

Contents

Introduction	ix
Chapter 1. Edge Architectures	1
1.1. The three levels of Edge Networking.	1
1.2. Edge Computing architectures.	4
1.3. Security and domain name system on Edge.	14
1.4. The digital infrastructure of the participatory Internet.	16
1.5. Conclusion	17
1.6. References	18
Chapter 2. MEC Networks	21
2.1. The MEC level of 5G architecture	21
2.2. 5G	25
2.3. 5G Edge.	29
2.4. Conclusion	37
2.5. References	37
Chapter 3. Fog Networks	39
3.1. Fog architectures.	39
3.2. Fog controllers	44
3.3. Fog and the Internet of Things	48
3.4. Wi-Fi in the Fog's digital infrastructure	50

3.5. The new generation Wi-Fi	54
3.6. The next generation of mobile Wi-Fi.	63
3.7. Private 5G for Fog Networking	64
3.8. Conclusion	69
3.9. References	69
Chapter 4. Skin Networks	73
4.1. The architecture of Skin networks	73
4.2. Virtual access points	74
4.3. Participatory Internet networks	77
4.4. Conclusion	82
4.5. References	83
Chapter 5. Ad hoc and Mesh Networks	85
5.1. Ad hoc networks	85
5.2. Routing	88
5.3. Mesh networks	93
5.4. Participatory networks	95
5.5. Local services	96
5.6. The digital infrastructure of the Internet of the Edges	97
5.7. Conclusion	101
5.8. References	102
Chapter 6. Applications of the Internet of Edges	105
6.1. Civil security and defense applications	107
6.2. Applications of the Internet of Things	108
6.3. The tactile Internet.	110
6.4. Telecom applications	115
6.5. Industry 4.0.	116
6.6. The smart city	118
6.7. Conclusion	121
6.8. References	121
Chapter 7. Vehicular Networks	123
7.1. Communication techniques for vehicular networks	123
7.2. Vehicular Ad hoc NETWORKS	126

7.3. Connected and intelligent vehicles	127
7.4. The MEC and the VEC	128
7.5. Intelligent transport systems (ITS)-G5	130
7.6. 5G V2X	133
7.7. The VLC	139
7.8. Conclusion	140
7.9. References	140
Chapter 8. Virtualization of the Internet of Edges	143
8.1. Network virtualization	143
8.2. Virtualization on the Edge	145
8.3. Using virtual networks on the Edge	151
8.3.1. Isolation	152
8.3.2. Extending network virtualization.	153
8.4. Mobile Edge Computing	155
8.4.1. Examples of MEC applications.	155
8.4.2. Geolocation	156
8.4.3. Augmented reality	156
8.4.4. Video analytics	157
8.4.5. Content optimization	158
8.4.6. Content cache and DNS cache	158
8.4.7. Performance optimization	159
8.4.8. Positioning of MEC servers	159
8.5. Conclusion	162
8.6. References	162
Chapter 9. Security	165
9.1. Cloud of security on the Edge	165
9.2. Secure element	170
9.2.1. Security based on secure elements	174
9.2.2. The TEE	175
9.2.3. The trusted service manager.	176
9.2.4. The Cloud-based security solution	177
9.2.5. Solutions for security.	178
9.3. Blockchain	183
9.3.1. Blockchain consensus	184
9.3.2. Blockchain in Edge Computing.	185
9.4. Conclusion	188
9.5. References	188

Chapter 10. The Example of Green Communications	193
10.1. The Green PI solution	194
10.2. The Edge Cloud	194
10.3. The IoE	195
10.4. The IoE platform	199
10.5. Use cases: IoT in constrained environments.	201
10.6. IoT in motion	202
10.7. Massive IoT.	203
10.8. The advantages	205
10.9. References.	205
Chapter 11. Deployment of the Participatory Internet	207
11.1. The deployment	207
11.2. The Green Cloud.	208
11.2.1. My Network	211
11.2.2. Chat	212
11.2.3. Talk	212
11.2.4. Storage	212
11.2.5. vCard Editor	212
11.3. Scaling up	212
11.4. Energy savings	214
11.5. Security	219
11.6. Wi-Fi and LTE hybridization	220
11.7. Conclusion	223
11.8. References.	223
Chapter 12. The Future	225
12.1. The short-term future	225
12.2. The medium-term future	226
12.3. The long-term future.	227
12.4. Participatory Internet and IPV6	228
12.5. References.	231
List of Authors	235
Index	237
