Contents

Introduction ix

Part 1. Literature Review 1

Chapter 1. Case Study 3

1.1. E-commerce 3
1.2. Web application for an e-book distributor 4

Chapter 2. Concept of Requirements 7

2.1. Requirements. 7
2.2. Statements of requirements 10
2.3. Goals 10
2.3.1. Nature and definition of goals 10
2.3.2. Benefits of goals 12
2.3.3. Sources of goals 13

Chapter 3. Existing Scales of Requirements 15

3.1. “User–system” scale 15
3.1.1. User requirements 15
3.1.2. System requirements 16
3.2. “System–software scale” 16
3.2.1. System requirements 17

3.2.2. Software requirements 17
3.2.3. Relationships between system requirements and software requirements 18
3.3. “Goal–design” scale 19
3.3.1. Goal-level requirements 19
3.3.2. Domain-level requirements 19
3.3.3. Product-level requirements 19
3.3.4. Design-level requirements. 20
3.4. Discussion 20

Chapter 4. Existing Taxonomies of Requirements 21

4.1. “Requirement–domain property–assumption–definition” taxonomy 22
4.1.1. Requirement. 22
4.1.2. Domain property 22
4.1.3. Assumption 23
4.1.4. Definition 23
4.2. “Faceted” taxonomy 23
4.3. “Behavioral requirements–non-behavioral requirements” (BNB) taxonomy 26
4.4. “Fundamental categories–secondary categories” (FS) taxonomy 27
4.4.1. Fundamental categories 27
4.4.2. Secondary categories 28
4.5. “Functional requirements–non-functional requirements” (FNF) taxonomy 28
4.5.1. Functional requirements 28
4.5.2. Non-functional requirements 29
4.6. Other taxonomies 40
4.6.1. “Primary requirements–derived requirements” (PD) taxonomy 40
4.6.2. “Business requirements–technical requirements” (BT) taxonomy 41
4.6.3. “Product requirements–process requirements” (P2) taxonomy 41
4.7. Discussion 42

Part 2. SMART: A Systemic Approach to Categorizing and Modeling Requirements 45

Chapter 5. Conceptualization 47

5.1. A new reference framework 47
5.1.1. Dimension 1: requirements subjects 48
5.1.2. Dimension 2: requirements factors 56
5.2. New requirement definition 59
5.3. New scales and taxonomies of requirements 59
5.3.1. “User–analyst” (UA) requirements scale 60
5.3.2. “Business–system–software” requirements scale 62
5.3.3. “Endogenous–exogenous” requirements taxonomy 67
5.3.4. Requirements taxonomy by nature 72
5.4. New hybrid requirements categorization 74

Chapter 6. Operationalization 79

6.1. New requirements metadata model 79
6.2. New requirements model 88
6.2.1. Endogenous requirements 92
6.2.2. Exogenous requirements 99

Chapter 7. Usage 107

7.1. Objectives 107
7.2. Usage scenarios 108
7.2.1. Elicitation activity 109
7.2.2. Specification activity 109
7.2.3. Analysis activity 110
7.2.4. Validation activity 111
7.2.5. Qualification activity 111

Chapter 8. Evaluation 113

8.1. Comparison with Somerville’s approach 113
8.2. Comparison with Lauesen’s approach 115
8.3. Comparison with Robertson’s approach 115
8.4. Comparison with Van Lamsweerde’s approach 116
8.5. Comparison with Glinz’s approach 117
8.6. Comparison with Meyer’s approach 117

Conclusion 121

Appendix. Cards Relating to the Nomenclature of the Categories of Requirements 123
