<b>Preface . . . . .</b>	<b>xi</b>
Abdelkhalak EL HAMI	
<b>Chapter 1. Dynamic of PP-GF70 Using an Intelligent Method . . . . .</b>	<b>1</b>
Abdelilah ELBAZZE and Bouchaib RADI	
1.1. Introduction . . . . .	1
1.2. Crash analysis . . . . .	3
1.2.1. Dynamic equations . . . . .	3
1.2.2. Explicit simulation . . . . .	7
1.2.3. Shell elements . . . . .	11
1.3. Application to automobile crashes . . . . .	12
1.3.1. Description of the study . . . . .	12
1.3.2. Model preprocessing . . . . .	13
1.3.3. Mesh generation according to ANSA . . . . .	14
1.3.4. Materials and properties . . . . .	14
1.3.5. Generation of part assembly connections . . . . .	15
1.3.6. Assembly of components . . . . .	16
1.3.7. Interfaces . . . . .	17
1.3.8. Side crash with mobile barrier . . . . .	18
1.4. Numerical results and discussions . . . . .	21
1.4.1. Numerical stability of the model . . . . .	21
1.4.2. Model behavior . . . . .	23
1.5. Behavior of the target part during impact . . . . .	24
1.5.1. Deformation of the target part . . . . .	24
1.5.2. Plastic deformation . . . . .	26
1.6. Conclusion . . . . .	27
1.7. References . . . . .	27

<b>Chapter 2. AI Integration into Additive Manufacturing . . . . .</b>	<b>31</b>
Adnane ZOUBEIR, Bouchaib RADI and Abdelkhalak EL HAMI	
2.1. Introduction . . . . .	31
2.2. Additive manufacturing processes . . . . .	32
2.2.1. Principle of additive manufacturing . . . . .	32
2.2.2. Various stages of additive manufacturing . . . . .	33
2.3. Integration of AI into additive manufacturing . . . . .	35
2.3.1. Introduction . . . . .	35
2.3.2. Feasibility of AI-based solutions . . . . .	36
2.3.3. Training data . . . . .	36
2.3.4. Prediction models and selection of the proper solution . . . . .	37
2.4. Development of an AI model for additive manufacturing . . . . .	37
2.4.1. Introduction . . . . .	37
2.4.2. Machine learning and deep learning . . . . .	38
2.4.3. Data preparation for training an AI model . . . . .	38
2.4.4. AI model training . . . . .	39
2.4.5. Performance of the AI model prediction . . . . .	41
2.4.6. Application to the optimization of manufacturing parameters . . . . .	41
2.5. Conclusion . . . . .	43
2.6. References . . . . .	44
<b>Chapter 3. Optimization of BGA Components under Real Service Conditions . . . . .</b>	<b>47</b>
Sinda GHENAM, Abdelkhalak EL HAMI, Wajih GAFSI, Ali AKROUT and Mohamed HADDAR	
3.1. Introduction . . . . .	47
3.2. Presentation of the optimization method . . . . .	49
3.3. Presentation of the system . . . . .	50
3.4. Methodology . . . . .	51
3.4.1. Deterministic design optimization (DDO) . . . . .	51
3.4.2. Reliability-based design optimization (RBDO) . . . . .	52
3.5. Results . . . . .	55
3.5.1. DDO . . . . .	55
3.5.2. RBDO . . . . .	57
3.6. Conclusion . . . . .	60
3.7. References . . . . .	61
<b>Chapter 4. Electronic Toll Collection in the Age of Connected Vehicles . . . . .</b>	<b>65</b>
Adnane CABANI and Houcine CHAFOUK	
4.1. Introduction . . . . .	65
4.2. Electronic toll collection service using ITS-G5 . . . . .	66
4.2.1. Constant velocity (CV) model . . . . .	69

