<b>Preface</b> . . . . .	xi
<b>Errata for Volume 1 and Volume 2</b> . . . . .	xv
<b>List of Notations</b> . . . . .	xix
<b>Chapter 1. Differential Calculus</b> . . . . .	1
1.1. Introduction . . . . .	1
1.2. Fréchet differential calculus . . . . .	2
1.2.1. General conventions . . . . .	2
1.2.2. Fréchet differential . . . . .	5
1.2.3. Mappings of class $C^p$ . . . . .	9
1.2.4. Taylor's formulas . . . . .	12
1.2.5. Analytic functions . . . . .	16
1.2.6. The implicit function theorem and its consequences . . . . .	19
1.3. Other approaches to differential calculus . . . . .	27
1.3.1. Lagrange variations and Gateaux differentials . . . . .	27
1.3.2. Calculus of variations: elementary concepts . . . . .	29
1.3.3. "Convenient" differentials . . . . .	32
1.4. Smooth partitions of unity . . . . .	35
1.4.1. $C^\infty$ -paracompactness of Banach spaces . . . . .	35
1.4.2. $c^\infty$ -paracompactness . . . . .	36
1.5. Ordinary differential equations . . . . .	37
1.5.1. Existence and uniqueness theorems . . . . .	37
1.5.2. Linear differential equations . . . . .	43
1.5.3. Parameter dependence of solutions . . . . .	45

<b>Chapter 2. Differential and Analytic Manifolds</b> . . . . .	49
2.1. Introduction . . . . .	49
2.2. Manifolds: tangent space of a manifold at a point . . . . .	50
2.2.1. Notion of a manifold . . . . .	50
2.2.2. Morphisms of manifolds . . . . .	56
2.2.3. Tangent mappings . . . . .	58
2.2.4. Tangent vectors . . . . .	58
2.3. Tangent linear mappings; submanifolds . . . . .	65
2.3.1. Tangent linear mapping; rank . . . . .	65
2.3.2. Differential . . . . .	66
2.3.3. Submanifolds . . . . .	67
2.3.4. Immersions and embeddings . . . . .	68
2.3.5. Submersions, subimmersions and <i>étale</i> mappings . . . . .	71
2.3.6. Submanifolds of $\mathbb{K}^n$ . . . . .	74
2.3.7. Products of manifolds . . . . .	75
2.3.8. Transversal morphisms and manifolds . . . . .	76
2.3.9. Fiber product of manifolds . . . . .	78
2.3.10. Covectors and cotangent spaces . . . . .	79
2.3.11. Cotangent linear mapping . . . . .	80
2.4. Lie groups and their actions . . . . .	81
2.4.1. Lie groups . . . . .	81
2.4.2. Manifolds of orbits and homogeneous manifolds . . . . .	88
<b>Chapter 3. Fiber Bundles</b> . . . . .	93
3.1. Introduction . . . . .	93
3.2. Tangent bundle and cotangent bundle . . . . .	94
3.2.1. Tangent bundle . . . . .	94
3.2.2. Cotangent bundle . . . . .	96
3.2.3. Tangent bundle and cotangent bundle functors . . . . .	98
3.3. Fibrations . . . . .	98
3.3.1. Notion of a fibration . . . . .	99
3.3.2. Fiber product and preimage of fibrations . . . . .	101
3.3.3. Coverings . . . . .	103
3.3.4. Sections . . . . .	107
3.4. Vector bundles . . . . .	108
3.4.1. Vector bundles . . . . .	108
3.4.2. Dual of a vector bundle . . . . .	112
3.4.3. Subbundles and quotient bundles . . . . .	113
3.4.4. Whitney sum and tensor product . . . . .	114
3.4.5. The category of vector bundles . . . . .	115
3.4.6. Preimage of a fiber bundle . . . . .	120
3.5. Principal bundles . . . . .	121
3.5.1. Notion of a principal bundle . . . . .	121

3.5.2. Vertical tangent vectors . . . . .	123
3.5.3. Morphisms of principal bundles . . . . .	124
3.5.4. Principal bundles defined by cocycles . . . . .	124
3.5.5. Fiber bundle associated with a principal bundle . . . . .	125
3.5.6. Extension, restriction, quotientization of the structural group . . . . .	126
3.5.7. Examples of trivial principal bundles . . . . .	128
<b>Chapter 4. Tensor Calculus on Manifolds . . . . .</b>	<b>131</b>
4.1. Introduction . . . . .	131
4.2. Tensor calculus . . . . .	132
4.2.1. Tensors . . . . .	132
4.2.2. Symmetric tensors and antisymmetric tensors . . . . .	135
4.2.3. Exterior algebra . . . . .	138
4.2.4. Duality in the exterior algebra . . . . .	139
4.2.5. Interior products . . . . .	141
4.2.6. Tensors on Banach spaces . . . . .	143
4.3. Tensor fields . . . . .	145
4.3.1. Vector fields . . . . .	145
4.3.2. Covector field . . . . .	146
4.3.3. Tensor fields and scalar fields . . . . .	146
4.4. Differential forms . . . . .	148
4.4.1. Differential forms of degree $p$ . . . . .	148
4.4.2. Preimage of a differential $p$ -form . . . . .	149
4.4.3. Differential forms taking values in a fiber bundle. List of formulas . . . . .	151
4.4.4. Orientation . . . . .	154
4.4.5. Integral of a differential form of maximal degree . . . . .	157
4.4.6. Differential forms of odd type . . . . .	163
4.4.7. Integration of a differential form over a chain . . . . .	166
4.5. Pseudo-Riemannian manifolds . . . . .	170
4.5.1. Metric . . . . .	170
4.5.2. Pseudo-Riemannian volume element . . . . .	171
<b>Chapter 5. Differential and Integral Calculus on Manifolds . . . . .</b>	<b>173</b>
5.1. Introduction . . . . .	173
5.2. Currents and differential operators . . . . .	174
5.2.1. Currents and distributions . . . . .	174
5.2.2. Differential operators and point distributions . . . . .	181
5.3. Manifolds of mappings . . . . .	183
5.3.1. The Banach framework . . . . .	183
5.3.2. The “convenient” framework . . . . .	186
5.4. Lie derivatives . . . . .	187

