Preface	xv
General Introduction	xvii
Chapter 1. What is Revenue Management?	1
1.1. Introduction.	1
1.2. Origins and evolution of the discipline: from Yield Management to Revenue Management	2
1.3. Distinction between Revenue Management, Yield Management and pricing.	4
1.3.1. Yield Management	5
1.3.2. Pricing	5
1.3.3. Revenue Management	7
1.4. General objectives of Revenue Management	9
1.4.1. Maximizing revenue	9
1.4.2. Demand management	9
1.4.3. Capacity optimization	10
1.4.4. Personalizing offers	10
1.5. Conditions of applying Revenue Management in service companies	10
1.5.1. Constrained company capacity	11
1.5.2. The perishability of supply	11
1.5.3. The level of fixed versus variable costs	11
1.5.4. The possibility of booking the service in advance.	11

1.5.5. Temporal variability of demand	12
1.5.6. The possibility of segmenting demand	12
1.5.7. Price elasticity of demand from individual customers	13
1.5.8. Communication and distribution capacity	14
1.5.9. The absence of perfect competition	14
1.5.10. Demand forecasting capability	16
1.5.11. Low consumer sensitivity to pricing strategies	16
1.5.12. Organizational flexibility and operational flexibility	16
1.6. The fundamental components of Revenue Management	17
1.6.1. Price management	17
1.6.2. Capacity or inventory management	17
1.6.3. Analytics	18
1.7. The pillars of Revenue Management	18
1.7.1. Revenue Management forecasts	18
1.7.2. Capacity (inventory) and price optimization	19
1.7.3. Performance analysis and management control	19
1.8. Steps in the classic Revenue Management process	21
1.8.1. Analysis of the business environment and competition	21
1.8.2. Market and consumer behavior analysis	22
1.8.3. Demand analysis and segmentation	22
1.8.4. Qualifying and positioning the company's offering	23
1.8.5. Setting up pricing grids and capacity management	28
1.8.6. Dynamic price and capacity management	30
1.8.7. Dynamic tariff class management rules	31
1.8.8. Bottom-up price management	32
1.8.9. Overbooking	32
1.9. Software and technological tools used in Revenue Management	34
1.10. The evolution and challenges of Revenue Management	35
1.11. Revenue Management's disciplinary and scientific positioning	35
1.12. Toward a microeconomic approach to Revenue Management	37
1.13. Conclusion	38
 Chapter 2. Revenue Management Models for the Tourism, Hotel and Transport Industries	 41
2.1. Introduction	41
2.2. Revenue Management forecasting models	41
2.2.1. Traditional Revenue Management forecasting models	42
2.2.2. Advanced econometric models	46
2.2.3. Methods for forecasting seasonal variations	48
2.2.4. Method of unconstraining capacities	48

2.2.5. Comparative analysis of traditional forecasting methods	50
2.2.6. Modern techniques and the contribution of artificial intelligence	50
2.3. Capacity and price optimization models in Revenue Management.	51
2.3.1. Probabilistic capacity and price optimization models.	52
2.3.2. The bid price method.	57
2.3.3. Threshold curve method.	58
2.3.4. Empirical approaches to Revenue Management optimization. . . .	59
2.3.5. Overbooking models	60
2.3.6. Group management strategies	61
2.3.7. Optimizing distribution channels.	62
2.4. Performance measurement and control models in Revenue Management	63
2.4.1. Occupancy rate	63
2.4.2. Revenue per available room.	63
2.4.3. Gross operating profit per available room	64
2.4.4. Average daily rate	64
2.5. Controversial Revenue Management models	64
2.5.1. Price models based on the lure effect	68
2.5.2. Models based on countdown techniques	71
2.6. Conclusion	72
 Chapter 3. Revenue Management Perceptions and Consumer Behavior	 75
3.1. Introduction.	75
3.2. Concepts of fairness and unfairness in social relations	76
3.3. The contributions of Adams' equity theory (1965)	76
3.4. Equity theory in Revenue Management	77
3.5. Impact of perceptions of inequity on behavior	79
3.5.1. Contributions of Deutsch's model (1975)	80
3.5.2. Contributions of Oliver and Swan's model (1989)	81
3.5.3. Contribution of behavioral economics theories	82
3.5.4. Organizational justice theories	82
3.6. The quest for fairness in Revenue Management	85
3.6.1. The instrumental model	85
3.6.2. The interpersonal model.	85
3.6.3. The deontic model	86
3.7. Role of product value in price judgment.	87
3.8. The importance of justifying pricing policies.	87
3.9. Assigning responsibility in price judgments	88

