Preface	ix
General Introduction	xi
Part 1. State of the Art	1
Chapter 1. From Petri Nets to Stochastic Petri Nets	3
1.1. Introduction	3
1.2. Modeling with Petri nets	4
1.3. Petri net structure	6
1.4. Dynamic behavior of Petri nets	7
1.5. Petri net analysis	11
1.5.1. Petri net properties	11
1.5.2. Temporal logic	14
1.5.3. Analysis methods	18
1.6. Stochastic Petri nets	19
1.6.1. Stochastic process	21
1.6.2. Markov process	21
1.6.3. Stochastic Petri nets having exponential law	22
1.6.4. Quantitative properties	26
1.7. Generalized stochastic Petri nets	27
1.7.1. Embedded Markov Chain	29
1.8. Conclusion	32
Chapter 2. Reconfiguration Aspects in Petri Nets	33
2.1. Introduction	33
2.2. Graph Transformation Systems	34

2.3. Double-pushout approach for Petri nets	35
2.4. Net rewriting systems	38
2.5. Self-modifying nets	41
2.6. Reconfigurable Petri nets	43
2.7. Improved net rewriting systems	47
2.8. Other extensions	48
2.9. Trade-off between expressiveness and calculability in PN-based reconfigurable formalisms	49
2.10. Conclusion	51
 Part 2. Orientation 1	 53
 Chapter 3. Rewritable Topology in Generalized Stochastic Petri Nets	 55
3.1. Introduction	55
3.2. GSPNs with rewritable topology	56
3.2.1. Formal definition	58
3.3. Proofs	60
3.4. Illustrative example	61
3.5. Stochastic reward nets	67
3.6. Configuration-dependent stochastic reward nets	68
3.7. Transformation of CD-SRNs into basic SRNs	69
3.8. Proofs	72
3.9. Illustrative example	73
3.10. Conclusion	79
 Chapter 4. Generalized Stochastic Petri Nets with Dynamic Structure	 81
4.1. Introduction	81
4.2. Dynamic GSPNs	83
4.2.1. Formal definition	83
4.3. D-GSPN transformation towards GSPNs	85
4.4. Qualitative/quantitative analysis of D-GSPNs	89
4.5. Proofs	90
4.6. Illustrative example	92
4.7. Generalized stochastic Petri nets with inhibitor and reset arcs	98
4.8. Improved D-GSPNs under infinite-server semantics	99
4.9. Unfolding ID-GSPNs into GSPNs	105
4.10. Running examples	110
4.11. Conclusion	119

Part 3. Orientation 2	121
Chapter 5. Reconfigurable Generalized Stochastic Petri Nets	123
5.1. Introduction	123
5.2. Reconfigurable generalized stochastic Petri nets	125
5.2.1. Definition of RecGSPNs	125
5.2.2. Properties preserving nets	130
5.3. Preservation of properties in RecGSPNs	131
5.3.1. Preservation of LBR, home state and deadlock-free	131
5.3.2. Preservation of linear temporal properties	136
5.4. Quantitative analysis	141
5.5. Using RecGSPNs in practice	144
5.6. Conclusion	149
Part 4. Evaluation, Discussion and Conclusion	151
Chapter 6. Evaluation and Discussion	153
6.1. Introduction	153
6.2. Qualitative aspects	153
6.3. Quantitative aspects	156
6.3.1. Factor 1: model size	157
6.3.2. Factor 2: Markov chain spatial complexity	159
6.3.3. Factor 3: Markov chain time complexity	161
6.4. Conclusion	163
Conclusion	165
References	169
Index	177
