<b>Chapter 1. Modeling/Forecasting Patient Recruitment in Multicenter Clinical Trials Using Time-dependent Models . . . . .</b>	<b>1</b>
Volodymyr ANISIMOV and Lucas OLIVER	
1.1. Introduction . . . . .	1
1.2. Poisson-gamma model with time-dependent rates . . . . .	5
1.2.1. The case of homogeneous rates . . . . .	5
1.3. Non-homogeneous PG model . . . . .	7
1.3.1. Estimation at the interim stage . . . . .	9
1.3.2. Simulation of non-homogeneous PG model . . . . .	10
1.4. Testing the recruitment rates for homogeneity . . . . .	11
1.4.1. Poisson-type test . . . . .	12
1.4.2. Criterion for testing hypothesis $H_0$ . . . . .	13
1.4.3. Poisson-gamma test . . . . .	15
1.5. Implementations . . . . .	19
1.6. Acknowledgment . . . . .	20
1.7. References . . . . .	20
<b>Chapter 2. Forecasting the Next Megacycle of the Economy . . . . .</b>	<b>23</b>
George S. ATSALAKIS and Ioanna ATSALAKI	
2.1. Introduction . . . . .	23
2.2. 2024: the end of an economic megacycle . . . . .	24
2.3. The role of technology in shaping the future . . . . .	25
2.4. The economic consequences of the new cycle . . . . .	25
2.4.1. Presenting past megacycles . . . . .	26
2.4.2. The structure of economic megacycles . . . . .	26
2.4.3. Technology as a catalyst for megacycles . . . . .	27
2.4.4. Historical patterns of energy and economic growth. . . . .	27

2.5. The future of economic megacycles . . . . .	28
2.5.1. The 2024–2080 megacycle: a new era of exponential change and growth . . . . .	28
2.5.2. Stagnation phase: 2024–2052 . . . . .	29
2.5.3. Growth phase: 2052–2080 . . . . .	29
2.5.4. Geopolitical and societal implications . . . . .	30
2.5.5. Role of labor and automation . . . . .	31
2.6. Conclusions . . . . .	31
2.7. References . . . . .	32
 <b>Chapter 3. Modeling Functioning as a Determinant of Wellbeing: A Mediation Analysis . . . . .</b>	 35
Anastasia CHARALAMPI and Catherine MICHALOPOULOU	
3.1. Introduction . . . . .	35
3.2. Methods . . . . .	37
3.2.1. Procedure and participants . . . . .	37
3.2.2. Measures and item selection . . . . .	38
3.2.3. Statistical analyses . . . . .	40
3.3. Results . . . . .	41
3.3.1. Univariate analysis . . . . .	41
3.3.2. Bivariate analysis: correlation analysis . . . . .	42
3.3.3. Multivariate analysis: mediation analysis . . . . .	42
3.4. Conclusions . . . . .	47
3.5. References . . . . .	48
3.6. Appendix . . . . .	51
 <b>Chapter 4. Cross-Cultural Issues in Psychological Assessment: A Multistrategy Approach . . . . .</b>	 53
Franca CRIPPA, Giulia GOTTI, Raffaella CALATI, Mariangela ZENGA, Kainaat DANYAL and Naved IQBAL	
4.1. Introduction . . . . .	53
4.2. Suicide risk among university students: India and Italy in direct comparison . . . . .	54
4.3. Merging techniques: A better way in cross-cultural studies? . . . . .	56
4.4. Do different people respond in the same way to common items? . . . . .	58
4.5. Conclusions . . . . .	61
4.6. References . . . . .	61

