Introduction	ix
Familiarization with Semi-normed Spaces	xiii
Notations	xv
Chapter 1. Spaces of Continuous Functions	1
1.1. Notions of continuity	1
1.2. Spaces $\mathcal{C}(\Omega; E)$, $\mathcal{C}_b(\Omega; E)$, $\mathcal{C}_K(\Omega; E)$, $\mathbf{C}(\Omega; E)$ and $\mathbf{C}_b(\Omega; E)$	3
1.3. Comparison of spaces of continuous functions	6
1.4. Sequential completeness of spaces of continuous functions	10
1.5. Metrizable spaces of continuous functions	11
1.6. The space $\mathcal{K}(\Omega; E)$	14
1.7. Continuous mappings	20
1.8. Continuous extension and restriction	22
1.9. Separation and permutation of variables	23
1.10. Sequential compactness in $\mathbf{C}_b(\Omega; E)$	28
Chapter 2. Differentiable Functions	31
2.1. Differentiability	31
2.2. Finite increment theorem	34
2.3. Partial derivatives	37
2.4. Higher order partial derivatives	40
2.5. Spaces $\mathcal{C}^m(\Omega; E)$, $\mathcal{C}_b^m(\Omega; E)$, $\mathcal{C}_K^m(\Omega; E)$, $\mathbf{C}_b^m(\Omega; E)$ and $\mathcal{K}^m(\Omega; E)$	42
2.6. Comparison and metrizable spaces of differentiable functions	45
2.7. Filtering properties of spaces of differentiable functions	47
2.8. Sequential completeness of spaces of differentiable functions	49
2.9. The space $\mathcal{C}^m(\bar{\Omega}; E)$ and the set $\mathcal{C}^m(\Omega; U)$	52

Chapter 3. Differentiating Composite Functions and Others	55
3.1. Image under a linear mapping	55
3.2. Image under a multilinear mapping: Leibniz rule	59
3.3. Dual formula of the Leibniz rule	63
3.4. Continuity of the image under a multilinear mapping	65
3.5. Change of variables in a derivative	69
3.6. Differentiation with respect to a separated variable	72
3.7. Image under a differentiable mapping	73
3.8. Differentiation and translation	77
3.9. Localizing functions	79
Chapter 4. Integrating Uniformly Continuous Functions	83
4.1. Measure of an open subset of \mathbb{R}^d	83
4.2. Integral of a uniformly continuous function	87
4.3. Case where E is not a Neumann space	92
4.4. Properties of the integral	93
4.5. Dependence of the integral on the domain of integration	96
4.6. Additivity with respect to the domain of integration	99
4.7. Continuity of the integral	101
4.8. Differentiating under the integral sign	103
Chapter 5. Properties of the Measure of an Open Set	105
5.1. Additivity of the measure	105
5.2. Negligible sets	107
5.3. Determinant of d vectors	112
5.4. Measure of a parallelepiped	115
Chapter 6. Additional Properties of the Integral	119
6.1. Contribution of a negligible set to the integral	119
6.2. Integration and differentiation in one dimension	120
6.3. Integration of a function of functions	123
6.4. Integrating a function of multiple variables	125
6.5. Integration between graphs	130
6.6. Integration by parts and weak vanishing condition for a function	133
6.7. Change of variables in an integral	135
6.8. Some particular changes of variables in an integral	142

Chapter 7. Weighting and Regularization of Functions	147
7.1. Weighting	147
7.2. Properties of weighting	150
7.3. Weighting of differentiable functions	153
7.4. Local regularization	157
7.5. Global regularization	162
7.6. Partition of unity	166
7.7. Separability of $\mathcal{K}^\infty(\Omega)$	170
Chapter 8. Line Integral of a Vector Field Along a Path	173
8.1. Paths	173
8.2. Line integral of a field along a path	176
8.3. Line integral along a concatenation of paths	181
8.4. Tubular flow and the concentration theorem	183
8.5. Invariance under homotopy of the line integral of a local gradient	186
Chapter 9. Primitives of Continuous Functions	191
9.1. Explicit primitive of a field with line integral zero	191
9.2. Primitive of a field orthogonal to the divergence-free test fields	194
9.3. Gluing of local primitives on a simply connected open set	195
9.4. Explicit primitive on a star-shaped set: Poincaré's theorem	197
9.5. Explicit primitive under the weak Poincaré condition	199
9.6. Primitives on a simply connected open set	203
9.7. Comparison of the existence conditions for a primitive	205
9.8. Fields with local primitives but no global primitive	208
9.9. Uniqueness of primitives	210
9.10. Continuous primitive mapping	211
Chapter 10. Additional Results: Integration on a Sphere	213
10.1. Surface integration on a sphere	213
10.2. Properties of the integral on a sphere	215
10.3. Radial calculation of integrals	218
10.4. Surface integral as an integral of dimension $d - 1$	220
10.5. A Stokes formula	224
Appendix	227
Bibliography	239
Index	243
