Foreword	xiii
Preface	xvii
Part 1. Inventive Knowledge and Inventive Intellectual Corpus	1
Chapter 1. Nature of Inventive Knowledge	3
1.1. Knowledge levels	3
1.1.1. Knowledge in everyday life	4
1.1.2. Scientific knowledge	4
1.1.3. Knowledge in the Japanese intellectual tradition.	4
1.1.4. Knowledge according to cognitive science	5
1.2. The limits of knowledge	6
1.3. Value chain and knowledge evolution chain	7
1.3.1. The knowledge value chain inspired by Porter.	7
1.3.2. The DIKW knowledge evolution chain	16
1.4. Inventive knowledge concepts	21
1.4.1. Current and fruitful ideas.	21
1.4.2. Depth of inventive knowledge	22
1.5. Cognitive and social dimensions of the knowledge actor	22
1.5.1. From erudite (scholar) to expert	23
1.5.2. From expert to inventor	23
1.6. Conclusion	24
Chapter 2. Representation and Analysis of Inventive Knowledge	25
2.1. The concept of dematerialized knowledge object.	25
2.1.1. Founding principle	25
2.1.2. Illustration by electromagnetic wave detection object.	26
2.1.3. Application to the description included in patents	27

2.2. Cartography or mapping	28
2.2.1. Introduction	28
2.2.2. Information mapping	28
2.2.3. Knowledge mapping	29
2.3. The map	30
2.3.1. Introduction to the map.	30
2.3.2. Types of maps.	31
2.4. Cognitive mapping.	32
2.5. The cognitive map	32
2.6. A reasoned procedure for analyzing inventive knowledge.	35
2.6.1. Introduction	35
2.6.2. Work on a knowledge structure	36
2.6.3. Example of an invention file	37
2.7. Conclusion	40
Chapter 3. Knowledge: Bridge between Innovation, Invention and Intellectual Property.	41
3.1. Innovation	41
3.1.1. Multidimensional aspect of innovation	41
3.1.2. Innovation procedures and processes	42
3.2. Invention and the ability to invent	44
3.2.1. Concept of inventiveness.	44
3.2.2. Concept of creativity	44
3.2.3. Combining creativity and inventiveness	46
3.3. Intellectual property rights	46
3.3.1. General information on intellectual property rights and copyright	46
3.3.2. The patent	47
3.3.3. Summary.	48
3.4. Analysis of the links between invention, innovation and inventive intellectual corpus	48
3.4.1. Links between industrial property rights and innovation	48
3.4.2. Links between industrial property rights and invention	49
3.4.3. Links between invention and intellectual property rights	51
3.4.4. Links between innovation and intellectual property rights	51
3.4.5. Links between invention and innovation	51
3.4.6. Links between innovation and invention	51
3.4.7. Reciprocal links of the inventive activity and the inventive intellectual corpus	51
3.5. The nature of the bridges between knowledge domains	53
3.5.1. The perspective of economists.	54
3.5.2. The knowledge management perspective on innovation	54
3.5.3. The perspective of KBI (Knowledge-Based Innovation)	55
3.6. Conclusion	55

Chapter 4. Knowledge Capital and Inventive Intellectual Corpus	57
4.1. Knowledge capital and intellectual corpus	57
4.1.1. Knowledge capital	57
4.1.2. Intellectual corpus	57
4.2. Inventive intellectual corpus	64
4.2.1. Dematerialized nature of the inventive intellectual corpus	64
4.2.2. Epistemic diagram of the inventive intellectual corpus	64
4.2.3. Inventive intellectual corpus versus intangible capital.	65
4.2.4. Inventive intellectual corpus and creation of inventive knowledge.	65
4.2.5. Traces in the inventive intellectual corpus	68
4.3. Projection of the inventive intellectual corpus on the inventive knowledge map [®]	69
4.4. Conclusion	71
Part 2. Knowledge-Based Innovation	75
Chapter 5. Innovation Dynamics and Innovation as a Mode of Innovative Problem Solving.	77
5.1. Innovation dynamics	77
5.2. Using knowledge to find innovative solutions	79
5.2.1. Relationship between knowledge management and innovation within the general framework.	79
5.2.2. Relationship between knowledge management and innovation within the context of research and development activities	83
5.2.3. Known knowledge management methods instrumenting innovation.	83
5.3. Overview of some common methods and techniques	84
5.4. Innovation and knowledge evolution by the principle of divergence-convergence	85
5.5. Innovation and knowledge evolution by the principle of analogy	86
5.6. Innovation and knowledge evolution by the principle of expansion	87
5.7. Generalization: global problem-solving process	88
5.8. Conclusion	89
Chapter 6. Innovation in Ideation Mode	91
6.1. The concept of ideation	91
6.2. Knowledge-based innovation (KBI) field	91
6.2.1. Relationship between knowledge management and innovation.	92
6.2.2. Management by the strategic capabilities portfolio	92
6.2.3. Knowledge-based innovation as a process	92
6.2.4. Two key hypotheses	93
6.2.5. Systemic evolution	94
6.2.6. Path dependency	96

