

# Contents

<b>Preface</b> . . . . .	xi
Abdourrahmane M. ATTO, Francesca BOVOLO and Lorenzo BRUZZONE	
<b>List of Notations</b> . . . . .	xv
<b>Chapter 1. Unsupervised Change Detection in Multitemporal Remote Sensing Images</b> . . . . .	1
Sicong LIU, Francesca BOVOLO, Lorenzo BRUZZONE, Qian DU and Xiaohua TONG	
1.1. Introduction . . . . .	1
1.2. Unsupervised change detection in multispectral images . . . . .	3
1.2.1. Related concepts . . . . .	3
1.2.2. Open issues and challenges . . . . .	7
1.2.3. Spectral–spatial unsupervised CD techniques . . . . .	7
1.3. Unsupervised multiclass change detection approaches based on modeling spectral–spatial information . . . . .	9
1.3.1. Sequential spectral change vector analysis ( $S^2CVA$ ) . . . . .	9
1.3.2. Multiscale morphological compressed change vector analysis . . . . .	11
1.3.3. Superpixel-level compressed change vector analysis . . . . .	15
1.4. Dataset description and experimental setup . . . . .	18
1.4.1. Dataset description . . . . .	18
1.4.2. Experimental setup . . . . .	22
1.5. Results and discussion . . . . .	24
1.5.1. Results on the Xuzhou dataset . . . . .	24
1.5.2. Results on the Indonesia tsunami dataset . . . . .	24

1.6. Conclusion . . . . .	28
1.7. Acknowledgements . . . . .	29
1.8. References . . . . .	29

## **Chapter 2. Change Detection in Time Series of Polarimetric SAR Images . . . . . 35**

Knut CONRADSEN, Henning SKRIVER, Morton J. CANTY  
and Allan A. NIELSEN

2.1. Introduction . . . . .	35
2.1.1. The problem . . . . .	36
2.1.2. Important concepts illustrated by means of the gamma distribution . . . . .	39
2.2. Test theory and matrix ordering . . . . .	45
2.2.1. Test for equality of two complex Wishart distributions . . . . .	45
2.2.2. Test for equality of k-complex Wishart distributions . . . . .	47
2.2.3. The block diagonal case . . . . .	49
2.2.4. The Loewner order . . . . .	52
2.3. The basic change detection algorithm . . . . .	53
2.4. Applications . . . . .	55
2.4.1. Visualizing changes . . . . .	58
2.4.2. Fieldwise change detection . . . . .	59
2.4.3. Directional changes using the Loewner ordering . . . . .	62
2.4.4. Software availability . . . . .	65
2.5. References . . . . .	70

## **Chapter 3. An Overview of Covariance-based Change Detection Methodologies in Multivariate SAR Image Time Series . . . . . 73**

Ammar MIAN, Guillaume GINOLHAC, Jean-Philippe OVARLEZ,  
Arnaud BRELOY and Frédéric PASCAL

3.1. Introduction . . . . .	73
3.2. Dataset description . . . . .	76
3.3. Statistical modeling of SAR images . . . . .	77
3.3.1. The data . . . . .	77
3.3.2. Gaussian model . . . . .	77
3.3.3. Non-Gaussian modeling . . . . .	83
3.4. Dissimilarity measures . . . . .	84
3.4.1. Problem formulation . . . . .	84
3.4.2. Hypothesis testing statistics . . . . .	85
3.4.3. Information-theoretic measures . . . . .	87
3.4.4. Riemannian geometry distances . . . . .	89
3.4.5. Optimal transport . . . . .	90

3.4.6. Summary . . . . .	91
3.4.7. Results of change detectors on the UAVSAR dataset . . . . .	91
3.5. Change detection based on structured covariances . . . . .	94
3.5.1. Low-rank Gaussian change detector . . . . .	96
3.5.2. Low-rank compound Gaussian change detector . . . . .	97
3.5.3. Results of low-rank change detectors on the UAVSAR dataset . . . . .	100
3.6. Conclusion . . . . .	102
3.7. References . . . . .	103

**Chapter 4. Unsupervised Functional Information Clustering in Extreme Environments from Filter Banks and Relative Entropy . . . . . 109**

Abdourrahmane M. ATTO, Fatima KARBOU, Sophie GIFFARD-ROISIN and Lionel BOMBRUN

4.1. Introduction . . . . .	109
4.2. Parametric modeling of convnet features . . . . .	110
4.3. Anomaly detection in image time series . . . . .	113
4.4. Functional image time series clustering . . . . .	119
4.5. Conclusion . . . . .	123
4.6. References . . . . .	123

**Chapter 5. Thresholds and Distances to Better Detect Wet Snow over Mountains with Sentinel-1 Image Time Series . . . . . 127**

