<b>Preface</b> . . . . .	xi
Romain BELMONTE and Benjamin ALLAERT	
<b>Part 1. Facial Landmark Detection</b> . . . . .	1
<b>Introduction to Part 1</b> . . . . .	3
Romain BELMONTE, Pierre TIRILLY, Ioan Marius BILASCO, Nacim IHADDADENE and Chaabane DJERABA	
<b>Chapter 1. Facial Landmark Detection</b> . . . . .	13
Romain BELMONTE, Pierre TIRILLY, Ioan Marius BILASCO, Nacim IHADDADENE and Chaabane DJERABA	
1.1. Facial landmark detection in still images . . . . .	14
1.1.1. Generative approaches . . . . .	14
1.1.2. Discriminative approaches . . . . .	18
1.1.3. Deep learning approaches . . . . .	24
1.1.4. Handling challenges . . . . .	34
1.1.5. Summary . . . . .	40
1.2. Extending facial landmark detection to videos . . . . .	41
1.2.1. Tracking by detection . . . . .	41
1.2.2. Box, landmark and pose tracking . . . . .	43
1.2.3. Adaptive approaches . . . . .	45
1.2.4. Joint approaches . . . . .	46
1.2.5. Temporal constrained approaches . . . . .	47

---

1.2.6. Summary . . . . .	49
1.3. Discussion . . . . .	50
1.4. References . . . . .	52
<b>Chapter 2. Effectiveness of Facial Landmark Detection . . . . .</b>	<b>67</b>
Romain BELMONTE, Pierre TIRILLY, Ioan Marius BILASCO, Nacim IHADDADENE and Chaabane DJERABA	
2.1. Overview . . . . .	68
2.2. Datasets and evaluation metrics . . . . .	69
2.2.1. Image and video datasets . . . . .	69
2.2.2. Face preprocessing and data augmentation . . . . .	73
2.2.3. Evaluation metrics . . . . .	75
2.2.4. Summary . . . . .	77
2.3. Image and video benchmarks . . . . .	77
2.3.1. Compiled results on 300W . . . . .	77
2.3.2. Compiled results on 300VW . . . . .	79
2.4. Cross-dataset benchmark . . . . .	80
2.4.1. Evaluation protocol . . . . .	80
2.4.2. Comparison of selected approaches . . . . .	82
2.5. Discussion . . . . .	86
2.6. References . . . . .	88
<b>Chapter 3. Facial Landmark Detection with Spatio-temporal Modeling . . . . .</b>	<b>93</b>
Romain BELMONTE, Pierre TIRILLY, Ioan Marius BILASCO, Nacim IHADDADENE and Chaabane DJERABA	
3.1. Overview . . . . .	94
3.2. Spatio-temporal modeling review . . . . .	95
3.2.1. Hand-crafted approaches . . . . .	95
3.2.2. Deep learning approaches . . . . .	97
3.2.3. Summary . . . . .	103
3.3. Architecture design . . . . .	104
3.3.1. Coordinate regression networks . . . . .	104
3.3.2. Heatmap regression networks . . . . .	106
3.4. Experiments . . . . .	107
3.4.1. Datasets and evaluation protocols . . . . .	107
3.4.2. Implementation details . . . . .	108
3.4.3. Evaluation on SNaP-2DFe . . . . .	109
3.4.4. Evaluation on 300VW . . . . .	111
3.4.5. Comparison with existing models . . . . .	112
3.4.6. Qualitative results . . . . .	112

---

3.4.7. Properties of the networks . . . . .	114
3.5. Design investigations . . . . .	114
3.5.1. Encoder-decoder . . . . .	115
3.5.2. Complementarity between spatial and temporal information . . . . .	117
3.5.3. Complementarity between local and global motion . . . . .	119
3.6. Discussion . . . . .	122
3.7. References . . . . .	123
<b>Conclusion to Part 1 . . . . .</b>	<b>133</b>
Romain BELMONTE, Pierre TIRILLY, Ioan Marius BILASCO, Nacim IHADDADENE and Chaabane DJERABA	
<b>Part 2. Facial Expression Analysis . . . . .</b>	<b>147</b>
<b>Introduction to Part 2 . . . . .</b>	<b>149</b>
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
<b>Chapter 4. Extraction of Facial Features . . . . .</b>	<b>157</b>
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
4.1. Introduction . . . . .	157
4.2. Face detection . . . . .	158
4.2.1. Point-of-interest detection algorithms . . . . .	160
4.2.2. Face alignment approaches . . . . .	162
4.2.3. Synthesis . . . . .	166
4.3. Face normalization . . . . .	166
4.3.1. Dealing with head pose variations . . . . .	167
4.3.2. Dealing with facial occlusions . . . . .	170
4.3.3. Synthesis . . . . .	172
4.4. Extraction of visual features . . . . .	172
4.4.1. Facial appearance features . . . . .	172
4.4.2. Facial geometric features . . . . .	174
4.4.3. Facial dynamics features . . . . .	175
4.4.4. Facial segmentation models . . . . .	177
4.4.5. Synthesis . . . . .	179
4.5. Learning methods . . . . .	179
4.5.1. Classification versus regression . . . . .	180
4.5.2. Fusion model . . . . .	182
4.5.3. Synthesis . . . . .	184
4.6. Conclusion . . . . .	185
4.7. References . . . . .	186