6.3. Principle of emergence	97
6.3.1. Need for a new principle for creativity	97
6.3.2. Principle of emergence	98
6.4. Theoretical model of knowledge evolution (the “chaotically” inspired model of knowledge evolution by emergence).	100
6.4.1. Step 1: knowledge, a complex system.	100
6.4.2. Step 2: knowledge creation, an evolution of the knowledge system	101
6.4.3. Step 3: description of knowledge evolution by another complex system.	102
6.4.4. Step 4: generalization of the evolution process to any complex system evolving over time.	102
6.5. Theoretical model of inventive knowledge creation (step 5).	105
6.6. Instantiation of the “chaotically” inspired model of knowledge evolution by the ICAROS [®] method (step 6).	107
6.7. The purpose of ideation for innovation	110
6.8. Conclusion	110
Chapter 7. Implementation of the ICAROS[®] Method: Case Study	113
7.1. Introduction to the case study.	113
7.2. Funnel model.	113
7.3. Presentation of the experiment context	114
7.3.1. Concept of Knowledge and Technology Areas Portfolio	115
7.3.2. Adaptation of the Knowledge and Technology Areas Portfolio concept to the company under observation: the Knowledge and Technology Areas Portfolio.	117
7.4. Preliminary step: constitution of cognitive stimulus	118
7.4.1. Structuring of the intellectual corpus by knowledge domain	118
7.4.2. Development of cognitive stimulus	124
7.5. Course	130
7.5.1. Individual stimulation session	131
7.5.2. Seminar	137
7.5.3. Dissemination	147
7.6. Conclusion in the form of lessons learned.	147
Part 3. Inventive Activity and Visibility of Inventive Potential	151
Chapter 8. The Inventive Potential of a Company	153
8.1. Reminder on inventive activity	153
8.2. Notion of inventive potential	154
8.3. Annual innovation and invention activity file.	154
8.4. Concept of making the inventive potential visible	156
8.5. Inventive data knowledge base	158

8.6. Introduction to the activation of inventive knowledge extracted from inventive intellectual corpus	158
8.7. Conclusion	160
Chapter 9. Managerial Applications	161
9.1. Reasoned contribution to technical strategic decision-making support	161
9.2. Strategic surveillance	162
9.2.1. Introduction	162
9.2.2. The place of strategic surveillance in overall performance steering	162
9.2.3. Knowledge management and environment surveillance.	165
9.2.4. Interaction between knowledge capital and its environment	166
9.2.5. Knowledge-based strategic surveillance	168
9.3. Information system on patent portfolio management.	172
9.3.1. Introduction	173
9.3.2. The patent file considered as a knowledge object	173
9.3.3. Description of the patent information system	174
9.3.4. Descriptive sheet of a patent file.	177
9.3.5. Presentation support for the inventor's working file.	178
9.3.6. Applications.	178
9.4. Valorization of inventive activity associated with intangible assets.	183
9.4.1. Limits of automated analysis of technical information contained in a patent portfolio	184
9.4.2. Limits to the quality of the drafting of patent files.	186
9.4.3. Identification of the knowledge generated by the inventive activity involved in the patent	187
9.5. Publication policy	187
9.6. Determination of the inventive activity for the research tax credit	188
9.6.1. Industrial research and development	188
9.6.2. Characteristics of the research tax credit in France	189
9.6.3. Application of inventive knowledge engineering methods	191
9.7. Reasoned contribution to innovation management	195
9.8. The knowledge worker	196
9.8.1. Knowledge worker definitions.	196
9.8.2. Characteristics of the knowledge worker	196
9.8.3. The knowledge worker in their relationship with the law	197
9.8.4. Knowledge Manager	199
9.9. A new profession: the inventive activity expert.	202
9.10. The cognitive scientist and inventive activity expert pair.	203
9.11. Need for a change in culture.	203
9.11.1. Compatibility of conventional companies with the development of creativity.	203

9.11.2. New knowledge-based organization	204
9.12. Conclusion	204
Part 4. Perspectives	207
Chapter 10. Knowledge Assessment Based on Knowledge	209
10.1. Introduction	209
10.2. Fundamental principles of knowledge management.	212
10.2.1. The virtuous circle of knowledge management.	212
10.2.2. Notion of critical knowledge	213
10.2.3. Reminder: ascent along the knowledge evolution chain	214
10.3. Reminder on the social mechanism for stimulating creativity and reflexivity	215
10.3.1. Reminder on the model of “chaotic” evolution	215
10.3.2. Instantiation of the creativity process: the ICAROS [®] method.	215
10.4. Transposition to the knowledge assessment field	216
10.4.1. Application of the fundamental principles of knowledge management	216
10.4.2. Application of the social mechanism of stimulation	217
10.5. Case study (2019–2020 academic year)	218
10.5.1. Context	218
10.5.2. Objectives of the action research.	219
10.5.3. Preparation of the framework.	219
10.5.4. Precautions taken with regard to students	221
10.5.5. Example of exercise subject terms	221
10.5.6. Analysis of the score database	224
10.5.7. Benefits of the analysis in the institution	231
10.5.8. Lessons learned and perspectives	231
10.6. Conclusion	232
Chapter 11. Towards an IKM[®]: Inventive Knowledge Management	235
11.1. Introduction to the second level of the ICAROS [®] method	235
11.1.1. Reminder on the first level of the ICAROS [®] method	235
11.1.2. The second level of the ICAROS [®] method	236
11.1.3. Notions of creativity.	238
11.1.4. Contribution of creativity and inventiveness to ideation	246
11.2. Knowledge-based ideation.	248
11.2.1. Introduction to the Idea according to Plato	248
11.2.2. Knowledge-based ideation and supervenience	249
11.2.3. <i>Gestalt</i> theory	252
11.2.4. Synthesis of knowledge-based ideation	258
11.3. Inventive profile engineering	259

11.4. Perspectives from the academic point of view	261
11.4.1. Inventive knowledge creation process as a study object in itself	261
11.4.2. Theoretical approach to knowledge by the physical sciences	261
11.4.3. Extension of the exploration to non-creativity	262
11.4.4. Reminder on the path hypothesis.	262
11.5. Conclusion	263
Glossary	265