Fatima KARBOU, Guillaume JAMES, Philippe DURAND and Abdourrahmane M. ATTO

5.1. Introduction . . . . .	127
5.2. Test area and data . . . . .	129
5.3. Wet snow detection using Sentinel-1 . . . . .	129
5.4. Metrics to detect wet snow . . . . .	133
5.5. Discussion . . . . .	138
5.6. Conclusion . . . . .	143
5.7. Acknowledgements . . . . .	143
5.8. References . . . . .	143

**Chapter 6. Fractional Field Image Time Series Modeling and Application to Cyclone Tracking . . . . . 145**

Abdourrahmane M. ATTO, Aluísio PINHEIRO, Guillaume GINOLHAC and Pedro MORETTIN

6.1. Introduction . . . . .	145
6.2. Random field model of a cyclone texture . . . . .	148

6.2.1. Cyclone texture feature . . . . .	149
6.2.2. Wavelet-based power spectral densities and cyclone fields . . . . .	150
6.2.3. Fractional spectral power decay model . . . . .	153
6.3. Cyclone field eye detection and tracking . . . . .	157
6.3.1. Cyclone eye detection . . . . .	157
6.3.2. Dynamic fractal field eye tracking . . . . .	158
6.4. Cyclone field intensity evolution prediction . . . . .	159
6.5. Discussion . . . . .	161
6.6. Acknowledgements . . . . .	163
6.7. References . . . . .	163

<b>Chapter 7. Graph of Characteristic Points for Texture Tracking: Application to Change Detection and Glacier Flow Measurement from SAR Images . . . . .</b>	<b>167</b>
Minh-Tan PHAM and Grégoire MERCIER	

7.1. Introduction . . . . .	167
7.2. Texture representation and characterization using local extrema . . . . .	169
7.2.1. Motivation and approach . . . . .	169
7.2.2. Local extrema keypoints within SAR images . . . . .	172
7.3. Unsupervised change detection . . . . .	175
7.3.1. Proposed framework . . . . .	175
7.3.2. Weighted graph construction from keypoints . . . . .	176
7.3.3. Change measure (CM) generation . . . . .	178
7.4. Experimental study . . . . .	179
7.4.1. Data description and evaluation criteria . . . . .	179
7.4.2. Change detection results . . . . .	181
7.4.3. Sensitivity to parameters . . . . .	185
7.4.4. Comparison with the NLM model . . . . .	188
7.4.5. Analysis of the algorithm complexity . . . . .	191
7.5. Application to glacier flow measurement . . . . .	192
7.5.1. Proposed method . . . . .	193
7.5.2. Results . . . . .	194
7.6. Conclusion . . . . .	196
7.7. References . . . . .	197

<b>Chapter 8. Multitemporal Analysis of Sentinel-1/2 Images for Land Use Monitoring at Regional Scale . . . . .</b>	<b>201</b>
Andrea GARZELLI and Claudia ZOPPETTI	

8.1. Introduction . . . . .	201
8.2. Proposed method . . . . .	203
8.2.1. Test site and data . . . . .	206

8.3. SAR processing . . . . .	209
8.4. Optical processing . . . . .	215
8.5. Combination layer . . . . .	217
8.6. Results . . . . .	219
8.7. Conclusion . . . . .	220
8.8. References . . . . .	221
<b>Chapter 9. Statistical Difference Models for Change Detection in Multispectral Images . . . . .</b>	<b>223</b>
Massimo ZANETTI, Francesca BOVOLO and Lorenzo BRUZZONE	
9.1. Introduction . . . . .	223
9.2. Overview of the change detection problem . . . . .	225
9.2.1. Change detection methods for multispectral images . . . . .	227
9.2.2. Challenges addressed in this chapter . . . . .	230
9.3. The Rayleigh–Rice mixture model for the magnitude of the difference image . . . . .	231
9.3.1. Magnitude image statistical mixture model . . . . .	231
9.3.2. Bayesian decision . . . . .	233
9.3.3. Numerical approach to parameter estimation . . . . .	234
9.4. A compound multiclass statistical model of the difference image . . . . .	239
9.4.1. Difference image statistical mixture model . . . . .	240
9.4.2. Magnitude image statistical mixture model . . . . .	245
9.4.3. Bayesian decision . . . . .	248
9.4.4. Numerical approach to parameter estimation . . . . .	249
9.5. Experimental results . . . . .	253
9.5.1. Dataset description . . . . .	253
9.5.2. Experimental setup . . . . .	256
9.5.3. Test 1: Two-class Rayleigh–Rice mixture model . . . . .	256
9.5.4. Test 2: Multiclass Rician mixture model . . . . .	260
9.6. Conclusion . . . . .	266
9.7. References . . . . .	267
<b>List of Authors . . . . .</b>	<b>275</b>
