Introduction: Image and Gaze	xi
Chapter 1. The Legacy of Philosophers	1
1.1. The objectivist approach	3
1.1.1. The source: ancient Greece	3
1.1.2. After Greece	5
1.1.3. Kant and modern aesthetics	7
1.1.4. Objectivism after Kant: from pseudo-subjectivism to aesthetic realism	9
1.2. The subjectivist approach	13
1.2.1. From classicism to romanticism	14
1.2.2. The moderns	15
1.2.3. The influence of neurobiology	18
1.3. Subjectivism and objectivism: an ongoing debate	19
Chapter 2. Neurobiology or the Arbitrator of Consciousness	25
2.1. fMRI protocols and neuroaesthetics	27
2.2. The fMRI quest for “beauty processes” in the brain	28
2.2.1. The role of the prefrontal cortex	28
2.2.2. The role of the insular cortex	31
2.2.3. The role of the visual areas	33
2.2.4. The role of memory and cognition	35
2.2.5. The role of embodiment	35
2.3. Responses from functional electric encephalography	36
2.4. A global cognitive scheme for aesthetic judgment?	39
2.4.1. J. Petitot’s neurogeometric model	40
2.4.2. A. Chatterjee’s aesthetic emotion model	40
2.4.3. The model by Brown et al.	42

2.4.4. Model proposed by H. Leder	43
2.4.5. The model by C. Redies	45
2.4.6. The emotions model developed by S. Koelsch et al.	47
2.4.7. L.H. Hsu's model of emotions based on A. Damásio	47
2.4.8. Other models	50
2.5. A critique of neuroaesthetic methods	51
2.5.1. Criticism of neuroaesthetic methods	51
2.5.2. Criticisms of the objectives of neuroaesthetics	52
Chapter 3. What Are the Criteria For a Beautiful Photo?	55
3.1. Before we enter into the fray	56
3.1.1. What reference books do we have?	56
3.1.2. "Beauty of an image" or "quality of an image"?	57
3.1.3. A glossary of aesthetic appraisal	58
3.1.4. Measuring beauty	60
3.2. Composition	63
3.2.1. Complexity versus simplicity	63
3.2.2. Unity	64
3.2.3. A specific case in composition: landscapes	64
3.2.4. Using oculometry to analyze composition	67
3.2.5. Format or aspect ratio	68
3.2.6. The rule of thirds (RoT)	70
3.2.7. The center of the image	72
3.2.8. Other rules for composition	73
3.3. Histograms, spectral properties and textures	76
3.3.1. Histograms and gray levels	76
3.3.2. Focus, spectral density, fractals	78
3.3.3. Textures	80
3.4. Color	82
3.4.1. About the concept of color	82
3.4.2. Preferences related to isolated colors	84
3.4.3. Preferences related to color palettes	86
3.5. What behavioral psychosociology has to say	93
3.5.1. Images of nature	93
3.5.2. The aesthetics of faces	96
3.5.3. The role of the signature, title and context	99
3.5.4. Perception and memory: prototypicality	101
Chapter 4. Algorithmic Approaches to "Calculate" Beauty	103
4.1. First steps: C. Henry	103
4.2. G.D. Birkhoff's mathematical approach	104
4.3. Those who followed G.D. Birkhoff	106
4.3.1. Beauty according to H.J. Eysenck	106

4.3.2. The Post-War years: the designers, A. Moles and M. Bense	106
4.3.3. A dynamic approach: P. Machado and A. Cardoso	107
4.3.4. Work carried out by J. Rigau, M. Feixas and M. Bert	108
4.4. Algorithmic approach with AI: J. Schmidhuber	110
Chapter 5. The Holy Grail of the Digital World: Artificial Intelligence	113
5.1. Which artificial intelligence?	114
5.1.1. The principles	114
5.1.2. Learning algorithms	115
5.2. Why artificial intelligence in aesthetics?	116
5.3. Expert opinions	118
5.4. The database	120
5.4.1. Generalist databases, used for aesthetic judgments	122
5.4.2. Databases that are specialized for aesthetic photography	126
5.4.3. Databases dedicated to artistic judgment	129
5.4.4. Other image databases that are sometimes used	130
5.4.5. Increasing databases	131
Chapter 6. Primitive-based Classification Methods	133
6.1. Judging aesthetics	136
6.1.1. Multimedia primitives: the ACQUINE system (Datta et al.)	136
6.1.2. Edges and chromatic distance: Ke et al.	137
6.1.3. Photography rules: Luo and Tang and Mavridaki and Mezaris	140
6.1.4. High-level primitives: Dhar et al.	143
6.1.5. Generic descriptors of vision: Marchesotti et al.	144
6.2. Help in composing beautiful photos	148
6.2.1. The library of aesthetic primitives developed by Su et al.	148
6.2.2. The OSCAR system by Yao et al.	148
6.2.3. Embedded systems: Lo et al. and Wang et al.	150
6.3. Some specific research related to the evaluation of aesthetics using primitives	151
6.3.1. Color harmony: Lu et al.	151
6.3.2. Group photography: Wang et al.	153
6.3.3. Social networks and crowdsourcing: Schifanella et al.	153
6.3.4. Looking at comments: San Pedro et al.	154
Chapter 7. Deep Neural Network Systems	155
7.1. DNNs dedicated to aesthetic evaluation	157
7.1.1. High and low resolutions: the RAPID system, Lu et al.	157
7.1.2. The multi-path DMA-Net architecture: Lu et al.	160
7.1.3. Adapting to the size of the image: Mai et al.	160

7.1.4. Finding beauty on the Web: Redi et al.	163
7.1.5. Siamese and GAN networks: Kong et al. and Deng et al.	165
7.1.6. Paying attention to the image construction: A-Lamp	167
7.2. Variants around the basic DNN architecture	170
7.2.1. Comparing photos between themselves: Schwarz et al.	170
7.2.2. Making use of knowledge of the subject: Kao et al.	172
7.2.3. BDN: halfway between classification and DNN	174
7.2.4. Using the distribution of the evaluations	175
7.2.5. Extracting a “dramatic” image from a panorama: the Creatism system	178
7.3. Written appraisals: analyzing them and formulating new ones	179
7.3.1. Photo critique captioning dataset (PCCD)	181
7.3.2. Neural aesthetic image retriever (NAIR)	182
7.3.3. Semantic processing by Ghosal et al.	182
7.3.4. Aesthetic multi attribute network (AMAN)	183
7.4. Measuring subjective beauty	185
7.4.1. Recommendation systems	186
7.4.2. Defining the user’s psychological profile	188
7.4.3. Learning the user’s tastes through tests	191
7.4.4. Multiplying concurrent expertise	194
Chapter 8. A Critical Analysis of Machine Learning Techniques	197
8.1. The popularity of studies on aesthetics	197
8.2. A summary of learning methods	199
8.2.1. Which architecture? Which software?	199
8.2.2. What performances?	200
8.3. Questioning the hypotheses	203
8.4. Specific features of beautiful images detected by a computer	204
8.4.1. Some observations on the photos in the AVA database	205
8.4.2. The scores in the AVA database	207
Conclusion	213
Appendix 1. A Brief Review of Aesthetics	219
Appendix 2. Aesthetics in China	237

Appendix 3. The Aesthetic of Persian Miniatures	251
Appendix 4. Aesthetics in Japan	263
