------------|
| 3.3.3. The case of magnetized planets | 135 |
| 3.3.4. Planetary auroral processes | 153 |
| 3.4. Acknowledgements | 163 |
| 3.5. References | 163 |
| Chapter 4. Telluric Planets | 167 |
| Thérèse ENCRENAZ, Marcello FULCHIGNONI and Laurent LAMY | |
| 4.1. The exploration of the telluric planets | 167 |
| 4.1.1. From antiquity to the space age. | 167 |
| 4.1.2. The beginning of the space age. | 168 |
| 4.1.3. The return to Mars | 169 |
| 4.1.4. The return to Venus. | 171 |
| 4.1.5. Observations from the ground | 172 |
| 4.1.6. The exploration of planet Earth. | 174 |
| 4.1.7. Global Climatic Models | 175 |
| 4.1.8. The electromagnetic spectrum of telluric planets | 175 |
| 4.2. Objects without an atmosphere: Mercury, the Moon | 177 |
| 4.2.1. Orbital parameters and macroscopic characteristics. | 179 |
| 4.2.2. Exospheres | 180 |
| 4.2.3. Internal structure | 181 |
| 4.2.4. The surfaces of Mercury and the Moon | 185 |
| 4.2.5. The origin of Mercury and the Moon | 194 |
| 4.2.6. Mercury's magnetosphere | 197 |
| 4.3. Objects with an atmosphere (Venus, Earth, Mars) | 200 |
| 4.3.1. The interior and the magnetic field. | 201 |
| 4.3.2. The surface | 208 |
| 4.3.3. The atmosphere | 217 |
| 4.3.4. The satellites of Mars. | 241 |
| 4.4. References | 242 |
| Chapter 5. Giant Planets | 245 |
| Thérèse ENCRENAZ and Laurent LAMY | |
| 5.1. The exploration of giant planets. | 245 |
| 5.1.1. From Antiquity to the Space Age | 245 |
| 5.1.2. Space exploration | 246 |
| 5.1.3. Exploration from Earth and the terrestrial environment | 251 |
| 5.1.4. The electromagnetic spectrum of giant planets. | 253 |

| | |
|--|------------|
| 5.2. The atmosphere of giant planets | 256 |
| 5.2.1. Atmospheric composition | 256 |
| 5.2.2. Elemental and isotopic abundance ratios | 257 |
| 5.2.3. Thermal structure | 264 |
| 5.2.4. Atmospheric circulation and cloud structure | 266 |
| 5.2.5. High atmosphere and photochemistry | 269 |
| 5.3. The internal structure of giant planets | 271 |
| 5.3.1. Experimental data | 271 |
| 5.3.2. The construction of internal energy models | 274 |
| 5.3.3. The results | 276 |
| 5.4. The magnetospheres of the giant planets | 279 |
| 5.4.1. Jupiter's giant magnetosphere | 279 |
| 5.4.2. Saturn's symmetrical magnetosphere | 295 |
| 5.4.3. The asymmetric magnetospheres of Uranus and Neptune | 302 |
| 5.5. References | 304 |
| Appendix. Web links | 309 |
| Glossary | 311 |
| List of Authors | 323 |
