Preface	xi
Béatrice CLOUET-D'ORVAL, Bruno FRANZETTI and Philippe OGER	
Chapter 1. Replication of Archaeal Chromosomes	1
Ghislaine HENNEKE, Roxane LESTINI, Marc NADAL and Didier FLAMENT	
1.1. Replication initiation	2
1.1.1. Identifying the origins of replication.	2
1.1.2. Recognizing the origins of replication.	3
1.1.3. Pre-initiation complex formation.	6
1.1.4. Primer synthesis.	7
1.2. The elongation phase of replication	8
1.3. Okazaki fragment maturation	10
1.3.1. Removal of ribonucleotides by RNase HIII	11
1.3.2. Removal of oligonucleotides by FEN1	11
1.3.3. DNA fragment assembly by DNA ligase	13
1.4. Restarting replication forks	15
1.5. Replication termination.	18
1.6. Chromosome segregation and decatenation	18
1.7. References	19

Chapter 2. Archaeal DNA Repair	25
Caroline L'HERMITTE-STEAD, Anaïs BAYARD, Alexey ALEKSANDROV, Roxane LESTINI and Hannu MYLLYKALLIO	
2.1. General introduction	25
2.2. Several different types of DNA damages occur in archaea	28
2.2.1. The archaeal replisome as the intrinsic source of replication errors and DNA damage.	28
2.2.2. Chemical and physical factors threaten the integrity of archaeal genomes	29
2.3. Different archaeal DNA repair pathways	31
2.3.1. DNA mismatches threaten genome integrity in all domains of life	31
2.3.2. Archaeal NER	33
2.3.3. BER in archaea	35
2.3.4. Archaeal RER	37
2.3.5. Double-strand break repair in archaea.	37
2.4. Coordination of the different pathways by the replication clamp	40
2.5. Summary and conclusion.	42
2.6. References	43
Chapter 3. Transcription in Archaea	45
Thomas FOUQUEAU, Duy KHANH PHUNG and Ludovic SAUGUET	
3.1. RNA polymerase	47
3.1.1. RNA polymerase architecture in archaea	47
3.1.2. A highly preserved catalytic core.	50
3.1.3. Anatomy of the active site of an RNA polymerase	50
3.2. The three stages of transcription	51
3.2.1. Transcription initiation.	52
3.2.2. Elongation	55
3.2.3. Termination	61
3.3. Transcription regulation	64
3.4. References	66
Chapter 4. RNA Classes and Their Maturation and Degradation Enzymes	77
Manon BATISTA, Béatrice CLOUET-D'ORVAL and Marie BOUVIER	
4.1. Introduction.	77
4.2. RNA classes in archaea.	79

4.2.1. Messenger RNA	79
4.2.2. Transfer RNA	81
4.2.3. Ribosomal RNA	81
4.2.4. Box C/D and H/ACA guide RNA	83
4.2.5. Small regulatory RNA	83
4.2.6. CRISPR RNA	84
4.3. Ribonuclease families in archaea	84
4.3.1. Ubiquitous endoribonucleases in archaea	86
4.3.2. 3'–5' exoribonucleases	90
4.3.3. The β -CASP ribonuclease and 5'–3' exoribonuclease families are widespread in archaea	93
4.4. Ubiquitous RNA-binding proteins in archaea	95
4.4.1. Sm-like proteins	96
4.4.2. The ribosomal protein L7Ae	96
4.4.3. Helicases of the SF2 superfamily	97
4.5. Conclusion	100
4.6. References	100
Chapter 5. Ribosome and Transfer RNA Biogenesis	115
Tamara BASTA and Sébastien FERREIRA-CERCA	
5.1. Ribosome biogenesis	116
5.1.1. Ribosome composition	116
5.1.2. Ribosome biogenesis in a nutshell	122
5.1.3. Synthesis of the ribosomal constituents	123
5.1.4. Ribosome biogenesis process	125
5.2. Synthesis and maturation of tRNAs	133
5.2.1. tRNA structure	133
5.2.2. Diversity of tRNA genes	135
5.2.3. Transcript processing	137
5.2.4. Nucleotide modifications	145
5.2.5. Aminoacylation of tRNAs	151
5.3. Methodical toolboxes	156
5.4. References	158
Chapter 6. The Diversity and Function of Noncoding RNAs in Archaea	167
Hubert F. BECKER and Christine GASPIN	
6.1. Introduction	167
6.2. Noncoding RNA diversity	168

6.2.1. ncRNA modification guides.	169
6.2.2. ncRNAs as regulators of gene expression.	172
6.2.3. CRISPR ncRNA.	173
6.2.4. Small RNAs derived from tRNAs (tsRNAs)	175
6.2.5. Noncoding RNA introns in archaea	177
6.3. ncRNA identification	178
6.3.1. Experimental approaches	178
6.3.2. Bioinformatics approaches	180
6.4. Circularization of noncoding RNAs	182
6.4.1. Overview of circRNAs.	182
6.4.2. Biogenesis of circRNAs	183
6.5. Conclusion	185
6.6. References	186
Chapter 7. Translation in Archaea.	193
Emmanuelle SCHMITT and Yves MECHULAM	
7.1. Initiating the translation	195
7.1.1. aIF2 and the ternary complex aIF2:GTP:Met-tRNA ^{iMet}	198
7.1.2. The 30S initiation complex in <i>Pyrococcus abyssi</i>	201
7.1.3. Comparison with eukaryotic eIF1, eIF1A and eIF2 factors	204
7.1.4. The different patterns of mRNA recruitment in archaea	204
7.1.5. Assembly with the large subunit and formation of the elongation-competent ribosome	205
7.2. Elongation peptide synthesis.	206
7.2.1. Recruitment of aminoacylated tRNA to site A.	209
7.2.2. The special case of the SelB factor.	209
7.2.3. Translocation	210
7.2.4. EF-P-e/aIF5A	211
7.2.5. GTPase recruitment platform	212
7.2.6. Localized translation at the membrane	213
7.3. Translation termination and ribosome recycling	214
7.3.1. The class 1 factor, aRF1	215
7.3.2. The class 2 archaeal factor, aEF1A	215
7.3.3. The ABCE1 factor	217
7.3.4. The special case of abnormal terminations	218
7.3.5. Ribosome recycling after abnormal termination	219
7.4. Conclusion	219
7.5. References	220

List of Authors	233