---

<b>Chapter 5. A Control Chart for Zero-Inflated Semi-Continuous Data . . . . .</b>	<b>65</b>
Fernanda Otília FIGUEIREDO, Adelaide FIGUEIREDO and M. Ivette GOMES	
5.1. Introduction . . . . .	65
5.1.1. Zero-inflated and hurdle models for count data . . . . .	66
5.1.2. Inflated distributions for semi-continuous data . . . . .	66
5.2. Zero-inflated Lomax distribution . . . . .	67
5.2.1. The Lomax and the zero-inflated Lomax distributions . . . . .	67
5.2.2. Maximum likelihood estimates . . . . .	68
5.3. Shewhart control chart for monitoring zero-inflated Lomax data . . . . .	69
5.4. Performance of the proposed control chart . . . . .	70
5.5. Conclusions . . . . .	74
5.6. Acknowledgments . . . . .	76
5.7. References . . . . .	76
<b>Chapter 6. Further Results on Location Invariant Estimation of the Weibull Tail Coefficient . . . . .</b>	<b>79</b>
M. Ivette GOMES, Frederico CAEIRO and Lígia HENRIQUES-RODRIGUES	
6.1. Introduction . . . . .	79
6.2. Hill and GMs EVI and WTC-estimators . . . . .	81
6.2.1. Power-mean-of-exponent- $p$ (PM $_p$ ) and Holder's mean-of-order- $p$ (MO $_p \equiv H_p$ ) EVI estimation . . . . .	81
6.2.2. WTC estimation . . . . .	83
6.3. Classes of PORT-GMs (PGMs) WTC-estimators . . . . .	84
6.4. Monte Carlo simulation of the PORT-GPM $_p$ (PGPM $_p$ ) WTC-estimators . . . . .	85
6.5. Overall comments and open research topics . . . . .	89
6.6. Acknowledgments . . . . .	91
6.7. References . . . . .	91
<b>Chapter 7. What Can we Learn from Malta? An Exploration of Gender Disparities in Education, Work and Money in Europe . . . . .</b>	<b>95</b>
Erika GRAMMATICA, Francesca GRESELIN and Mariangela ZENGA	
7.1. Introduction . . . . .	95
7.2. Gender gap: education, work and money . . . . .	96
7.3. Gender Equality Index . . . . .	98
7.4. Three-way data approach based on principal component analysis . . . . .	100
7.5. Evidence from principal component analysis . . . . .	102
7.6. Results of trajectory analysis . . . . .	103

7.7. Conclusions . . . . .	106
7.8. Acknowledgments . . . . .	106
7.9. References . . . . .	107

**Chapter 8. Financial Analysis of a Public Hospital:  
The Case of the Corfu General Hospital . . . . .** 109  
Margarita IOANNIDOU and George MATALLIOTAKIS

8.1. Introduction . . . . .	109
8.2. Materials and methods . . . . .	110
8.3. Results . . . . .	110
8.3.1. Liquidity ratios . . . . .	110
8.3.2. Financial structure and viability ratios . . . . .	111
8.3.3. Activity ratios . . . . .	112
8.3.4. Profitability ratios . . . . .	113
8.4. Discussion . . . . .	114
8.5. References . . . . .	115

**Chapter 9. EWMA Control Charts for Skewed Distributions . . . . .** 117  
Derya KARAGÖZ and Moustapha Aminou TUKUR

9.1. Introduction . . . . .	117
9.2. Exponentially weighted moving average control charts . . . . .	119
9.3. EMMA control charts for the non-normal process . . . . .	120
9.3.1. The $WV_{EWMA}$ control chart . . . . .	121
9.3.2. The $WSD_{EWMA}$ control chart . . . . .	121
9.3.3. Newly proposed $SC_{EWMA}$ control chart . . . . .	122
9.4. Real data . . . . .	122
9.5. Simulation study . . . . .	125
9.6. Simulation algorithm . . . . .	126
9.7. Results and discussion . . . . .	127
9.8. Conclusion . . . . .	131
9.9. References . . . . .	133

**Chapter 10. Assessing the Impact of Renewable Energy Sources  
on Energy Economics: A Non-Linear Regression Analysis  
of Hellenic Energy Exchange Market Clearing Prices . . . . .** 135  
Emmanuel KARAPIDAKIS, Yiannis KATSIGIANNIS, Konstantinos BLAZAKIS,  
Marios NIKOLOGIANNIS, George MATALLIOTAKIS, Georgios STAVRAKAKIS,  
Nikos VENIANAKIS and Paolo BONFINI

10.1. Introduction . . . . .	135
------------------------------	-----

---

10.2. Methodology . . . . .	137
10.2.1. Spearman's rank. . . . .	137
10.2.2. Sparse autoencoder . . . . .	139
10.3. Results . . . . .	140
10.4. Discussion. . . . .	142
10.5. Conclusions . . . . .	143
10.6. Acknowledgments . . . . .	143
10.7. References . . . . .	144
<b>Chapter 11. Enhancing Energy Market Stability: Comparative Analysis of Forecasting Techniques for Market Clearing Prices in the Day-Ahead Market . . . . .</b>	<b>147</b>
Emmanuel KARAPIDAKIS, Yiannis KATSIGIANNIS, Konstantinos BLAZAKIS, Marios NIKOLOGIANNIS, George MATALLIOTAKIS, Georgios STAVRAKAKIS, Nikos VENIANAKIS and Nikolaos SCHETAKIS	
11.1. Introduction . . . . .	147
11.2. Methodology . . . . .	150
11.3. Results . . . . .	152
11.4. Discussion. . . . .	155
11.5. Conclusions . . . . .	155
11.6. Acknowledgments . . . . .	155
11.7. References . . . . .	156
<b>Chapter 12. Using the Coxian Continuous-Time Hidden Markov Model to Analyze Lombardy Region Wards for Older Individuals . . . . .</b>	<b>159</b>
Hannah MITCHELL, Adele H. MARSHALL and Mariangela ZENGA	
12.1. Introduction . . . . .	160
12.2. Methodology . . . . .	161
12.3. Data and results. . . . .	165
12.3.1. Data . . . . .	165
12.3.2. Results . . . . .	165
12.4. Conclusions . . . . .	172
12.5. Practice implications. . . . .	172
12.6. Conflict of interest . . . . .	173
12.7. References . . . . .	173

