Introduction	ix
Thomas MICHAUD	
Chapter 1. Technological Innovations in the Post-Apocalyptic World: Lessons Learned from Science Fiction Movies	1
Nadine BOUDOU	
1.1. Introduction.	1
1.2. The future machine of humanity	2
1.3. A pending world?	4
1.4. Consuming the world	6
1.5. A finite world	8
1.6. Conclusion	11
1.7. References	12
Chapter 2. Using Science Fiction in Engineering Education: Technological Imagination as an Element of Technical Culture	15
Marianne CHOUTEAU and Céline NGUYEN	
2.1. Introduction.	15
2.2. What is technical culture?	17
2.2.1. In the name of autonomy	17
2.2.2. For a non-segmented technical culture	19
2.3. Science fiction, technology and narrative: fertile connections	20
2.3.1. Science fiction, a sociotechnical genre	21
2.3.2. Science fiction: a special genre in the service of technical culture.	22

2.4. Science fiction and the imaginary world at the heart of training	26
2.4.1. Exploring science fiction representations	27
2.4.2. Science fiction to build an ethical approach	29
2.4.3. Perspectives: harvesting and building on science fiction imaginary worlds in order to innovate	31
2.5. Conclusion	33
2.6. References	34
Chapter 3. Engineers Versus Designers: Transposition of the Technical Imaginary World into the Visual	37
Florin ALEXA-MORCOV	
3.1. Introduction.	37
3.2. From applied science to applied art.	38
3.3. The question of the “object” in contemporary society.	41
3.4. The “transparency” of technology	45
3.5. “Transparent” objects	46
3.6. “Deconstructed” objects	46
3.7. “Printed” objects.	46
3.8. “Skeleton” objects.	47
3.9. “Impossible” objects	47
3.10. Conclusion	47
3.11. References.	48
Chapter 4. Imaginary Worlds to Be Projected or to Be Criticized? Methodological Considerations.	51
Nicolas MINVIELLE, Remy HEMEZ and Olivier WATHELET	
4.1. Introduction.	51
4.2. Challenges in the production of a corpus of imagination	52
4.3. Imaginary worlds of various qualities	54
4.4. Representations that are often appropriable and exploratory	55
4.5. New vulnerabilities	57
4.6. Context, a first point of entry for appropriating the imaginary worlds	58
4.7. Uses, another point of entry for appropriating the imaginary worlds	60
4.8. Conclusion	64
4.9. References	67

Chapter 5. Marsism, from Science Fiction to Ideology	69
Thomas MICHAUD	
5.1. Introduction.	69
5.2. The Mars Society’s martian imaginary world.	71
5.3. Elon Musk, a utopian entrepreneurial spirit.	74
5.4. The technotype of the extraterrestrial base	77
5.5. Marsism, nasaism, communism and technoscientific microideologies	80
5.6. Conclusion	83
5.7. References	84
Chapter 6. Quo Vadis Engineering? Science Fiction as a Means to Expand the Epistemic Boundaries of Technoscientific Innovation	89
Marie-Luc ARPIN, Corinne GENDRON, Nicolas MERVILLE and Jean-Pierre REVÉRET	
6.1. Introduction.	89
6.2. Science fiction at the heart of engineering innovation.	90
6.3. Figures of inevitability: the engineer at the confluence of discourses	92
6.3.1. The disruption-less discourses of disruption	93
6.3.2. The “convergence” discourse.	93
6.3.3. The engineer character at the confluence of discourses	95
6.4. Instrumentalizing the social	96
6.4.1. “The art of the long view”, or the theory of strategic foresight.	98
6.4.2. The Engineer of 2020 or the “instrumentalization” of strategic forecasting theory	99
6.5. Science fiction as emancipation from the “problem-form”	104
6.6. Conclusion	109
6.7. References	110
Chapter 7. Design Fiction, Technotypes and Innovation	113
Thomas MICHAUD	
7.1. Introduction.	113
7.2. Altshuller, from science fiction to the TRIZ method	116
7.3. John Arnold’s approach	121
7.4. The emergence of design fiction	124
7.5. From the plausibility of design fiction to possible disappointment	128
7.6. The theory of the failure of the imaginary world.	129

7.7. Science fiction prototyping and design fiction	131
7.8. The pioneer, Julian Bleecker.	132
7.9. Dreaming, a simulator of the dangers to come	134
7.10. Some approaches to design fiction	135
7.11. Science fiction, design fiction and foresight.	137
7.12. Toward a new mythology because of storytelling	139
7.13. From utopian technologies to the technotype theory	141
7.14. Four proposals on technotypes.	146
7.15. Beliefs and behavioral economics.	147
7.16. Realistic, imaginary systems and their cyclicity	148
7.17. Conclusion	149
7.18. References.	152
Chapter. 8 Science Fiction, Innovation and Organization: Where Do We Stand?	163
Sonia ADAM-LEDUNOIS, Claire AUPLAT and Sébastien DAMART	
8.1. Introduction.	163
8.2. Science fiction in its diversity	164
8.3. A focused review of academic literature on science fiction: method	168
8.4. Systematic literature review: findings	172
8.5. How science fiction sees technology and organizations.	174
8.6. Dystopian visions of technologies and organizations	175
8.7. Highlighting ideologies behind technology and organizations.	177
8.8. Science fiction as the source of new technological and organizational scenarios	180
8.9. Conclusion: three demonstrations and a possible research avenue	181
8.10. References.	181
