Preface	xi
André RICARD and Jayr AMORIM	
Part 1. Plasmas	1
Chapter 1. Plasma Electron Collisions and Optical Spectroscopy	3
André RICARD	
1.1. Introduction.	3
1.2. Plasma electron collisions	4
1.2.1. Plasma electron excitation.	4
1.2.2. Plasma electron destruction	5
1.2.3. Radiative states	6
1.2.4. Metastable states	6
1.3. Diatomic spectrum nomenclature.	9
1.3.1. Electronic states	9
1.3.2. Vibrational states	10
1.3.3. Rotational states.	10
1.3.4. Interaction of rotation and electron spin.	11
1.4. Energy levels and potential curves	11
1.5. Optical emission spectroscopy	16
1.5.1. Identification of plasma excited species.	16
1.5.2. Impurity detection	18

1.6. Optical absorption spectroscopy	19
1.6.1. Ar metastable and resonant atoms density	19
1.6.2. Metal atoms density	22
1.6.3. Ti atoms density	25
1.6.4. The pulsed optical source of Ti and Ti ⁺	27
1.6.5. The Ti metastable atoms and ions densities	27
1.7. Relative atoms density by actinometry	28
1.7.1. N-, H- and O-atoms	28
1.7.2. N ₂ (X,v) vibrational molecules	34
1.8. Conclusion	38
1.9. References	39
Chapter 2. Electron, Vibrational and Rotational Temperatures of Plasmas	41
André RICARD and Michel TOUZEAU	
2.1. Introduction	41
2.2. N ₂ electron temperature	42
2.3. Nitrogen vibrational temperature	44
2.4. Nitrogen rotational temperature	47
2.5. Interference of Ar(³ P ₂) and N ₂ (E) metastables in N ₂ rotational temperature measurements	50
2.5.1. Case of Ar(³ P ₂)	50
2.5.2. Case of N ₂ (E)	52
2.6. Rotational temperatures of molecular gases, other than N ₂	54
2.6.1. The CN thermometer	54
2.6.2. The OH thermometer	56
2.6.3. Rotational temperatures of H ₂ plasmas	57
2.6.4. Rotational temperatures of O ₂ plasmas	59
2.7. Conclusion	61
2.8. References	62
Chapter 3. Active Species in Plasmas Produced by Microwave Cavities	65
André RICARD	
3.1. Introduction	65
3.2. Discharges sustained by microwave fields including surface waves at low gas pressure (< 1 Torr)	66

3.2.1. Comparison of Ar metastable atom density in microwave and DC discharges as a function of pressure in the 0.02–1 Torr pressure range	67
3.2.2. Axially averaged radial distribution of emission intensity of a thin emission line (549.6 nm) in an argon surfatron plasma (0.05–0.35 Torr)	69
3.2.3. Axially averaged radial distribution of the population density of argon resonant and metastable excited states of the Ar ($3p^5 4s$) configuration in a surfatron plasma compared to a DC discharge (0.05–0.35 Torr)	74
3.3. Ionization of N_2 by electron collisions in surfatron and surfaguide cavities (0.1–3 Torr)	77
3.4. UHF plasmas at medium N_2 gas pressure (0.1–3 Torr)	79
3.5. Surfatron plasmas at atmospheric gas pressure	81
3.6. Microwave torches at atmospheric gas pressures.	84
3.7. Conclusion	88
3.8. References	88
Part 2. Afterglows	91
Chapter 4. Diagnostics of N_2 Active Species Densities by Emission Spectroscopy in Afterglow Conditions. Line Intensity Ratio and NO Titration Methods	93
André RICARD and Jean-Philippe SARRETTE	
4.1. Introduction.	93
4.2. OES and kinetic reactions in nitrogen afterglow conditions	94
4.3. Titration by NOext of N and O atom density	104
4.4. References	108
Chapter 5. Study of Microwave Afterglows in N_2 Gas Mixtures by Emission Spectroscopy and LIF	109
Jayr AMORIM, Gérard BARAVIAN, Freddy GABORIAU, André RICARD and Jean-Philippe SARRETTE	
5.1. Introduction.	109
5.2. The experimental set-up in LSGS (Nancy)	110
5.2.1. Experimental flowing afterglow set-up with N and O atoms: Titration by NO in LSGS (Nancy)	110