<b>Chapter 13. Estimators for Extreme Value Index: Advancements in Tail Inference . . . . .</b>	<b>177</b>
Ayana MATEUS and Frederico CAEIRO	
13.1. Introduction . . . . .	177
13.2. Estimators for the tail parameters . . . . .	179
13.2.1. The new class of estimators for the EVI. . . . .	179
13.2.2. Asymptotic properties of the GPWM estimators. . . . .	181
13.2.3. Estimating an extreme quantile . . . . .	182
13.3. Monte Carlo simulation study of the GPWM estimators . . . . .	182
13.3.1. Methodology . . . . .	183
13.3.2. Results . . . . .	183
13.4. Conclusion . . . . .	185
13.5. Acknowledgments . . . . .	185
13.6. References . . . . .	185
 <b>Chapter 14. Determinants of Students' Attitude Toward History: An Empirical Approach . . . . .</b>	 <b>187</b>
Aristea MAVROGIANNI, Eleni VASILAKI and Maria GRYDAKI	
14.1. Introduction . . . . .	188
14.2. Previous research . . . . .	190
14.2.1. Attitude toward history . . . . .	190
14.2.2. Educational factors . . . . .	191
14.2.3. Socioeconomic factors . . . . .	191
14.3. Data and methods . . . . .	194
14.3.1. Data . . . . .	194
14.3.2. Empirical methodology . . . . .	197
14.4. Results . . . . .	198
14.5. Summary and conclusions . . . . .	203
14.6. Appendices . . . . .	204
14.6.1. Appendix A: the initial full questionnaire for the attitude survey toward history (EDIS) . . . . .	204
14.6.2. Appendix B: the final questionnaire for the attitude survey toward history (EDIS) . . . . .	206
14.6.3. Appendix C . . . . .	207
14.7. References . . . . .	208
 <b>Chapter 15. Methodological Procedures for Assessing the Quality of Death Certificates Due to Unknown Causes . . . . .</b>	 <b>217</b>
Neir Antunes PAES	
15.1. Introduction . . . . .	217

---

15.2. Methods . . . . .	219
15.2.1. First step: correction of underregistration of deaths (f) . . . . .	220
15.2.2. Second step: redistribution of deaths due to ill-defined causes . . . . .	223
15.2.3. Third step: redistribution of deaths due to non-specific causes (garbage codes) . . . . .	226
15.3. Illustrative example . . . . .	227
15.4. Conclusions . . . . .	230
15.5. References . . . . .	230
 <b>Chapter 16. Health Status, Cancer and Pneumonia Death Rates in Europe: 2019–2022</b> . . . . .	233
Elena ŘÍHOVÁ and Kornélia SVAČINOVÁ	
16.1. Introduction . . . . .	233
16.2. Background . . . . .	234
16.3. Methods . . . . .	235
16.4. Results and discussion . . . . .	237
16.4. Conclusions . . . . .	244
16.5. References . . . . .	244
 <b>Chapter 17. A Bayesian Asymmetric Approach to Modeling Volatility on Portfolios with Many Assets</b> . . . . .	247
David SUDA, Monique Borg INGUANEZ and Matthew CAMILLERI	
17.1. Introduction . . . . .	247
17.2. Dynamic principal component analysis . . . . .	248
17.3. Bayesian Student-t GJR(1,1) model . . . . .	250
17.4. Asymmetric modeling of a portfolio with many assets . . . . .	251
17.5. Forecasting, predictive ability and risk estimation . . . . .	253
17.6. Conclusion . . . . .	256
17.7. References . . . . .	256
 <b>Chapter 18. Pandemic-Driven Innovations: Utilizing Online Learning and Big Data Analysis for Decision-Making in Educational Environments</b> . . . . .	259
Leonidas THEODORAKOPOULOS, Ioanna KALLIAMPAKOU, Alexandra THEODOROPOULOU and Gerasimos KALOGERATOS	
18.1. Introduction . . . . .	260
18.2. Literature review . . . . .	260

