

# Contents

<b>Foreword . . . . .</b>	<b>xi</b>
Colette CAUVIN-REYMOND	
<b>Introduction . . . . .</b>	<b>xvii</b>
Boris MERICKSKAY	
<b>Chapter 1. The Multiple Facets of the Cartographer:</b>	
<b>Communication between Rules and Attraction. . . . .</b>	<b>1</b>
Christine ZANIN	
1.1. Introduction . . . . .	1
1.2. The cartographer semiologist: how to use the map. . . . .	4
1.3. The cartographer, a craftsman drawer . . . . .	7
1.4. The cartographer, officer of political power. . . . .	9
1.5. The cartographer, crossing borders from geography to social sciences . . . . .	12
1.6. The cartographer, an expert in geographic data. . . . .	16
1.7. The art of multiplying maps to communicate better . . . . .	20
1.8. Conclusion . . . . .	24
1.9. References . . . . .	26

<b>Chapter 2. Cartography as a Communication Tool:</b>	
<b>Thoughts on Models</b>	31
Laurent JÉGOU	
2.1. Introduction	31
2.2. Are maps a simple means of communication?	33
2.2.1. The communication model in cartography	33
2.2.2. First extensions of the model	34
2.3. Variations of the traditional model of cartographic communication	37
2.3.1. The semiology of graphics, an essential element of the model	37
2.3.2. Integrating the notion of intention of communication	38
2.3.3. Context, operating modes and reception in cartography	40
2.3.4. Disruptions induced by the multiplicity of users	43
2.4. How to integrate the esthetical map function?	46
2.4.1. Consideration of esthetics from the cartographer's side	48
2.4.2. Consideration of esthetics from the user's side	50
2.5. Which places of innovations are in the cartographic communication model?	52
2.5.1. The designing of the map	52
2.5.2. Using the maps	54
2.5.3. Diversification of communication flows	54
2.5.4. A new esthetic functioning	54
2.5.5. Focus on the reception of the maps	54
2.6. Limitations and conclusion	55
2.7. References	57
<b>Chapter 3. Communication Challenges in Reproducible Multi-representation</b>	61
Nicolas LAMBERT, Timothée GIRAUD and Ronan YSEBAERT	
3.1. Introduction	61
3.2. Searching and communicating with maps	62
3.2.1. The map as a product of a scientific process	62
3.2.2. A highly political tool	63
3.2.3. Cartography: above all a matter of choice	65
3.2.4. The cartographic language and its rhetoric	65
3.2.5. Traceable and reproducible transformations	68
3.3. Multi-representation cartography: variation on a theme	68
3.3.1. Presentation of the multi-representation approach	68
3.3.2. Cartographic constants	72

---

3.3.3. Discourse and mode of cartographic representation. . . . .	75
3.3.4. Breaking out of the geometric constraint . . . . .	77
3.3.5. The public challenge . . . . .	80
3.3.6. Cartographic representations for specific themes . . . . .	82
3.4. Conclusion . . . . .	85
3.5. References . . . . .	88
<b>Chapter 4. Mapping Flows and Movements . . . . .</b>	93
Françoise BAHOKEN	
4.1. Introduction . . . . .	93
4.2. Theoretical and methodological considerations of the cartographic construction of flows . . . . .	95
4.2.1. The flow line. . . . .	95
4.2.2. The Links-Nodes logic of cartographic reasoning. . . . .	97
4.2.3. From the type of matrix to the type of mapped flows. . . . .	98
4.2.4. From flow to movement . . . . .	103
4.3. The cartographic image of the flow: between continuity and technological disruptions . . . . .	105
4.3.1. Permanence of an old method of representation . . . . .	106
4.3.2. From a discrete approach to a continuous flow/movement approach . . . . .	107
4.3.3. Mapping flows in the computerization era . . . . .	109
4.3.4. Cartographic image of the flow on the Geoweb . . . . .	110
4.4. Challenges related to flow mapping through the example of global maritime flows . . . . .	113
4.4.1. Challenges of flow mapping at the global level . . . . .	114
4.4.2. Geographical space in the representation of global flows . . . . .	120
4.4.3. Approximating space in the representation of global flows . . . . .	123
4.5. Conclusion . . . . .	125
4.6. References . . . . .	130
<b>Chapter 5. Cartographic Communication on the Geoweb: Between Maps and Data . . . . .</b>	135
Matthieu NOUCHER	
5.1. Introduction . . . . .	135
5.2. Is Geoweb a new word for a new reality? . . . . .	138
5.2.1. A slow and progressive opening of the expert approach of geomatics . . . . .	138

