Presentation of the “History of Sciences” Field	xi
Jean-Claude DUPONT	
Introduction. Science and Technology in Societies	xiii
Soraya BOUDIA and Ashveen PEERBAYE	
Chapter 1. STS: French History of an (In)discipline	1
Pierre-Benoît JOLY	
1.1. Introduction	1
1.2. The difficult constitution of “research on research”, between institutional control and academic conformism	3
1.2.1. The emergence of STS on the margins of the humanities and social sciences	3
1.2.2. Institutional initiatives with mixed results	5
1.3. An iconoclastic conception of science for thinking differently about society	7
1.3.1. The invention of actor-network theory	7
1.3.2. Science and innovations as society in the making	9
1.4. The new wave: moving beyond the paradigm of action	11
1.4.1. Analyzing the transformations of regimes of knowledge production	13
1.4.2. Technical democracy and its blind alleys	15
1.4.3. Knowing and acting in a finite world	17
1.5. Conclusion	19
1.6. Acknowledgments	21
1.7. References	21
Chapter 2. Laboratory Studies: Beyond a Founding Myth of STS	29
Ashveen PEERBAYE and Dominique VINCK	
2.1. Introduction	29

2.2. From pioneers to canonical studies: context of the emergence of laboratory studies	30
2.2.1. Pioneers	30
2.2.2. The place of laboratory studies in the context of a new sociology of scientific knowledge (SSK)	32
2.3. Founding studies	34
2.3.1. Art and Artifact in Laboratory Science	34
2.3.2. The Manufacture of Knowledge	35
2.3.3. Laboratory Life	36
2.3.4. Beamtimes and Lifetimes	38
2.4. Major contributions of laboratory ethnographies to the study of science and technology	38
2.4.1. The materiality of scientific practices	38
2.4.2. The laboratory as an arrangement	40
2.5. After the founding studies	42
2.5.1. Towards a trivialization of laboratory studies?	42
2.5.2. Extensions and renewals	44
2.6. Conclusion	46
2.7. References	47
Chapter 3. STS and Biomedicine	53
Claire BEAUDEVIN, Luc BERLIVET, Catherine BOURGAIN and Jean-Paul GAUDILLIÈRE	
3.1. Introduction	53
3.2. Practicing biomedicine	54
3.2.1. From experimentation to routinization of biomedical practices	54
3.2.2. Biomedicine, its visions and its imaginaries	55
3.2.3. Molecularization, diagnosis and evidence-based medicine	56
3.2.4. Work on uncertainty	57
3.2.5. Pharmaceuticalization	59
3.3. Under the sign of risk: the (bio)politics of biomedicine	59
3.3.1. The epidemiology of risk factors	60
3.3.2. Controversies and institutional consolidation	61
3.3.3. Criticisms of biomedical individualism	62
3.4. Innovation, politics and the economics of biomedicine	64
3.5. Conclusion	68
3.6. References	69
Chapter 4. Science for the People? STS Perspectives on the Question of Science and the Public	77
Bernadette BENSUADE-VINCENT and Andrée BERGERON	
4.1. Introduction	77
4.2. A multidisciplinary heritage	78

4.3. STS enters the scene	79
4.4. From the era of suspicion to contestation	81
4.5. Embedded STS for “responsible innovation”	83
4.6. The participatory turn	84
4.7. Conclusion	88
4.8. References	89
Chapter 5. Politics of Expertise	97
Henri BOULLIER and David DEMORTAIN	
5.1. Introduction	97
5.2. Deconstructing scientific expertise.	98
5.2.1. Expertise, public decision-making and the demarcation of science and politics	98
5.2.2. Expertise in public arenas and the politicization of science.	100
5.2.3. “Lay” expertise, models of expertise, democracy	101
5.2.4. Organization, proceduralization and production of expertise	103
5.3. Politics of expertise: revisitations and lines of flight	104
5.3.1. Citizen science and conflict of expertise	105
5.3.2. Knowledge and expert communities: reexamining regulatory science	107
5.3.3. Capture, conflicts of interest and the political economy of science	108
5.4. Conclusion: crisis of expertise and credibility.	110
5.5. References	111
Chapter 6. STS, Industry, and Risk Regulation	121
Nathalie JAS and Marc-Olivier DÉPLAUE	
6.1. Introduction	121
6.2. Co-production and participation: making industries invisible	122
6.3. Industry strategies: invisibilizing risks, neutralizing criticism	126
6.4. Regulations structurally favorable for powerful industries.	129
6.5. Conclusion: thinking about the systemic influence of industry	133
6.6. References	134
Chapter 7. Ignorance Studies in STS	141
Laura BARBIER, Maël GOUJRI and Justyna MOIZARD-LANVIN	
7.1. Introduction	141
7.2. Agnotology, or ignorance as an object of study.	142
7.3. The main mechanisms of production of institutional ignorance	145
7.4. Undone science as a policy of producing ignorance	147
7.5. Expanding the field of ignorance studies	150

7.6. Conclusion	152
7.7. References	153
Chapter 8. What the South is Doing to STS: Globalized Technoscience and Decolonization of Knowledge.	159
Mathieu QUET, Mina KLEICHE-DRAY and David DUMOULIN KERVAN	
8.1. Introduction	159
8.2. Analyzing scientific transactions on the margins of globalization	160
8.3. Describing technological globalization from below	163
8.4. Defining the universality of knowledge based on movements.	166
8.5. Conclusion	169
8.6. References	169
Chapter 9. Environmental STS.	179
Nicolas BAYA-LAFFITE, Soraya BOUDIA and Céline GRANJOU	
9.1. Introduction	179
9.2. A relational materialism.	180
9.3. The science and politics of the global	184
9.4. Environmental injustice.	188
9.5. Conclusion	190
9.6. References	192
Chapter 10. Soils and Subsoils in STS: Technosciences and Underground Entities	203
Brice LAURENT, Julien MERLIN and Germain MEULEMANS	
10.1. Introduction.	203
10.2. Critique of soil and subsoil sciences, colonial and postcolonial issues	204
10.3. Transforming soils and subsoils into resources	207
10.4. Putting soils and subsoils to work in times of transition	209
10.5. Conclusion: towards new soil and subsoil policies?.	212
10.6. References	213
Chapter 11. STS and the Digital	219
Marine AL DAHDAH, Éric DAGIRAL and Baptiste KOTRAS	
11.1. Introduction.	219
11.2. An irresistible convergence of STS toward the digital?.	220
11.3. From data to algorithms, questioning knowledge and powers	223
11.4. New horizons: economic, ecological and postcolonial perspectives on digital technology in STS	226

11.5. Conclusion	229
11.6. References	229
Chapter 12. Maintenance and Repair.	239
Jérôme DENIS and David PONTILLE	
12.1. Introduction	239
12.2. A renewed interest in maintenance and repair	240
12.3. Rhythms and sites	243
12.4. Materialities.	245
12.5. Epistemologies	249
12.6. Conclusion	250
12.7. References	252
List of Authors	261
Index of Ideas	265
Index of Names	271