18.2.1. Difficulties during the COVID-19 period . . . . .	260
18.2.2. Effects of COVID-19 on education . . . . .	261
18.2.3. Big data analysis in educational research . . . . .	262
18.2.4. Related work . . . . .	263
18.3. Methodology . . . . .	264
18.4. Research questions . . . . .	264
18.4.1. Dataset presentation . . . . .	265
18.5. Conclusion . . . . .	273
18.6. Suggestions for further research . . . . .	274
18.7. References . . . . .	274
 <b>Chapter 19. Credit Card Fraud Detection with Machine Learning and Big Data Analytics: A PySpark Framework Implementation . . . . .</b>	 281
Leonidas THEODORAKOPOULOS, Ioanna KALLIAMPAKOU, Alexandra THEODOROPOULOU and Fotini ZAKKA	
19.1. Introduction . . . . .	281
19.2. Literature review . . . . .	283
19.2.1. Introduction to credit card fraud detection . . . . .	283
19.2.2. The importance of detecting credit card fraud . . . . .	284
19.2.3. Role of machine learning in improving decision-making processes in fraud detection . . . . .	284
19.2.4. Automated pattern recognition . . . . .	285
19.2.5. Predictive modeling . . . . .	285
19.2.6. Dynamic risk scoring . . . . .	285
19.2.7. Anomaly detection . . . . .	286
19.2.8. Natural language processing (NLP) . . . . .	286
19.2.9. Integration with existing systems . . . . .	286
19.2.10. Credit card fraud detection: machine learning applications . . . . .	286
19.2.11. Credit card fraud detection using Apache Spark . . . . .	287
19.2.12. How can machine learning algorithms enhance decision quality in detecting fraud? . . . . .	288
19.2.13. Improved detection accuracy . . . . .	288
19.2.14. Real-time processing and analysis . . . . .	288
19.2.15. Handling big data and complex variables . . . . .	289
19.2.16. Adaptive learning for evolving threats . . . . .	289
19.2.17. Cost efficiency through automation . . . . .	289
19.2.18. Enhanced scalability . . . . .	289
19.3. Materials and methods . . . . .	290
19.3.1. Performance evaluation . . . . .	292
19.4. Results . . . . .	307
19.4.1. Comparative analysis . . . . .	314

---

19.5. Conclusions . . . . .	315
19.6. Future work . . . . .	317
19.7. Limitations . . . . .	317
19.8. References . . . . .	318
<b>Chapter 20. Quantitative Modeling of the Demographic Aging Process . . . . .</b>	<b>323</b>
Grażyna TRZPIOT	
20.1. Introduction . . . . .	323
20.2. Literature review . . . . .	324
20.3. Methodology . . . . .	325
20.3.1. Dependency ratios – double aging index . . . . .	327
20.3.2. Multivariate regression model for the double aging index . . . . .	330
20.4. Research results and discussion . . . . .	330
20.5. Conclusions . . . . .	331
20.6. References . . . . .	332
<b>Chapter 21. Hotel Sales During COVID-19: Evidence from the United States . . . . .</b>	<b>333</b>
Dimitrios VORTELINOS, Christos FLOROS, Alexandros APOSTOLAKIS and Ioannis PASSAS	
21.1. Introduction . . . . .	333
21.2. Literature review . . . . .	334
21.3. Travel and tourism economic impact in 2022 . . . . .	335
21.3.1. Travel and tourism GDP . . . . .	335
21.3.2. Travel and tourism employment . . . . .	335
21.3.3. Travel and tourism forecasts . . . . .	336
21.4. Key developments in the hospitality sector in 2022 . . . . .	336
21.4.1. Overall highlights . . . . .	336
21.4.2. Hotel room demand . . . . .	337
21.4.3. Occupancy . . . . .	337
21.4.4. Room revenue . . . . .	338
21.4.5. Workforce . . . . .	338
21.4.6. State and local tax revenue . . . . .	338
21.4.7. US hotel markets . . . . .	339
21.5. Data and methodology . . . . .	340
21.5.1. Data description . . . . .	340
21.5.2. Methodology . . . . .	340
21.5.3. LARC score . . . . .	340
21.5.4. Graphical analysis of variables . . . . .	341

21.6. Results . . . . .	343
21.7. Concluding remarks and future research . . . . .	346
21.8. Acknowledgments . . . . .	346
21.9. References . . . . .	346