---

4.2.2. Constant acceleration (CA) model . . . . .	70
4.2.3. Constant turn rate and velocity (CTRV) model . . . . .	70
4.2.4. Constant turn rate and acceleration (CTRA) model . . . . .	71
4.3. Experimental results of the path tracking . . . . .	72
4.4. Conclusion . . . . .	74
4.5. References . . . . .	74
<b>Chapter 5. At the Core of Artificial Intelligence: Leveraging Machine Learning through Random Forest . . . . .</b>	<b>77</b>
Anas EL ATTAOUI, Younes KOULOU and Norelislam EL HAMI	
5.1. Overview of AI and its branches . . . . .	78
5.1.1. AI and machine learning . . . . .	78
5.1.2. Robust techniques are required for classification and regression . . . . .	79
5.1.3. Introduction to the random forest method . . . . .	79
5.2. Decision trees . . . . .	79
5.2.1. Structure of a decision tree and associated terms. . . . .	79
5.2.2. Entropy . . . . .	82
5.2.3. Information gain . . . . .	83
5.2.4. Gini index . . . . .	83
5.2.5. Decision tree generation algorithm . . . . .	84
5.2.6. Example of decision tree construction . . . . .	86
5.2.7. Advantages and limitations of decision trees . . . . .	93
5.3. Random forest foundations . . . . .	93
5.3.1. Origin and basic principle of the random forest . . . . .	93
5.3.2. Stages of random forest algorithm. . . . .	94
5.3.3. Random forest example for classification. . . . .	96
5.3.4. Random forest example for regression . . . . .	102
5.4. Case study: detection of malware on Android. . . . .	110
5.4.1. Data presentation . . . . .	110
5.4.2. Results . . . . .	111
5.5. Chapter essentials . . . . .	113
5.6. References . . . . .	114
<b>Chapter 6. Linear Regression and Application to Artificial Intelligence . . . . .</b>	<b>121</b>
Sara RHOUS, Norelislam EL HAMI and Younes KOULOU	
6.1. Introduction . . . . .	121
6.2. Linear regression model. . . . .	122
6.2.1. Objectives and use . . . . .	122
6.2.2. Applications to everyday life . . . . .	123

6.2.3. Simple model vs. multiple model . . . . .	124
6.2.4. Regression coefficients . . . . .	125
6.3. Methods for assessing coefficients . . . . .	126
6.3.1. Ordinary least squares (OLS) method . . . . .	126
6.3.2. Ridge regression . . . . .	127
6.3.3. LASSO regression . . . . .	128
6.3.4. Elastic Net regression . . . . .	129
6.3.5. Weighted least squares . . . . .	131
6.3.6. Linear regression by gradient descent . . . . .	132
6.4. Model evaluation . . . . .	133
6.4.1. Performance evaluation metrics . . . . .	133
6.4.2. Cross-validation . . . . .	136
6.4.3. Model diagnosis . . . . .	139
6.5. Practical cases . . . . .	141
6.5.1. Data preparation and analysis . . . . .	141
6.5.2. Model training . . . . .	147
6.6. Conclusion . . . . .	151
6.7. References . . . . .	152
<b>Chapter 7. Machine Learning and Artificial Intelligence with XGBoost Algorithm for Binary Classification . . . . .</b>	<b>161</b>
Hakima REDDAD, Maria ZEMZAMI, Norelislam EL HAMI and Nabil HMINA	
7.1. Introduction . . . . .	161
7.2. XGBoost algorithm: state of the art . . . . .	164
7.2.1. Anatomy of XGBoost algorithm . . . . .	165
7.2.2. Main features of XGBoost algorithm . . . . .	166
7.2.3. XGBoost operation . . . . .	173
7.2.4. Theoretical basis of XGBoost algorithm . . . . .	174
7.2.5. Feature importance . . . . .	176
7.3. Case study: application of the XGBoost algorithm – resolution of a binary classification problem . . . . .	177
7.3.1. Problem statement . . . . .	177
7.3.2. Data preparation . . . . .	178
7.3.3. Exploratory data analysis . . . . .	179
7.3.4. Construction of the predictive model with XGBoost algorithm . . . . .	180
7.3.5. Evaluation of the predictive model . . . . .	181
7.4. Results and discussions . . . . .	183
7.5. Conclusion . . . . .	185
7.6. References . . . . .	185

---

<b>Chapter 8. Application of Interoperability to Intelligent System of Systems . . . . .</b>	193
Younes KOULOU, Norelislam EL HAMI, Anas EL ATTAOUI and Sara RHOAS	
8.1. General context of SoS . . . . .	194
8.1.1. Definitions. . . . .	194
8.1.2. SoS taxonomy. . . . .	195
8.1.3. Properties of SoS . . . . .	197
8.2. Concept of intelligent SoS . . . . .	200
8.2.1. Intelligence in SoS . . . . .	200
8.2.2. Architecture of intelligent SoS. . . . .	201
8.3. Interoperability. . . . .	203
8.3.1. Classification of interoperability. . . . .	204
8.4. Evaluation of interoperability as a basis for the structural analysis of intelligent SoS . . . . .	206
8.4.1. Quantification of interoperability barriers . . . . .	207
8.4.2. Inefficiency of communication . . . . .	209
8.4.3. Application to the case study . . . . .	212
8.5. Conclusion . . . . .	215
8.6. References . . . . .	216
<b>List of Authors . . . . .</b>	223
<b>Index. . . . .</b>	225