3.10. Influence of perceived opacity on prices	89
3.11. The impact of normative deviance on the perception of Revenue Management	90
3.12. The influence of perceived risk on Revenue Management perception	92
3.13. Contingency factors of perceived unfairness toward Revenue Management	92
3.13.1. Consumer-internal contingency factors	93
3.13.2. External contingency factors	95
3.14. Consequences of perceptions of unfairness toward Revenue Management	95
3.14.1. Consequences for consumer attitudes	96
3.14.2. Consequences for consumer behavior	96
3.14.3. Impact on brand image and company performance	98
3.15. The integrative model	98
3.16. Limitations of models on perceived price unfairness.	99
3.17. Conclusion	101
 Chapter 4. Qualitative Study of Affective Reactions to Revenue Management	 103
4.1. Introduction.	103
4.2. State of the art on perceived price unfairness	104
4.3. Gaps in research into consumers' affective reactions	106
4.4. Research methodology	107
4.4.1. Critical incident technique	107
4.4.2. Survey sample, transcription and preanalysis of data.	107
4.4.3. Analysis techniques used	108
4.5. Research results	110
4.5.1. The multidimensionality of perceived unfairness in Revenue Management practices	110
4.5.2. Confirmation of the multidimensionality of perceived unfairness in Revenue Management.	111
4.5.3. Characterization of the affective manifestations of perceived unfairness in Revenue Management	113
4.6. Clarifying indicators of perceived unfairness to Revenue Management	116
4.7. Conclusion: discussion, contributions and limitations of the study.	118

Chapter 5. Measuring Perceived Unfairness in Revenue Management	121
5.1. Introduction.	121
5.2. Models for measuring perceived unfairness in Revenue Management.	122
5.3. Exploratory qualitative studies and identification of indices of perceived unfairness.	123
5.4. Development of a scale to measure perceived unfairness in Revenue Management.	124
5.4.1. Definition of the construct domain of perceived unfairness in Revenue Management	124
5.4.2. Specification of the measurement model and scale items	124
5.4.3. Exploratory factor analysis of perceived unfairness in Revenue Management	125
5.4.4. Results of the PCA of perceived unfairness in Revenue Management	126
5.4.5. Interpretation of the selected factorial axes.	127
5.4.6. Confirmatory analysis of the Revenue Management perceived unfairness scale	128
5.4.7. Testing the reliability of the perceived unfairness Revenue Management scale	129
5.4.8. Measuring the validity of the Revenue Management perceived unfairness scale	129
5.5. Research discussions: contributions, limitations and avenues of research	134
5.5.1. Theoretical research contributions	134
5.5.2. The managerial contributions of research.	135
5.5.3. Methodological contributions of the research	136
5.5.4. Limits of the proposed measurement model	136
5.5.5. Future research avenues	137
5.6. Conclusion	137
 Chapter 6. Testing an Empirical Model of Responsible Revenue Management in the Hotel Sector	 139
6.1. Introduction.	139
6.2. The factors of responsible Revenue Management	140
6.2.1. Ethical issues in Revenue Management practices	140
6.2.2. Perceived price fairness	140
6.2.3. Transparent pricing information	141
6.3. Integrating ethics, fairness and transparency into Revenue Management practices	141

6.4. Testing the effects of fairness and transparency on unfairness reduction and WTP Revenue Management-based prices	143
6.4.1. Perceived injustice of Revenue Management	144
6.4.2. Willingness to pay prices resulting from Revenue Management	144
6.4.3. Direct effects of perceived fairness and transparency on reducing perceived injustice and WTP	145
6.4.4. Interaction effects of perceived justice and perceived transparency on perceived injustice and WTP	147
6.5. Research methodology	149
6.5.1. Quantitative data collection and preanalysis	149
6.5.2. Validation of measuring instruments	150
6.5.3. Justifying the choice of structural equations to test the explanatory model	151
6.6. Research results	151
6.6.1. Direct effects of perceived fairness and perceived transparency on the reduction of perceived injustice and on WTP	151
6.6.2. Interaction effects of perceived fairness and perceived transparency on reducing perceived injustice and WTP	153
6.7. Contributions, limits and avenues of research	155
6.7.1. Theoretical contributions	155
6.7.2. Managerial contributions	158
6.7.3. Research limits	159
6.7.4. Prospects and avenues for future research	160
6.8. Conclusion	161

Chapter 7. Towards Ethical and Responsible Revenue Management in the Tourism Sector 163

7.1. Introduction.	163
7.2. Price fairness levers in the age of AI	164
7.2.1. Value-based pricing	164
7.2.2. Prices based on time and distance of use	165
7.3. The levers of Revenue Management transparency in the age of AI	166
7.3.1. The challenges of clear pricing information	167
7.3.2. Dynamic communication on the value of the offer	167
7.3.3. Reducing the opacity of Revenue Management-based prices	168
7.3.4. The challenges of information regarding price variation	168
7.3.5. Displaying reliable and transparent information	169
7.3.6. Displaying reference prices to guide consumers	170

7.3.7. Developing media communication on Revenue Management issues	171
7.3.8. The challenges of bottom-up pricing compared with fluctuating prices	172
7.4. The “Best Available Rate” method and its advantages	172
7.5. Price parity between distribution channels	172
7.6. Revenue Management in the mutual interest of both company and consumer	173
7.7. Bundling practices.	174
7.8. Cross-selling	174
7.9. Data challenges for ethical personalization of the price offer	175
7.10. Developing a data-driven management culture	175
7.11. Compliance with European regulations on dynamic pricing	177
7.12. Conclusion	178
General Conclusion.	181