5.4.1. Lie algebras . . . . .	187
5.4.2. Lie derivative of a function . . . . .	190
5.4.3. Lie brackets . . . . .	192
5.4.4. Lie derivative of vector, covector and tensor fields . . . . .	193
5.4.5. Lie derivative of a $p$ -form . . . . .	194
5.5. Exterior differential . . . . .	195
5.5.1. É. Cartan's theorem . . . . .	195
5.5.2. Application to vector calculus . . . . .	198
5.6. Stokes' formula and applications . . . . .	200
5.6.1. Stokes' formula on a chain . . . . .	200
5.6.2. Ostrogradsky and Green formulas . . . . .	203
5.6.3. Hodge duality and codifferentials . . . . .	206
5.6.4. Gauss' theorem and Poisson's formula . . . . .	213
5.6.5. Homology, cohomology and duality . . . . .	215
5.7. Integral curves and manifolds . . . . .	224
5.7.1. First-order differential equations . . . . .	224
5.7.2. Second-order differential equations . . . . .	228
5.7.3. Sprays . . . . .	229
5.7.4. Straightening of vector fields and frames . . . . .	231
5.7.5. Integral manifolds, foliations . . . . .	233
<b>Chapter 6. Analysis on Lie Groups . . . . .</b>	<b>245</b>
6.1. Introduction . . . . .	245
6.2. Convolution . . . . .	246
6.2.1. Convolution of distributions . . . . .	246
6.2.2. Haar measure and convolution of functions . . . . .	250
6.3. Classification of Lie algebras . . . . .	256
6.3.1. Additional notions from algebra . . . . .	256
6.3.2. Classical Lie algebras . . . . .	259
6.3.3. General notions about Lie algebras . . . . .	260
6.3.4. Nilpotent Lie algebras . . . . .	263
6.3.5. Solvable Lie algebras . . . . .	265
6.3.6. Simple and semi-simple Lie algebras . . . . .	267
6.3.7. Reductive Lie algebras . . . . .	271
6.3.8. Real compact Lie algebras . . . . .	272
6.4. Relation between Lie groups and Lie algebras . . . . .	273
6.4.1. Lie algebra of a Lie group . . . . .	273
6.4.2. Passing from a Lie algebra to a Lie group . . . . .	278
6.4.3. Dictionary . . . . .	281
6.5. Harmonic analysis . . . . .	284
6.5.1. Introduction . . . . .	284
6.5.2. Harmonic analysis on $\mathbb{R}^n$ . . . . .	286
6.5.3. Fourier series and Fourier transforms on the torus . . . . .	296

6.5.4. Fourier transform on a locally compact commutative group . . . . .	302
6.5.5. Overview of non-commutative harmonic analysis . . . . .	310
<b>Chapter 7. Connections</b> . . . . .	<b>315</b>
7.1. Introduction . . . . .	315
7.2. Linear connections . . . . .	317
7.2.1. Curvilinear coordinates . . . . .	317
7.2.2. Linear connection on a vector bundle . . . . .	323
7.2.3. Linear connection on a manifold . . . . .	325
7.2.4. Parallel transport and geodesics . . . . .	327
7.2.5. Covariant exterior differential . . . . .	330
7.2.6. Curvature and torsion of a linear connection . . . . .	331
7.3. Method of moving frames . . . . .	333
7.3.1. Moving frame and gauge potential . . . . .	334
7.3.2. Curvature, torsion and covariant exterior differential of a $\mathbf{G}$ -connection . . . . .	337
7.3.3. Quasi-parallelogram method . . . . .	340
7.3.4. Fundamental equalities . . . . .	344
7.3.5. Connection form on the bundle of $\mathbf{G}$ -frames . . . . .	345
7.3.6. Principal connections and parallel transport . . . . .	347
7.3.7. Covariant exterior differentiation on a principal bundle . . . . .	350
7.3.8. Characterization of a $\mathbf{G}$ -connection . . . . .	351
7.3.9. Curvature and torsion forms of a principal connection . . . . .	352
7.3.10. Cartan connections . . . . .	355
7.4. Riemannian geometry . . . . .	358
7.4.1. Levi-Civita connection . . . . .	358
7.4.2. Geodesics . . . . .	360
7.4.3. Flat pseudo-Riemannian manifolds . . . . .	361
7.4.4. Ricci tensor and Einstein tensor . . . . .	363