5.2.2. Continuous flowing Ar afterglows with separated N ₂ and O ₂ pulsed gases	112
5.3. The N and C atoms density in the Plasmas laboratory (Montreal).	113
5.4. The N and H atoms density by TALIF in LPGP (Orsay)	116
5.5. The N and H atom density by TALIF in Laplace (Toulouse)	121
5.6. Kinetics of the N and H atoms density by TALIF and OES at LAPLACE (Toulouse)	125
5.6.1. Results of TALIF	125
5.6.2. The OES and kinetics reactions of N ₂ -H ₂ gas mixtures	127
5.6.3. The role of N(² D) metastable atoms	128
5.7. Conclusion	130
5.8. References	130
Chapter 6. Comparison on RF and HF Afterglows in N₂ Gas Mixtures	133
Jayr AMORIM, André RICARD and Jean-Philippe SARRETTE	
6.1. Introduction.	134
6.2. RF and HF N ₂ flowing plasmas and afterglows	135
6.2.1. Experimental set-ups	135
6.2.2. Temperatures of the N ₂ RF and HF plasmas	137
6.2.3. The N ₂ and N ₂ -H ₂ RF and HF afterglows.	139
6.2.4. Density of C atoms	144
6.2.5. Destruction of H, C and O atoms on the tube walls	148
6.2.6. N ₂ plasmas and afterglows of RF and HF jets	151
6.3. N ₂ HF afterglows in R(N ₂ , He, Ar)-N ₂ -H ₂ (CH ₄) gas mixtures	156
6.3.1. Spectra	156
6.3.2. Kinetics of R(N ₂ ,He,Ar)/x %N ₂ afterglows	158
6.3.3. Kinetics of R(N ₂ ,He,Ar)/xN ₂ -5% H ₂) afterglows.	163
6.3.4. The O atoms and NO molecules impurities.	169
6.4. Conclusion	171
6.5. References	173
Part 3. Applications of Afterglows.	175
Chapter 7. Nitriding of TiO₂ Surface in the RF and HF Afterglows.	177
Yu-Kwon KIM and André RICARD	
7.1. Surface reactions.	177

7.2. Sample preparation, treatments and analysis	182
7.3. The flowing afterglow of RF and microwave discharges for TiO ₂ surface activation	183
7.3.1. Results in the N ₂ RF afterglow at room temperature (RT)	183
7.3.2. Results in the N ₂ -2%H ₂ RF afterglow at RT	184
7.3.3. Results in N ₂ HF just after the pink afterglow near RT	186
7.3.4. Results in N ₂ -2%H ₂ HF afterglow at 300°C	188
7.3.5. Results in N ₂ -0.04%CH ₄ HF afterglow at 300°C	190
7.4. Conclusion	193
7.5. References	194
Chapter 8. Afterglows of HF Plasmas in N₂ for Sterilization: Plasmalyse	195
Cristina CANAL, Sarah COUSTY, André RICARD and Jean-Philippe SARRETTE	
8.1. Introduction.	196
8.2. The sterilization in the plasmas lab of the University of Montreal	196
8.3. The sterilization in Laplace (University of Toulouse)	199
8.3.1. Sterilization in N ₂ -O ₂ and N ₂ afterglows	199
8.3.2. Plasmalyse	208
8.3.3. Transmission of <i>N</i> atoms through membranes	214
8.3.4. Transmission of <i>N</i> atoms through hollow tubes	222
8.4. Afterglows at atmospheric gas pressure for sterilization	230
8.4.1. Pulsed corona flowing afterglows (Orsay Plasma Laboratory).	230
8.4.2. DBD afterglows (LEGP-Pau University)	236
8.5. Conclusion	239
8.6. References	241
Postface	243
André RICARD	
List of Authors	255
Index	257