5.2.2. The Geoweb: a geospatial revolution? . . . . .	140
5.2.3. The map's place . . . . .	142
5.3. The Geoweb era: new configurations between producers and users, amateurs and professionals . . . . .	144
5.3.1. The malleability of maps (and data) in the Geoweb era . . . . .	146
5.3.2. Individualization of sources and egocartography . . . . .	150
5.4. Conclusion . . . . .	153
5.5. References . . . . .	155
 <b>Chapter 6. Rethinking Cartography on the Geoweb: Principles, Tools and Modes of Representation . . . . .</b>	159
Boris MERICKSKAY	
6.1. Introduction . . . . .	159
6.2. Coming back to cartography in the Geoweb . . . . .	160
6.2.1. The Geoweb, an environment for reading and writing maps. . . . .	160
6.2.2. Cartographic communication in the movement of data (geo)visualization. . . . .	161
6.3. Base maps and interactivity: a look at the basic elements of Geoweb maps . . . . .	163
6.3.1. Base maps as referential of web maps . . . . .	164
6.3.2. Interactivity as a central element of online maps . . . . .	166
6.4. Overview of the Geoweb cartographic language . . . . .	168
6.4.1. Back to the Geoweb semiology. . . . .	168
6.4.2. The hegemony of map markers. . . . .	170
6.4.3. Thematic cartography representation modes . . . . .	172
6.4.4. Spatial representation of big data. . . . .	173
6.4.5. The representation of spatial data in three dimensions . . . . .	179
6.5. The importance of technology for cartographic communication on the Geoweb. . . . .	183
6.5.1. The thematic cartography toolbox on the Geoweb . . . . .	184
6.5.2. Increasing technicalization of practices . . . . .	187
6.6. Conclusion and perspectives . . . . .	188
6.7. References . . . . .	190
 <b>Chapter 7. Geovisualization and Cartographic Communication: Style and Interaction . . . . .</b>	195
Sidonie CHRISTOPHE	
7.1. Introduction . . . . .	195
7.2. Geovisualization and cartographic communication . . . . .	196

---

7.2.1. Geovisualization, a field of research and interdisciplinary practices . . . . .	196
7.2.2. Challenges on data, user and usage . . . . .	197
7.2.3. Linkages with cartography and data visualization . . . . .	199
7.3. Geovisualization tools, between personalization and interaction . . . . .	200
7.3.1. Map customization and visual data mining . . . . .	200
7.3.2. Challenges around interaction with data . . . . .	205
7.4. Interacting with style for more cartographic expressiveness . . . . .	207
7.4.1. Back to the notion of style . . . . .	208
7.4.2. Style in cartography, two levels of definitions . . . . .	208
7.4.3. The example of topographic map styles . . . . .	210
7.4.4. Pictorial, graphic and artistic styles . . . . .	212
7.5. Diversification of representation modes and interaction for new forms of cartographic communication . . . . .	215
7.5.1. Interaction with style to help visual focus . . . . .	216
7.5.2. Interaction with styles for more realism . . . . .	217
7.5.3. 2D and 3D interactions to multiply points of view . . . . .	218
7.5.4. Visual exploration in spatiotemporal scales . . . . .	219
7.6. Conclusion . . . . .	221
7.7. References . . . . .	222
 <b>Conclusion</b> . . . . .	229
Boris MERICKAY	
 <b>List of Authors</b> . . . . .	233
 <b>Index</b> . . . . .	235
