<b>Preface</b>	.....	ix
<b>List of Acronyms</b>	.....	xiii
<b>Introduction</b>	.....	xvii
<b>Chapter 1. Healthcare Internet of Things:</b>		
<b>The State of the Art</b>	.....	1
1.1. H-IoT network landscape	.....	2
1.2. Technology emergence in H-IoT	.....	10
1.2.1. Edge computing in H-IoT	.....	12
1.2.2. Software-defined network in H-IoT	.....	16
1.3. Learned lessons and neglected opportunities	.....	28
1.3.1. Learned lessons	.....	28
1.3.2. Neglected opportunities	.....	37
1.4. Conclusion	.....	38
<b>Chapter 2. A Novel Network Infrastructure Concept</b> ..		
2.1. Introduction	.....	39
2.2. Related work	.....	44
2.2.1. Software-defined network	.....	45
2.2.2. 5G novel network perspective	.....	45
2.2.3. Software-defined infrastructure	.....	46
2.2.4. Software-defined vehicular network	.....	47
2.2.5. Software-defined unmanned aerial vehicular network	.....	48

2.2.6. Other potential software-defined hardware blocks . . . . .	49
2.3. The evolution of SDI . . . . .	50
2.3.1. Research gap . . . . .	50
2.3.2. SDI extension . . . . .	51
2.3.3. Proposal of our architecture . . . . .	52
2.3.4. Suggested technology adjustments . . . . .	54
2.3.5. Prospective interaction within the SDI ecosystem . . . . .	56
2.3.6. Software-defined infrastructure's benefit recap . . . . .	57
2.4. Unified functional model formalization . . . . .	58
2.4.1. Description of the model . . . . .	58
2.4.2. Structure of the model . . . . .	59
2.5. Description of the experiments . . . . .	64
2.5.1. Implementation details . . . . .	66
2.5.2. Approach 1: opportunistic coverage enhancement . . . . .	71
2.5.3. Approach 2: connection recovery . . . . .	72
2.5.4. Approach 3: self-assisted coverage deployment and data transportation . . . . .	74
2.5.5. Approach 4: priority orchestration in high-density network . . . . .	76
2.6. Improvement evaluation approaches . . . . .	78
2.6.1. Opportunistic coverage enhancement . . . . .	78
2.6.2. Connection recovery . . . . .	80
2.6.3. Self-assisted coverage deployment and data transportation . . . . .	82
2.6.4. Priority orchestration in high-density network . . . . .	83
2.7. Conclusion . . . . .	86
<b>Chapter 3. SMART Connection Migration . . . . .</b>	89
3.1. Introduction . . . . .	89
3.2. Related work . . . . .	92
3.2.1. Virtual machine migration . . . . .	93
3.2.2. Container migration . . . . .	93

---

3.2.3. TCP-based connection migration . . . . .	94
3.2.4. QUIC-based connection migration . . . . .	95
3.2.5. Motivation . . . . .	96
3.3. Solution design . . . . .	97
3.3.1. Sequence diagram comparison . . . . .	97
3.3.2. System design . . . . .	98
3.3.3. Prospective impact . . . . .	99
3.4. Performance evaluation . . . . .	100
3.4.1. Experimental environment . . . . .	100
3.4.2. Experiment scenario . . . . .	101
3.4.3. Influence of delay on the connection migration process . . . . .	103
3.4.4. The influence of migration frequency on the connection migration time . . . . .	103
3.5. Conclusion . . . . .	104
<b>Chapter 4. Generic Adaptive Deep Learning-based Multipath Scheduler Selector . . . . .</b>	<b>107</b>
4.1. Introduction . . . . .	107
4.2. Related work . . . . .	110
4.2.1. Multipath transport protocols . . . . .	110
4.2.2. Multipath scheduling algorithms . . . . .	111
4.2.3. Multipath scheduling performance over heterogeneous paths . . . . .	113
4.3. Prototype design . . . . .	114
4.3.1. Scheduler selector paradigm . . . . .	114
4.3.2. Prototype design . . . . .	115
4.4. Simulated evaluation . . . . .	117
4.4.1. Experiment setup . . . . .	117
4.4.2. Initial dataset analysis . . . . .	119
4.4.3. Traditional machine learning's performance evaluation . . . . .	121
4.4.4. Deep learning's performance evaluation . .	123
4.5. Practical evaluation . . . . .	125
4.5.1. Brief overview of GADaM . . . . .	125
4.5.2. Extensible modular scheduler evaluating framework . . . . .	128

4.5.3. Experiment environment . . . . .	129
4.5.4. Trial run . . . . .	132
4.5.5. Actual run . . . . .	136
4.5.6. In-house static environment . . . . .	138
4.5.7. Metro line environment . . . . .	139
4.5.8. In-vehicle environment . . . . .	140
4.6. Limitations . . . . .	143
4.7. Conclusion . . . . .	145
<b>Conclusions and Perspectives</b> . . . . .	147
<b>References</b> . . . . .	151
<b>Index</b> . . . . .	171