---

<b>Chapter 5. Facial Expression Modeling</b> . . . . .	191
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
5.1. Introduction . . . . .	191
5.2. Modeling of the affective state . . . . .	192
5.2.1. Categorical modeling . . . . .	192
5.2.2. Dimensional modeling . . . . .	194
5.2.3. Synthesis . . . . .	196
5.3. The challenges of facial expression recognition . . . . .	197
5.3.1. The variation of the intensity of the expressions . . . . .	197
5.3.2. Variation of facial movement . . . . .	199
5.3.3. Synthesis . . . . .	200
5.4. The learning databases . . . . .	201
5.4.1. Improvement of learning data . . . . .	201
5.4.2. Comparison of learning databases . . . . .	203
5.4.3. Synthesis . . . . .	205
5.5. Invariance to facial expression intensities . . . . .	206
5.5.1. Macro-expression . . . . .	206
5.5.2. Micro-expression . . . . .	208
5.5.3. Synthesis . . . . .	209
5.6. Invariance to facial movements . . . . .	211
5.6.1. Pose variations (PV) and large displacements (LD) . . . . .	211
5.6.2. Synthesis . . . . .	214
5.7. Conclusion . . . . .	215
5.8. References . . . . .	216
<b>Chapter 6. Facial Motion Characteristics</b> . . . . .	223
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
6.1. Introduction . . . . .	223
6.2. Characteristics of the facial movement . . . . .	225
6.2.1. Local constraint of magnitude and direction . . . . .	226
6.2.2. Local constraint of the motion distribution . . . . .	228
6.2.3. Motion propagation constraint . . . . .	230
6.3. LMP . . . . .	232
6.3.1. Local consistency of the movement . . . . .	233
6.3.2. Consistency of local distribution . . . . .	236
6.3.3. Coherence in the propagation of the movement . . . . .	238
6.4. Conclusion . . . . .	241
6.5. References . . . . .	242

---

<b>Chapter 7. Micro- and Macro-Expression Analysis</b> . . . . .	243
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
7.1. Introduction . . . . .	243
7.2. Definition of a facial segmentation model . . . . .	244
7.3. Feature vector construction . . . . .	247
7.3.1. Motion features vector . . . . .	247
7.3.2. Geometric features vector . . . . .	248
7.3.3. Features fusion . . . . .	249
7.4. Recognition process . . . . .	250
7.5. Evaluation on micro- and macro-expressions . . . . .	251
7.5.1. Learning databases . . . . .	252
7.5.2. Micro-expression recognition . . . . .	253
7.5.3. Macro-expressions recognition . . . . .	255
7.5.4. Synthesis of experiments on micro- and macro-expressions . . . . .	258
7.6. Same expression with different intensities . . . . .	260
7.6.1. Data preparation . . . . .	260
7.6.2. Fractional time analysis . . . . .	263
7.6.3. Analysis on a different time frame . . . . .	264
7.6.4. Synthesis of experiments on activation segments . . . . .	265
7.7. Conclusion . . . . .	265
7.8. References . . . . .	266
<b>Chapter 8. Towards Adaptation to Head Pose Variations</b> . . . . .	271
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
8.1. Introduction . . . . .	271
8.2. Learning database challenges . . . . .	273
8.3. Innovative acquisition system (SNaP-2DFe) . . . . .	274
8.4. Evaluation of face normalization methods . . . . .	276
8.4.1. Does the normalization preserve the facial geometry? . . . . .	277
8.4.2. Does normalization preserve facial expressions? . . . . .	280
8.5. Conclusion . . . . .	283
8.6. References . . . . .	284
<b>Conclusion to Part 2</b> . . . . .	287
Benjamin ALLAERT, Ioan Marius BILASCO and Chaabane DJERABA	
<b>List of Authors</b> . . . . .	293
<b>Index</b> . . . . .	295
